THE SCIENTISTS NEWSWEEKLY

---

Presentation of the 1947 Eli Lilly and Company Award in Bacteriology and Immunology, consisting of a medal and \$1,000, to Wayne W. Umbreit, of Cornell University, at the 47th general meeting of the Society of American Bacteriologists in Philadelphia. The presentation was made by Thomas Francis, Jr., of the University of Michigan, president of the Society (*left*), and Leland W. Parr, of George Washington University, secretary-treasurer (*center*). The award is administered jointly by the American Society for Experimental Pathology, the American Association of Immunologists, and the Society of American Bacteriologists.

Index Issue

*For* **PHYSIOLOGICAL** *and other* **LABORATORIES**

(One-half the actual size)

1. *8-MM. Mounting Rod.* Solid or tubular; the latter is designed both for support and as a convenient conduit for electrical wiring.
2. *Right-Angle Rod.* A rigid and accurately formed support for universal adjustment of position.
3. *Swivel Clamp.* The swivel gives complete rotation and has a special hold-fast set screw. Made, like 1 and 2, of nicked brass.
4. *Clamp with Binding-Post.* Our regular double clamp with binding screw added for quick wiring operations. Stainless steel, with nicked brass fittings. The accurately machined jaws will take diameters of 14 mm. to 1 mm.

We also make a *Heavy Clamp* without swivel,  $\frac{3}{4}$  inch capacity; and a *Tunnel Clamp*, for control of flow in infusions and anaesthesia.

*Ready in August - New (2nd) Edition*

# WEATHERWAX<sup>9</sup>

## PLANT BIOLOGY

This text has been demonstrated most suitable for one semester courses in elementary botany. The author, Dr. Weatherwax, has made good use of his teaching ability and experience in revising and perfecting this text for the *New (2nd) Edition*. He has made innumerable changes to improve logical order, emphasis and form of expression.

The text is clear, concise and fully within the grasp of the student for whom it is intended. The approach has been physiological, morphological or taxonomic, whichever is best suited to the topic under consideration. From the chapter on Cells and Living Substance to the last on Ecological Relations, the material is well prepared and finely balanced . . . designed to give the student a real appreciation of the essentials.

### FEATURES of the NEW (2nd) EDITION

#### New illustrations

including some excellent life-cycle diagrams and a full color plate of chlorophyll.

#### New discussion on

Auxins and their relation to tropisms, flowering, etc.; responses to stimuli; bacteria, viruses, penicillin and streptomycin.

#### New Material on

Technics of plant breeding and its importance to agricultural problems; and vitamins.

#### Rewritten Discussions on

Cells, osmosis, tissues; plant respiration compared with animal respiration and kinetics; stems; pollination; the importance of plants in the life of man; the relation of plants to animals.

#### Glossary Revised

many new words added.

An Entirely New Section on Plant Formation.

By PAUL WEATHERWAX, Professor of Botany, Indiana University. About 478 pages, 5 $\frac{3}{4}$ " x 8 $\frac{3}{4}$ ", with 380 illustrations on 190 figures. *Ready September 2nd.*

## CONTENTS

---

The Chemical Study of Penicillin: A Brief History:

*Editorial Board of the Monograph on the Chemistry of Penicillin* 653

*News and Notes*..... 660

### *Technical Papers*

A Principle for Maintaining Earthworms in Farm Soils:

*Henry Hopp and Paul J. Linder*..... 663

Distribution of C<sup>14</sup> in Photosynthesizing Barley Seedlings:

*S. Aronoff, et al.*..... 664

### *In the Laboratory*

A Micromethod for the Determination of 1-(+) Lactic Acid:

*Margaret E. Greig*..... 665

Histochemical Demonstration of Alkaline Phosphatase in

Decalcified Dental and Osseous Tissues:

*Roy O. Greep, Clary J. Fischer, and Anna Morse*..... 666
