MICROSCOPE

**for the most exacting
scientific requirements**

Inclined Binocular Monocular Model BST 25/92

Leitz Microscopes need no introduction! The Model illustrated is supplied with Inclined Binocular body tube with parallel vision, as well as Interchangeable Monocular body tube for photomicrography.

It has a Quadruple nose piece.

The Coarse Focusing Adjustment is by rack and pinion motion; Fine Adjustment on double ball bearings with micrometer head, divided drum and vernier which records the lateral displacement of the Microscope tube within 0.001mm

A built-in Mechanical Stage is provided to cover the entire area of the Microscope slide.

It has a substage with rack and pinion, a Divisible, two-lens Abbe condenser with Iris Diaphragm.

The Optical Outfit meets the standard requirements of the medical profession, consisting of three Achromatic Objectives, including the oil immersion 1/12, as well as one each pair of Huygens Eyepieces 6X and 10X.

It is made by LEITZ, makers of Leica Cameras and other world famous instruments of scientific precision and inimitable craftsmanship.

*The present supply is limited but we can still make immediate delivery
