STANDARD INSTRUMENT  
for  
COLORIMETRIC ANALYSIS

## Fisher ELECTROPHOTOMETER

*—eliminates the human factor—*

The Fisher Electrophotometer permits colorimetric analyses to be made accurately, quickly and simply wherever the color of the solution varies in a definite manner with the concentration of a constituent.

The Electrophotometer operates from any 110 volt, 50-60 cycle line. With it, the user can detect very slight color intensity differences because the photoelectric system it employs is considerably more sensitive and reliable than the human eye.

*Fisher Electrophotometer*, complete with manual containing directions and typical, modern methods of analyses ..... **\$210.00**
