On Requesting Chemicals

INDUSTRIAL laboratories frequently receive requests from investigators for chemicals that may be available. These requests are welcome, but observance of the three simple rules set forth below would speed the filling of such requests and save considerable correspondence.

1) State the amount of material needed in the first

inquiry. "Small" is a relative term.

- 2) Ask for no more than the amount actually required. Unused chemicals on many shelves dissipate rare material.
- 3) Check the catalogues of suppliers of organic chemicals before making the request.

Zoological Nomenclature: Notice of Proposed Suspension of Rules in Certain Cases for Avoidance of Confusion and Validation of Current Nomenclatorial Practice (A. (n.s.) 8)

NOTICE is hereby given that the possible use by the International Commission on Zoological Nomenclature of its plenary powers is involved in applications relating to the undermentioned names included in Parts 5 to 8 of Volume 2 of the Bulletin of Zoological Nomenclature, each of which parts was published on May 4, 1951:

(1) Applications in Part 5

1) Titania Meigen, 1800, and Chlorops Meigen, 1803 (Class Insecta, Order Diptera), and associated family names (pp. 134-38) (File 197).

2) Dorilas Meigen, 1800, and Pipunculus Latreille [1802-1803] (Class Insecta, Order Diptera), and associated family names (p. 140) (File 221).

3) Tendipes Meigen, 1800, and Chironomus Meigen, 1803 (Class Insecta, Order Diptera), and associated family names (pp. 150-51) (File 469).

4) Philia Meigen, 1800, and Dilophus Meigen, 1803 (Class Insecta, Order Diptera), (pp. 153-54) (File 498).

- 5) Tylos Meigen, 1800, and Micropeza Meigen, 1803 (Class Insecta, Order Diptera), and associated family names (pp. 156-59) (File 501).
 - (2) Applications in Triple-Part 6/8
- 6) Sphaeroceras Bayle, 1878 (Class Cephalopoda, Order Ammonoidea), proposed validation of, by suppression of Sphaeroceras Hope, 1840 (Class Insecta, Order Coleoptera), (pp. 164-66) (File 405).

7) Procerites Siemiradzki, 1898 (Class Cephalopoda, Order Ammonoidea), proposed designation of type

species of (pp. 167-69) (File 403).

8) Macrocephalites Zittel, 1884, proposed designation of type species of; Ammonites macrocephalus Schlotheim, 1813, proposed determination of spe-

- cies to which name applicable (Class Cephalopoda, Order Ammonoidea) (pp. 170-72) (File 401).
- 9) Pictonia Bayle, 1878, and Rasenia Salfeld, 1913, proposed designation of type species of; trivial name cymodoce d'Orbigny, 1850 (as published in the binominal combination Ammonites cymodoce), (Class Cephalopoda, Order Ammonoidea), proposed suppression of (pp. 178-80) (File 421).

10) Aulacostephanus Tornquist, 1896 (Class Cephalopoda, Order Ammonoidea), proposed designation of type

species of (pp. 188-90) (File 384).

11) Kosmoceras Waagen, 1869, Harpoceras Waagen, 1869, and Perisphinctes Waagen, 1869 (Class Cephalopoda, Order Ammonoidea), proposed designation of type species of (pp. 191-93) (File 445).

- 12) Planites de Haan, 1825, proposed suppression of; Nautilus polygyratus Reinecke, 1818 (Class Cephalopoda, Order Ammonoidea), determination of species to which name applicable (pp. 194-97) (File 402).
- 13) Planulites Lamarck, 1801, Orbulites Lamarck, 1801, Pelagus Montfort, 1808, Ellipsolithes Montfort, 1808, Globites de Haan, 1825 (Class Cephalopoda, Order Ammonoidea), proposed suppression of (pp. 198-99) (File 423).

14) Ammonites Bruguiere, 1789 (Class Cephalopoda, Order Ammonoidea), proposed suppression of (pp.

200-203) (File 425).

15) angulatus Schlotheim, 1820 (as published in the binominal combination Ammonites angulatus) (Class Cephalopoda, Order Ammonoidea), proposed validation of, and determination of species to which name applicable (pp. 204-207) (File 422).

16) Toxosphinctes Buckman, 1923 (Class Cephalopoda, Order Ammonoidea), proposed suppression of (in favor of Arisphinctes Buckman, 1924) (pp. 214-

16) (File 389).

17) Arnioceras Hyatt, 1867 (Class Cephalopoda, Order Ammonoidea), proposed designation of type species of (pp. 217-19) (File 509).

18) Liparoceras Hyatt, 1867 (Class Cephalopoda, Order Ammonoidea), proposed designation of type species of (pp. 220-22) (File 507).

19) Normannites Munier-Chalmas, 1892 (Class Cephalopoda, Order Ammonoidea), proposed designation of type species of (pp. 222-23) (File 508).

- 20) virgula Deshayes, 1831 (as published in the binominal combination Gryphaea virgula) (Class Pelecypoda), proposed validation of (pp. 234-35) (File 407).
- 21) asper Lamarck, 1819 (as published in the binominal combination Pecten asper) (Class Pelecypoda), proposed validation of (pp. 236-37) (File 408).
- 22) Gryphaea Lamarck, 1801 (Class Pelecypoda), proposed suppression of, and validation of Gryphaea Lamarck, 1819 (pp. 239-40) (File 365).
- 2. The present notice is given in pursuance of decisions taken, on the recommendation of the International Commission on Zoological Nomenclature, by the Thirteenth International Congress of Zoology, Paris, July 1948 (Bull. Zool. Nomenclature, 4, 51, 57 [1950]; *ibid.*, 5, 5, 131).
- 3. Any specialist who may desire to comment on any of the foregoing applications is invited to do so in writing to the Secretary to the International Commission, 28 Park Village East, Regent's Park, London,

N. W. 1, Eng., as soon as possible. Every such comment should be clearly marked with the commission's file number as given in the present notice.

4. If received in sufficient time before the commencement by the International Commission of voting on the applications in question, comments received in response to the present notice will be published in the Bulletin of Zoological Nomenclature; applications received too late to be so published will be brought to the attention of the International Commission at the time of the commencement of voting on the application in question.

5. Under the decision by the International Congress of Zoology specified in paragraph 2 above, the period within which comments on the applications covered by the present notice are receivable is a period

of 6 calendar months calculated from the date of publication of the relevant part of the Bulletin of Zoological Nomenclature. The four parts now in question were published on May 4, 1951. In consequence, any comments on the applications published in those parts should reach the Secretariat of the International Commission at latest by November 4, 1951.

Francis Hemming

Secretary to the International Commission on Zoological Nomenclature

Erratum

WE HAVE been informed that reference 14 in the article by Eugene L. Hess (Science, 113, 709 [1951]) is to the new journal Arkiv för Kemi and not to Arkiv Kemi, Mineral., Geol.—EDITORS.

Book Reviews

The Wealth of India: A Dictionary of Indian Raw Materials and Industrial Products; Raw Materials, Vol. II, and Industrial Products, Part II, covering letter "C." B. N. Sastri, Ed. New Delhi, India: Council of Scientific & Industrial Research, 1950, 1951. Vol. II, 427 pp., Rs. 25, or about \$5.25; Part II, 251 pp., Rs. 15, or about \$3.15.

This is the second volume in the continuing series dealing with the raw materials and industrial products of India. It consists of two books, in which are described all subjects starting with the letter "C." Volume I, published in December 1948, covers subjects starting with the letters "A" and "B." It is understood that the series will cover over 4,000 subjects, about 90 per cent of which will relate to plant products, and the remainder to mineral products, mineral resources, and industries.

The work is an encyclopedia with subjects arranged in alphabetical order, and appears to be the result of a painstaking review of the literature and compilation of statistics. The information is presented in a manner understandable and useful to both layman and scientist. The text is well illustrated with line drawings, graphs, charts, colored plates, and half tones. The printing on heavy glossy paper is large and clear. However, because of the weight of the book it is doubtful if the binding will stand much hard usage. A vast variety of subjects, such as cotton, copper, cosmetics, chrysanthemum, cutlery, coal carbonization, ceramics, canvas, crocus, etc., is covered, and general, specific, and scientific information is given on each. The description of "Chromite," for example, occupies 9 pages and includes sections entitled "Occurrence," "Distribution," "Mining and Dressing," "Grading and Marketing," "Industrial Uses," "Scope for Expansion;" that of "Camellia" (from the leaves of which tea is made) covers 24 pages and includes a description of various species and sections on "Cultivation," "Manufacture," "Composition," "Production and Trade." The description of each subject generally begins with its scientific name, including related species, followed by its physical and chemical characteristics. Brief mention is made of the most important world occurrences and then a detailed description of where and how the subject is found in India and how it is used industrially. Numerous references are given throughout the text.

Undoubtedly one of the prime purposes of the Indian government in going to the great cost and effort of compiling this encyclopedia is to provide accurate and concise information about the natural resources of the country in order to encourage their development. The Council of Scientific and Industrial Research maintains an Informational Bureau of Natural Resources to answer inquiries from India and abroad regarding the scientific aspects, production, uses, sources of supply, and trade statistics of Indian raw materials and industry.

The books are excellent for reference, general reading, and teaching and should be in all libraries, universities, and other scientific institutions. They would be valuable also for commercial firms doing business in India.

Oral Pathology. 3rd ed. Kurt H. Thoma. St. Louis: Mosby, 1950. 1,592 pp. \$17.50.

In this revised and enlarged third edition of his well-known textbook, the author presents the pathogenesis, diagnosis, histopathology, and treatment of anomalies, diseases, and tumors of the mouth and jaws. The volume covers in most instances the clinical symptoms, x-ray studies, treatment, and, where indi-
