WASHINGTON, D. C.

FOR USE IN:

**Histology • Cytology • Histopathology
Cytochemistry • Histochemistry**

The Bird Tissue Cryo-Desiccator provides a simple, rapid, reliable and inexpensive method of preparing frozen dried tissues.

Tissues are supported in a basket which has movable partitions to accommodate specimens of different sizes.

Temperature is measured under the same conditions as the tissue. Liquid nitrogen is used to cool the tissue. Automatic sealing is achieved by atmospheric pressure.

This new Cryo-Desiccator is inexpensive to operate and easy to use. Glass parts are held to a minimum and the construction is rugged.
