## A DOUBLE MONOCHROMATOR- SPECTROMETER

for the  
ULTRAVIOLET  
VISIBLE AND  
INFRARED  
RANGES

The optical system of the Farrand Double Monochromator has been designed to reduce scattered radiations to a negligible magnitude, to attain highest spectral purity, to isolate narrow wave lengths and to obtain optimum resolution. By simply interchanging prisms, the instrument may be operated at any chosen spectral region within the range of 0.2 to 35 microns.

Complete details of design, operation and performance are given in Farrand Bulletin #806. Write for a copy.

## *it's uniform...* *insist on* PURINA Laboratory Chow

Controlled conditions are a "must" for exacting results in research using laboratory animals.

One factor you can count on is a uniform diet when you feed Purina Laboratory Chow. It's the same formula day after day, month after month.

Buy Laboratory Chow Checkers from your local Purina Dealer. Pressed in a convenient pellet form, it's clean and easy to feed.
