

This "LUBRI-TACT"

feature makes the
JAGABI®
Better Rheostat

The "Lubri-tact" consists of a graphited carbon lubricator which slides with the phosphor-bronze current-carrying brush. The resultant smooth action minimizes wear on the resistance winding... insures precise, positive adjustment and long life. Jagabi Rheostats have several other features that help make them rugged and dependable. They are fully described in an illustrated bulletin.

We stock Jagabi Rheostats in 8, 10, 16 and 20 inch lengths and in 76 ratings from 30,000 ohms, 1 ampere down to .34 ohm, 25 amperes. We also make special types.

FREEZE-DRYING for Histologic Preparations

Model FD-11

• Small, compact • semi-automatic • excellent visibility • simple, sensitive electronic vacuum gauge • drying periods regulated by size of tissue (20 permanent blocks or more can be prepared in 48 hours) • simple and efficient infiltration under vacuum.

Freeze-drying is now practical for your laboratory. We have pioneered in the simplification and improvement of histological freeze-drying equipment. Costly non-essentials are eliminated with resulting greater simplicity of operation.
