

# EASIER ON YOUR EYES!

## *Exclusive with the* **Bausch & Lomb** **BALPHOT** **Metallograph**

Only Bausch & Lomb gives you the Magna-Viewer projector screen—high-contrast images for easier study at selected magnifications.

- Comfortably located in the operator's natural line of vision; convenient for group viewing, for consultation.
- Ends visual fatigue in extended examinations, structure study, grain size determinations and dirt counts.
- Uniform image brightness, center to edge; easy to see in full room illumination.

A flick of a switch instantly shifts image to microscope or 5 x 7 camera (25× to 2000× magnification). You remain comfortably seated, fatigue-free. And . . . the Magna-Viewer is just one of the many B&L advantages that make it easier for you to do your best work.
