

McGRAW-HILL

"A truly sophisticated and important book"

ENERGY AND SOCIETY

The Relation Between Energy, Social Change, and Economic Development

By FRED COTTRELL, Miami University, Oxford, Ohio.

The statesman in conference, the sociologist in his library, the anthropologist or historian, the scientist in the laboratory, and everyone today, faces the basic question of the future of man and his civilization. To this question, and to many more of vital concern to us at this time, Professor Cottrell indicates an answer, fascinating and perhaps surprising to the reader.

Here is a rare adventure in original thought. In this significant new work the author shows how fuels and their converters have influenced social, economic, and political development in the past, and indicates some of the probable effects of changes in the nature and amounts of energy in the future. It is an attempt to analyze in terms of one key factor—energy forms and expenditures—the rise of Western Civilization and the contrasts between contemporary western societies and the underdeveloped societies.

NEW TEXTS

NATIONAL NUCLEAR ENERGY SERIES

THE METALLURGY OF ZIRCONIUM

Edited by BENJAMIN LUSTMAN, Westinghouse Electric Corporation; FRANK H. KERZE, JR., A.E.C., Washington, D.C. Division VII, Volume 4—794 pages, \$10.00

This outstanding volume presents an account of the occurrence, reduction, refining, properties, and uses of zirconium and zirconium alloys. The text, written by more than 50 contributors, is as complete as the quality of the available data permits.

PRODUCTION OF HEAVY WATER

Edited by GEORGE M. MURPHY, New York University Division III, Volume 4F—412 pages, \$5.25

This text is the most complete treatment possible under existing regulations on classified information. It describes the research and development of large-scale production of water with the heavy nitrogen isotope known as Deuterium, necessary in one of the important methods of U²³⁵ production.
