A NEW CORNELL RECORD. *The shrill
symphony of forty varieties of insects!*

The SONGS of INSECTS

CALLS OF THE COMMON CRICKETS, GRASSHOPPERS, AND CICADAS OF EASTERN UNITED STATES

Recorded by Richard D. Alexander and Donald J. Borror, Department of Zoology and Entomology, Ohio State University. Produced by P. P. Kellogg and A. A. Allen for the Laboratory of Ornithology, Cornell University.

A new listening experience is brought to you on this record, just released by Cornell University Records. The extremely high frequencies of insect songs make their recording a severe test of the best recording equipment, as well as a trial of the patience and skill of the operator.

Professional and amateur entomologists, as well as collectors of off-the-beaten-track recordings will wish to own this concert of primeval instrumentalists of the fields and backyards.

Complete listing of insects heard
on this record sent on request.

12-inch, vinylite record, two
sides, 33 1/3 rpm

"The recordings are excellent both in the reproduction of single voices and in that the calls are heard against a background of natural sounds."—

Dr. Coleman J. Goin, University of Florida, in Copeia

Voices of the Night

THE CALLS OF 34 FROGS AND TOADS
OF THE UNITED STATES AND CANADA

Music of the ponds, creeks, pools, and marshes is here performed by nature's strangest songsters. "Warmly recommended."—*High Fidelity*
