AINSWORTH right-a-weigh analytical balance

The Right-A-Weigh balance is fast, easy to use, and accurate. All weights are built into the balance, and are operated by convenient knobs.

SUBSTITUTION WEIGHING is the principle used. Sample pan and weights are both suspended from same end of beam. In weighing a load in the pan, equivalent weights are removed from above the pan. The load on the beam is always the same, thus the sensitivity of the balance is constant.

PRECISION OPTICS AND COATED LENSES give high magnification and sharp definition.

BRUNTON METAL (high chrome-nickel alloy) WEIGHTS are accurate and are very hard, smooth, corrosion-resistant and non-magnetic for long satisfactory service.

ALUMINUM ALLOY BEAM is homogeneous, has a uniform cross-section, is stress relieved, and is compensated for changes in atmospheric pressure.

FAST DAMPER ACTION

SYNTHETIC SAPPHIRE BEARINGS are hard, uniform, do not absorb moisture, and have very low coefficient of friction.

◀ **NEW SLIDE-OUT SIDE PANELS** permit easy access for cleaning.
