## Adams AUPETTE<sup>™</sup>

The Modern Way to Dispense  
Predetermined Volumes  
Simply, Easily and Accurately

This unique device will deliver predetermined quantities of liquid—repeatedly—without resetting or remeasuring. The AUPETTE is a great time saver in routine tests or procedures wherever a given volume of liquid is to be dispensed again and again. Changing the desired volume is a simple matter of moving 2 locking nuts.

The Adams AUPETTE comes in three sizes of 10cc, 5 cc, or 1 cc capacity. The two larger sizes are calibrated in 1/5 cc; the latter, in 1/100 cc (for micro work). Each AUPETTE is accurate to  $\pm 1.5\%$  with liquids of water consistency.

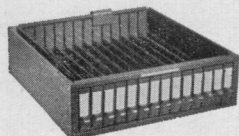

AUPETTE syringes are standard types (for easy replacement) and each of the three syringe sizes can be used interchangeably in every AUPETTE by means of nylon adapters.

AUPETTE is priced at \$22.50 (10 cc and 5 cc) and \$25.20 (1 cc) at your local supply dealer.

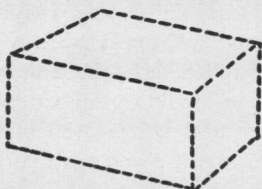

*Clay-Adams* New York 10

\*Pat. App. for

one 19" x 19" Lab-aid unit section  
holds up to 6500 1" microslides

other bulky files need this much  
more space to hold as many slides

because every inside inch is a filing inch  
a Lab-aid cabinet files 45% more

There's no waste space in a Lab-aid cabinet... no thick bulkheads, no massive tracking guides. Thanks to patented Lab-aid construction, they are built of heavy steel, strongly welded, true-tracking, beautifully finished, and... drawers are freely interchangeable, too... you can file 1" and 2" microslides, even 4" lantern slides or index cards, in the same section if need be. All are 19" x 19" square, so they stack rigidly to any height.
