## **CENTRIFUGE MODEL CL**

*for both chemical and  
analytical centrifuging*

First in its capacity range with such versatility, this new model offers you analysis or processing in a *single* centrifuge. Its base is easily adaptable for use with either the tube-carrying head — for experimental work, such as quality control analysis, or the basket head — for procedure development, such as filtration, clarification or extraction.

The Model CL Centrifuge is available in a wide variety of heads (angle or horizontal) for tube capacities up to 50ml, at various speeds and forces, for small sample analysis. Basket heads and draining chambers are available in manganese bronze, stainless steel, Monel metal, rubber-covered steel or porcelain, for resistance to whatever solutions you employ.

Other features include: guard bowls enclosing all rotating parts; speed control rheostat in base; reliable AC-DC motor. The Model CL is listed by Underwriters' Laboratories. *Send for Bulletin DS.*

# Range!

## NEW TESTS, NEW APPLICATIONS

Simple, inexpensive tests, helpful in diagnosis of coronary artery disease, can now be made with Bausch & Lomb Spectronic 20 Colorimeters. Special adaptation, extending instrument range to  $340m\mu$  in the U-V, makes assay of serum glutamic-oxalacetic *transaminase* a routine clinical procedure. (Detailed clinical method available on request.)

Many other new tests, including vitamin assays, are made possible by pinpoint selection of any wavelength in the  $340m\mu$ - $950m\mu$  range.

## SAME EASE, SPEED AND DEPENDABLE ACCURACY

*Easy As Tuning Your Radio!* Dial instantly sets Certified-Precision diffraction grating to desired wavelength; no color filters to fuss with.

*Fastest Readings!* Simply insert sample tube; instant-acting meter gives exact percent transmission, or optical density.

*Accurate Analyses!* Narrow band pass (only  $20m\mu$ ) assures highest spectral purity. 49 clinical calibrations available.

## LOW PRICE, DOUBLE VALUE

Colorimeter *plus* spectrophotometer,  $375m\mu$ - $950m\mu$  (extended range to  $340m\mu$  at slight extra cost), for less than the price of most colorimeters alone!

- ☐ Send me 11-page reprint of "Clinical Method for Assay of Serum Glutamic-Oxalacetic Transaminase" plus references and charts.
- ☐ Send me B&L Spectronic 20 Catalog D-266.
- ☐ I would like an obligation-free demonstration of the B&L Spectronic 20 Colorimeter at my convenience.

SINCE  1853

America's only complete optical source... from glass to finished product.

## RADIOCHEMICALS ?

*They're in Stock*  
 Their purity is guaranteed  
 AT  
 RESEARCH SPECIALTIES CO.

Our expanded facilities and our established reputation assure you of the best service in  $C^{14}$  and  $H^3$  labeled compounds.

Revised list of radiochemicals and current prices available upon request. Write for catalog No. 1054.

For unusual requirements, please write for quotation. State quantity and desired specific activity.

RESEARCH SPECIALTIES CO.  
 2005 Hopkins Street Berkeley, Calif.

**hot air—at temperatures  
 you can depend on**

No more worry about "hot" and "cold" spots. This Castle heavy-duty Hot Air Sterilizer has uniform temperatures throughout.

Specially placed baffle-plates and circulation fan provide temperature accuracy of  $4^{\circ}C$ . at any setting between  $38^{\circ}C$ . and  $260^{\circ}C$ . Temperature control is fully automatic.

This good uniformity and wide range help you get more precise and controlled results.

Sterilizer built entirely of stainless steel. Heavy 22 gauge. Non-corrosive, heat resistant. Won't warp or buckle. Will give you years of tough service, no matter what your load requirements are.

Double stainless steel walls lined with 2" of rock wool. Inside size: 30" x 36" x 20". Complete with 3 stainless steel shelves, heater, fan, and motor.

Don't go on depending on uneven sterilization when you can be *sure*. Phone your Castle dealer, or write for Bulletin Q-8.

## HUMAN OVULATION AND FERTILITY

by Edmond J. Farris, Ph.D., Executive Director,  
 Associate Member, The Wistar Institute of  
 Anatomy and Biology, Philadelphia

**JUST PUBLISHED!** The results—both statistical and applied—of a decade of intensive research into the problems of human infertility. Dr. Farris, originator of the rat hyperemia test, describes a highly effective new pregnancy test as well as a new formula for the calculation of the day of ovulation and the limits of the fertile period. Thorough documentation shows that the accuracy of this formula is greater than that of any other so far proposed. Sections discussing materials and methods are provided throughout the text. An important book!

159 Pages 35 Illustrations, 56 Tables 1956 \$6.50
