GRIGNARD REACTIONS OF NONMETALLIC SUBSTANCES

by M. S. KHARASCH, University of Chicago
and OTTO REINMUTH, Armour Institute of
Technology

This book presents the first attempt at coordinated theoretical treatment of Grignard reactions and represents the nearest thing to an exhaustive literature survey yet achieved. The preparations and properties of the Grignard reagents have been treated in great detail (Chaps. II-V) and the division of subject matter into chapters has been made on the basis of co-reactants, or groups of closely related co-reactants.

CHEMISTRY OF THE METAL CHELATE COMPOUNDS

by ARTHUR MARTELL, Clark University,
and MELVIN CALVIN, University of California (Berkeley)

This is the first book to be published in this highly important branch of chemistry and it presents the principles of the structure and behavior of metal chelate compounds in such a manner as to be useful in the creation of new compounds and new applications.

Outstanding features include: special emphasis on relationship of structure of the chelating agent on the stability of the metal chelate formed, the biological functions of metal chelates, the chelates as catalysts in chemical reactions.

613 pages • 6" x 9"

FUNDAMENTAL FORMULAS OF PHYSICS

Edited by DONALD H. MENZEL, Director,
Harvard College Observatory

Here is an authoritative and comprehensive presentation of the major areas of modern science. Each of the thirty-one sections has been prepared by an expert in his field. The formulas for each field have been chosen to give a representative and useful list. While sufficiently detailed for everyone but the advanced investigator of individual topics, the extensive references to journals and miscellaneous works will enable any reader to extend particular developments in question.

765 pages • 5 5/8" x 8 3/8"

TYGON *Flexible Plastic* TUBING

... is glass-clear

Tygon Tubing is not just translucent . . . it IS glass-clear, thus permitting instant visual inspection, more accurate flow control—better overall process control. Tygon is chemically inert, may be used anywhere for any liquid, gas or air transmission normally encountered in the laboratory. In addition it is extremely flexible and easy to handle, couples and uncouples quickly. Laboratory supply houses everywhere stock Tygon in all required sizes.

- NON-TOXIC
NON-CONTAMINATING
- FLEXIBLE
EASY TO HANDLE
- SEAMLESS
AND SMOOTH
- EASY TO COUPLE

Want to make light work of your heavy sterilizing loads?

Big sterilizing requirements are made easy when you have a Castle *large-capacity* rectangular Autoclave.

Sizes range from 24" x 24" x 36" to 36" x 42" x 84" inside dimensions. These big capacities take 2 to 9 times as much as the average sterilizer! Your work goes faster, easier.

And they're built to last. Steel-backed nickel-clad interiors protect against corrosion. Welded and fabricated to meet all A.S.M.E. requirements.

Standard equipment includes all parts and piping for manual operation, with Automatic Steam Pressure Regulator (range 7 to 17 p.s.i.).

For full details and other sizes, (or for Cylindrical Autoclaves) phone your Castle dealer, or write for Bulletin Q-8.

Leitz**first in precision optics****LEITZ HIGH-EYEPOINT COMPENSATING EYEPIECES**

For the microscopist who wears glasses—LEITZ NEW HIGH-EYEPOINT EYEPIECES do away with restricted field of vision associated with standard eyepieces and the wearing of spectacles. These high-eyepoint eyepieces permit the spectacle observer to see the entire field. LEITZ COMPENSATING EYEPIECES are available in two powers: 6.3x for observations under low magnification, and 10x for high magnifications; obtainable singly or in pairs for binocular tubes.

A reputation for integrity and a tradition of service have led thousands of scientific workers to bring their optical problems to Leitz. If you have problems in this field, why not let us help you with them?

See your Leitz dealer and examine these Leitz instruments soon. Write for information.
