Volume 124, Number 3234

Editorial	Society in the Scientific Revolution	1231
Articles	Why Biophysics?: <i>A. V. Hill</i>	1233
	Stokes' Edge Waves in Lake Michigan: <i>W. L. Donn</i> and <i>M. Ewing</i>	1238
	Proteins and Calcium in Serums of Estrogen-Treated Roosters: <i>O. A. Schjeide</i> and <i>M. R. Urist</i>	1242
	C. Neuberg, Biochemist: <i>F. Lipmann</i> , <i>F. F. Nord</i> , <i>H. Waelsch</i>	1244
News of Science	Statement on Hungary; NSF Employment Profile of Scientists, 1954-55; USIA University Catalog Program; Cancer Mortality Decline; Army Ioniz- ing Radiation Center; NBS Boulder Radio Propagation Engineering Division Reorganized; FWS Study of Fish Chemistry; News Briefs; Scientists in the News; Recent Deaths; Education; Grants, Fellowships, and Awards; In the Laboratories; New Journals	1245
Reports	Influence of Adult Tissue Homogenates on Formation of Similar Embryonic Proteins: <i>H. Walter</i> , <i>D. W. Allmann</i> , <i>H. R. Mahler</i>	1251
	Uronic Acid of Chondroitin Sulfate B: <i>P. Hoffman</i> , <i>A. Linker</i> , <i>K. Meyer</i> ..	1252
	Anomalous Carbon-14 Content of Carbon Dioxide from Sewer Gas: <i>R. L. Patterson, Jr.</i> , and <i>I. H. Blifford, Jr.</i>	1252
	Modified End-Window Counting Tube for Paper Chromatograms: <i>R. C. Fuller</i>	1253
Book Reviews	<i>Microscopium</i> ; <i>Flow of Gases through Porous Media</i> ; <i>Air Pollution Hand- Book</i> ; <i>Determination of Organic Compounds</i> ; <i>Computers</i> ; <i>The Image</i> ; New Books; Miscellaneous Publications	1254
Meetings and Societies	High-Polymer Chemistry; World Federation for Mental Health; Darcy Cen- tennial Symposia; Conference on Scientific Information; Meeting Notes; Society Elections; Forthcoming Events	1257
	Equipment News	1263

DETERMATUBE™

A NEW CONCEPT IN CLINICAL CHEMISTRY!

Lyophilized, single assay, reagent tubes for
determination of serum *TRANSAMINASE, URIC ACID*
and LACTIC ACID DEHYDROGENASE

ACCURATE SIMPLE LOW-PRICED

(merely add water, serum and read)

Although developed for use with a spectrophotometer, a **spectrophotometer is not necessary** for Transaminase or LDH Determinations. The tubes may be used as cuvettes in the new, low priced **COENZOMETER** (pat. pending) which measures absorption at 340 mμ. This instrument is currently being introduced by Macalaster Bicknell Company, 243 Broadway, Cambridge, Mass.

TRADE MARK
glucostat

**THE NEW, RAPID MICRO METHOD
OF GLUCOSE ANALYSIS**

REQUIRING NO DEPROTEINIZATION or HEATING

Based on the coupled enzyme system of glucose oxidase and peroxidase, the reaction is specific for glucose.

A blood glucose can be obtained in 11 minutes using 0.1 ml. serum or plasma. A photoelectric colorimeter is the only piece of special apparatus necessary. Simply add serum to reagent and read color in 10 minutes.

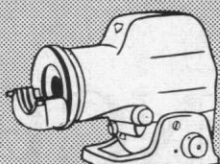

With proper precautions, the method is suitable for urine glucose determinations.

SIMPLE SPECIFIC QUANTITATIVE
