

Room 1515-S, 4 Irving Pl., New York 3.)

13-16. Human Biochemical Genetics, Ciba Foundation symp., London England. (G. E. W. Wolstenholme, Ciba Foundation, 41 Portland Pl., London, W.1.)

14-15. Operations Research Soc. of America, Washington, D.C. (H. J. Miser, Rt. 2, Box 211, Vienna, Va.)

14-16. Acoustical Soc. of America, Ottawa, Canada. (W. Waterfall, 335 E. 45 St., New York 17.)

14-17. American Acad. of Dental Medicine, 13th annual, Atlantic City, N.J. (H. A. Lentz, 619 Main Ave., Passaic, N.J.)

14-16. American Assoc. of Physical Anthropologists, Madison, Wis. (E. E. Hunt, Jr., Peabody Museum, Harvard Univ., Cambridge 38, Mass.)

17-21. American Ceramic Soc., 61st annual, Chicago, Ill. (C. S. Pearce, ACS, 4055 N. High St., Columbus 14, Ohio.)

17-21. Institute of Food Technologists, 19th annual, Philadelphia, Pa. (C. S. Lawrence, IFT, 176 W. Adams St., Chicago 3, Ill.)

17-23. Antibiotics, intern. symp., Prague, Czechoslovakia. (M. Heřmanský, Antibiotics Research Inst., Roztoky near Prague, Czechoslovakia.)

17-23. Mass Spectrometry, 7th, Los Angeles, Calif. (A. G. Sharkey, Jr., U.S. Bureau of Mines, 4800 Forbes Ave., Pittsburgh 13, Pa.)

18-20. Instrumentation Methods of Analysis, 5th natl. symp., Houston, Tex. (H. S. Kindler, Director of Technical and

Educational Services, ISA, 313 Sixth Ave., Pittsburgh 22, Pa.)

19-23. American Assoc. of Mental Deficiency, Milwaukee, Wis. (N. A. Dayton, Mansfield State Training School & Hospital, Mansfield Depot, Conn.)

20-22. Education of the Scientist in a Free Society, conf., Milwaukee, Wis. (A. B. Drought, College of Engineering, Marquette Univ., 1515 W. Wisconsin Ave., Milwaukee 3.)

21-23. American Assoc. for the History of Medicine, 32nd annual, Cleveland, Ohio. (Miss E. H. Thomson, Yale Univ. School of Medicine, New Haven, Conn.)

21-27. Veterinary Cong., 16th intern., Madrid, Spain. (J. Jensen, General Secretary of Permanent Committee, Belstraat 168, Utrecht, Netherlands; or W. A. Hagan, Dean, Cornell Univ., New York State Veterinary College, Ithaca, N.Y.)

24-29. National Tuberculosis Assoc., Chicago, Ill. (Mrs. W. B. White, 1790 Broadway, New York 19.)

24-29. Social Welfare, natl. conf. and annual forum, San Francisco, Calif. (National Conference on Social Welfare, 22 W. Gay St., Columbus 15, Ohio.)

25-27. American Gynecological Soc., Hot Springs, Va. (A. A. Marchetti, 3800 Reservoir Rd., NW, Washington 7.)

25-27. American Soc. for Quality Control, Cleveland, Ohio. (L. S. Eichelberger, A. O. Smith Corp., Milwaukee, Wis.)

25-27. Chemical Inst. of Canada, 42nd annual conf., Halifax, Nova Scotia.

(Chemical Inst. of Canada, 18 Rideau St., Ottawa, Ontario, Canada.)

25-27. Telemetering, natl. conf., Denver, Colo. (R. Schmidt, AVCO Mfg. Co., 201 Lowell St., Wilmington, Mass.)

25-28. Smoking and Lung Cancer, and Pulmonary Emphysema, symps., American Trudeau Soc., Chicago, Ill. (H. W. Harris, Medical Sessions Committee, ATS, 1790 Broadway, New York 19.)

25-29. American College of Cardiology, 8th annual, Philadelphia, Pa. (P. Reichert, ACC, Empire State Bldg., New York 1.)

25-29. Transistors and Associated Semiconductor Devices, intern. conv., London, England. (Institution of Electrical Engineers, Savoy Pl., London, W.C.2.)

25-31. Electroheat, 4th intern. cong., Stresa, Italy. (International Union for Electroheat, 14, rue de Stäel, Paris 15^e.)

28-30. American Ophthalmological Soc., Hot Springs, Va. (M. C. Wheeler, 30 W. 59 St., New York 19.)

29-30. International Assoc. for Bronchology, 9th cong., Madrid, Spain. (J. Abello, IAB, Lagascar 13, Spain.)

30-5. Applications of Atomic Energy to the Petroleum Industry, symp., 5th World Petroleum Congress, New York, N.Y. (C. E. Davis, General Secretary, 5th World Petroleum Congress, 527 Madison Ave., New York 22.)

31-3. Special Libraries Assoc., 50th annual conv., Atlantic City, N.J. (Miss M. E. Lucius, 31 E. 10 St., New York 3.)

MICROMANIPULATOR "CAILLOUX"

Unmatched flexibility of movements in all directions in space are achieved by natural hand movements under magnifications of 100 X to 2000 X without adjustment. The "Caillox" advanced design combines maximum speed, precise response and stability with unusual ease of operation. Back-lash, parasitic vibrations and lag are eliminated. Prolonged manipulations can be conducted without fatigue. Includes many additional exclusive features.

LOW IN PRICE

424 N. HOMAN AVE., CHICAGO 24, ILL.

Equipment

The information reported here is obtained from manufacturers and from other sources considered to be reliable, and it reflects the claims of the manufacturer or other source. Neither Science nor the writer assumes responsibility for the accuracy of the information. A coupon for use in making inquiries concerning the items listed appears on page 798.

■ **METERING PUMPS** handle flows from 0.65 to 13.10 gal/hr at a maximum pressure of 1000 lb/in². A screw adjustment on a driving crank adjusts the stroke while the pump is stopped. Accuracy is ± 1 percent when the pump is operated between 10 and 100 percent of stroke length. Parts in contact with corrosive liquids may be machined of Hastalloy alloys. (American Meter Company, Dept. 674)

■ **SIEVE SHAKER** combines horizontal and vertical motions at vibration rates adjustable from 500 to 900 per minute. Sieves up to 16 in. in diameter can be accommodated in stacks up to 18 in. high. (Fisher Scientific Co., Dept. 690)

■ **EMERGENCY POWER SUPPLY** furnishes 110 v, 60 cy/sec, single-phase power up to 200 w continuously for 8 hr. The unit is portable and can be recharged with a-c or d-c current. (Francis Bros., Dept. 697)

■ **DIGITAL VOLTMETER** adds a fifth digit to the manufacturer's previous four-digit model. The instrument thus achieves accuracy of ± 0.01 percent ± 1 digit in four automatic ranges from 0.0001 to 1000.0 v d-c without loss of accuracy in the transition between ranges. (Kintel Division, Cohu Electronics, Dept. 698)

■ **REFRIGERATED BLOWER** is designed to fit into and become part of a standard 19-in. rack. The device has capacity of 6000 Btu and can be preset to control in the range 60° to 100°F. Insulated cabinets are available in standard depths for mounting electronic equipment panels above the blower. Ducts can be supplied to direct cooled air to specific points. (Western Devices, Inc., Dept. 699)

■ **PRESSURE CUTOFF** simultaneously connects or cuts off 30 separate pressure lines. The device is designed to connect wind-tunnel pressures to measuring devices and then trap the pressure within the measuring unit at the desired time. The unit operates on 48 v d-c on a pulse of 0.25 sec or longer duration. Pressures to 125 lb/in² are accommodated. (Datex Corporation, Dept. 703)

■ **MATRIX STICK MICROMETER** comprises a micrometer head reading in 0.001-in. increments, a 1-in. spherical endpiece and additional pieces ranging in length from 1 to 24 in. Sets range from 3-in.-

ANOTHER NEW ROSTER OF OPPORTUNITIES APLENTY AT BURROUGHS

Again we are stepping up our aggressive research and development programs. These have already made us a \$300-million-a-year force in *advanced electronic and electro-mechanical information processing* for both commerce and defense. Here are just a few of the many exceptional career opportunities open right now for exceptional men:

CALIFORNIA at our ElectroData Division in Pasadena

Electronic Engineers with experience in areas such as logical design, computer components, circuit design, electronic packaging, sub-miniaturization, manufacturing costs and processes.

Electronic Data Processing Specialists with experience in areas such as applied programming, applied mathematics and technical sales consultation, etc. Positions available throughout the country.

For Details, write to the district office nearest you or Mr. C. J. Blades, Manager, Professional Employment, Dept. 510A, Burroughs Corporation ElectroData Division, 460 Sierra Madre Villa, Pasadena, California.

PENNSYLVANIA at our Research Center near Philadelphia

Systems Engineers with specific experience in systems analysis and design of digital data processors. Should be trained in engineering, physics or mathematics. Graduate training desirable.

Mathematicians, computer-oriented, with particular experience in problem formulation, numerical analysis, and applied mathematics—in connection with formulation and design of computational procedures. Procedures involved in problems of guidance and air defense, trajectory calculations, logical design, sampled data systems, circuit analysis and more. Advanced degree in mathematics preferred.

For Details, write Mr. James Gilroy, Professional Placement Coordinator, Dept. 510B, Burroughs Corporation Research Center, Paoli, Pennsylvania.

PENNSYLVANIA at our Military Field Service Division in Phila.

Site Engineers for direct supervision of a field team of electronic technicians engaged in the installation and maintenance of data processing equipment. Requires minimum of 5 yrs. applied electronic experience at supervisory level.

Instructors to train technical personnel in the installation, maintenance and repair of electronic and/or electro-mechanical equipment. Requires knowledge of theory as well as its practical application.

For Details write Mr. A. J. Bellace, Employment Supervisor, Burroughs Corporation Military Field Service Division, Dept. 510C, Burroughs Drive, Radnor, Pennsylvania.

MICHIGAN at our Burroughs Division in the Detroit Area

Experienced Electronic, electrical and mechanical engineers to work in many areas of research, development and design for information processing equipment applicable to commercial and military use.

For Details, write Mr. A. L. Suzio, Administrator, Corporate Placement Services, Dept 510, Burroughs Corporation, Detroit 32, Michigan.

Burroughs Corporation

"NEW DIMENSIONS" / IN ELECTRONICS AND DATA PROCESSING SYSTEMS

SCIENTISTS and ENGINEERS

Dynamic new subsidiary of **Ford Motor Company** is now in initial stages of expanding military and commercial programs.

Positions are at ASI's interim Glendale facility and will also be at ASI's new Research Center now under construction at Newport Beach in Southern California. Work in an intellectual environment as stimulating as the locations are ideal—close to most of So. California's cultural, educational, and recreational centers.

Outstanding growth opportunities for qualified engineers and scientists are open in following fields:

OFFICE OF ADVANCED RESEARCH THEORETICAL RESEARCH—Hydrodynamic and radiation processes in tenuous gases at very high temperatures, ionization produced by soft X-radiation, hydrodynamics of solids at high pressures including studies of equations of state, infrared properties of the atmosphere and of hot gases, conversion of chemical energy into sound and the condensation rate of supersaturated vapors. Theoretical physicists are needed to work in these fields. Specific experience is not necessary. However, a general background in theoretical and mathematical physics is required.

You are invited to address inquiries to M. H. Johnson, Advanced Research Staff at our Glendale, California address.

Other unusual opportunities are open for qualified engineers and scientists in the following areas:

SPACE TECHNOLOGY DIVISION

- Combustion
- Materials
- Aerochemistry & Propulsion

COMPUTER DIVISION

- Input-Output Equipment
- Storage Units
- Display Devices

TACTICAL WEAPON SYSTEMS DIVISION

- Aerodynamics
- Electro-optics
- Guidance and control

Qualified applicants for the above three divisions are invited to send resumes and inquiries to Mr. K. A. Dunn, 1234 Air Way, Bldg. 16, Glendale, California. Phone CHapman 5-6651.

AERONUTRONIC SYSTEMS, INC.

a subsidiary of
FORD MOTOR COMPANY
NEWPORT BEACH, GLENDALE,
SANTA ANA AND MAYWOOD, CALIF.

to-2-ft capacity to 6-in.-to-40-ft capacity. Anvils are tipped with stellite. Swiveling screw joints permit faces to meet squarely. A cover tube on each section provides insulation against temperature changes. (Engis Equipment Co., Dept. 701)

■ **ANGLE TRANSDUCER** detects angular changes within 0.25 sec of arc. The output signal of the transducer is suitable for feeding into a servomechanism to correct the change or may be used to actuate a chart recorder. (Keuffel & Esser Co., Dept. 700)

■ **BORON ANALYZER** operates by detecting B^{10} . The neutron-absorption principle is used. Neutrons are produced by a radium-beryllium wafer and are slowed to thermal velocities by paraffin. The liquid stream to be analyzed passes between the neutron source and a counter tube. Boron concentration is a function of the time required for a preset count to be recorded. Accuracy is ± 1 percent by volume. (Mine Safety Appliance Co., Dept. 702)

■ **ULTRACENTRIFUGE ATTACHMENT** permits separation, identification, and characterization of materials at temperatures as high as 120° or as low as 0°C . The attachment consists of a radiation shield and heating element mounted in the rotor chamber, heat-reflecting baffles, and a temperature-indicating and control unit. Rotor temperature can be controlled to within $\pm 0.1^\circ\text{C}$. The auxiliary can be added to the manufacturer's model E ultracentrifuge without structural changes. (Beckman/Spinco Division, Dept. 704)

■ **pH ELECTRODE ASSEMBLY** is designed for use with samples ranging in size from one drop upward. The reference and measuring electrodes can together be inserted into an opening 0.7 mm in diameter. The flexible electrode support permits the user to squeeze the electrodes together to accommodate a single-drop sample, for example, in the tip of a centrifuge tube. The measuring electrode is self-shielded. Range is 1 to 11.5 pH units with sample temperature range 15° to 40°C . (Leeds and Northrup Co., Dept. 705)

■ **MILLIAMETER** for d-c measurements employs a pen-sized probe that can be clipped around a wire without interrupting the circuit. Measurement ranges from 3 ma to 1 amp are covered in six steps. Accuracy is ± 3 percent ± 0.1 ma. Direct currents are measured in the presence of alternating current. (Hewlett-Packard Co., Dept. 710)

JOSHUA STERN

National Bureau of Standards,
Washington, D.C.

NEW OPPORTUNITIES IN RESEARCH . . .

Expanding pharmaceutical company initiating a broadened and accelerated research program offers excellent opportunities in basic research for:

Senior Research Pharmacologist—Ph.D. with training or interest in cardiovascular research to supervise acute and chronic cardiovascular screening programs and study potential cardiovascular compounds including in vitro and in vivo testing.

Senior Research Pharmacologist—Ph.D. with general pharmacology training and experience to direct screening program, plan and develop specialized pharmacologic experiments and new testing methods.

Parasitologist—B.S. or M.S. with training and/or experience in parasitology and good background in parasitic protozoology and helminthology to assist in problems concerning development of compounds in both human and veterinary field.

Virology—M.S. with virology or tissue culture training or B.S. with several years virology, immunology or tissue culture experience to assist in problems concerning human and animal virus infection and immunology.

Bacteriologist—B.S. bacteriology training essential to perform in vitro screening procedures with chemotherapeutic agents.

Senior Research Biochemist—Ph.D. with strong organic chemistry background to study bio-chemical transformation of drugs, especially their fate in animal metabolism.

Biochemist—B.S. with chemistry major, biology minor, to assist in biochemical investigations relating to drug mode of action. Work involves small animal experimentation and analytical biochemistry.

. . . AND MEDICAL WRITING, ABSTRACTING: SCIENTIFIC INFORMATION

Senior Medical Editor—B.S. or advanced degree graduate with training in basic medical sciences and experience in editing, abstracting and writing to edit technical manuscripts for publication and write material for manuscripts and brochures.

Senior Information Scientist—Ph.D. with training in one or more Biological Sciences to screen and abstract unpublished scientific information, to develop and utilize coding processes in correlation of research data and to conduct liaison among Scientific Staff.

Translator-Scanner—B.S. with advanced biology, chemistry, medical sciences training and knowledge of several languages to scan current medical and other scientific periodicals and translate scientific information.

Company is located in small, progressive community in semi-rural area of central New York State. Modern laboratories, complete benefit program.

We will welcome your writing to us. Please forward résumé to:

Engineers – Scientists
Required for many aspects
of General Electric's
Aircraft Nuclear Propulsion
Program...

**APPLIED
RESEARCH &
DEVELOPMENT
AT THE PhD
LEVEL
ON AN INTER-
DISCIPLINARY
BASIS**

Opportunities now exist for a number of scientists and engineers with imaginative minds and established reputations to contribute to extremely sophisticated nuclear propulsion systems, where theoretical advances must be wedded to new standards of reliability and performance.

Qualified engineers and scientists are invited to inquire about these opportunities to pursue original work in a pioneering area with General Electric.

Write in confidence, including salary requirements, to:
Mr. G. W. Travers, Div. 74-WK

AIRCRAFT NUCLEAR PROPULSION DEPT.

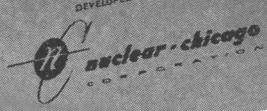

GENERAL  ELECTRIC

P.O. Box 132 Cincinnati 15, Ohio

	Metallurgy	Advise Materials Testing Laboratory on materials problems and techniques. Direct experimental, physical, mechanical and electrical tests. Analyze data.
	Physics or Nuclear Engineering	Carry out reactor analysis and nuclear design of power plants, including formulation of nuclear design specifications and test requirements.
	Ceramics, Physical Chemistry or Ceramic Engineering	Supervise applied ceramic research including fabrication processes, testing of ceramic bodies; development of novel ceramic materials.
	Physics	Conduct theoretical investigations of effect of neutrons and photons on matter.
	Mathematics, Electrical Engineering	Engineering analysis of physical systems in electro-mechanical areas, deriving equations associated with systems study. Develop generalized digital program for parametric study of these systems.
	Mathematics	Apply advanced mathematical procedures and approaches in resolving complex problems in areas of reactor analysis.
	Physics or Nuclear Engineering	Advanced Reactor Analysis. Plan objectives of experimental reactor investigations, which adequately combine potentialities of experimental techniques and improvement of theoretical methods.
	Physical Metallurgy or Mechanical Engineering	Undertake responsibility for studies regarding various materials used in moderator materials development.
	Nuclear Engineering	Plan, design and analyze specific nuclear shield tests — part of broad nuclear shield design program.
	Physics	Participate in shield physics experiments, to provide fundamental data for shield design.

A number of additional positions in areas described above are also available to candidates with a Master's Degree.

TECHNICAL BULLETIN NO. 3

How to Use the Radioisotopic Derivative Method in Quantitative Analysis

TECHNICAL BULLETIN NO. 2

How to Use Radioisotopic Analysis for Mixing Evaluation

TECHNICAL BULLETIN NO. 1

How to Use Radioisotopic Yield Determination in Quantitative Analysis

Application: Radioisotopic yield determination is of particular utility in solving tough analytical problems in which quantitative separation of the desired material ("A") is difficult, time-consuming, or impossible because of certain interfering materials in the sample. In removing these interfering materials, an unknown and variable amount of the sought compound may be lost. Radioisotopic yield determination tells how much of the sought compound was lost in purification, and thus provides a correction factor which is the missing link in the analysis. Yield determination by the use of radioisotopes is simple, inexpensive, and precise. It can be used for any analysis in which a radioactive constituent is available. Since hundreds of radioactive compounds and elements are readily available from commercial suppliers,

Principle: Tag one of the components of a mixture with a radioactive compound, then measure the radioactivity.

these bulletins
on the analytical use of
radioisotopes are
yours for the asking

For more than 12 years,
Nuclear-Chicago has been the
foremost manufacturer of
instruments for measuring and
recording radioactivity.

In the past few months Nuclear-Chicago has distributed thousands of copies of these Technical Bulletins describing the analytical use of radioisotopes. If you have not received them, just check and mail the coupon. New Technical Bulletins are now being prepared and will be issued periodically. If you will check the coupon accordingly we'll be glad to see that the new Bulletins will be sent you regularly as published.
