## Meetings

### **Forestry**

"Forestry and People" is the theme of the 59th meeting of the Society of American Foresters, to be held in San Francisco, Calif., 15-18 November. Headquarters will be the Sheraton-Palace Hotel.

George A. Garratt, president of the society and dean of the Yale University School of Forestry, will open the general session on 16 November. He has announced that all foresters and friends of forestry will be welcome, whether members of the professional society or not.

Nine technical sessions have been scheduled. They will include 60 papers on the subjects of forest management, silviculture, forest products, forestry education, forest recreation, wildlife management, range management, watershed management, and forest economics and policy.

The society expects an attendance of some 1500 members and guests. This meeting holds special interest because of the extraordinary pressures on forest lands created by the rapidly expanding population in the West.

John Callaghan, assistant secretary-manager of the California Forest Protective Association, is general chairman of the meeting, and R. Keith Arnold, director of the Pacific Southwest Forest Experiment Station at Berkeley, Calif., is program chairman. B. H. Payne of the U.S. Forest Service, San Francisco, is the chairman of the arrangements committee. For information write to the society headquarters, Mills Bldg., Washington 6, D.C.

### **Machine Searching**

An International Conference for Standards on a Common Language for Machine Searching and Translation, sponsored by Western Reserve University and the Rand Development Corporation of Cleveland, Ohio, will be held 6-12 September at the Tudor Arms Hotel in Cleveland. International interest has been demonstrated by the submission of 52 papers from ten countries for presentation at the conference. Senator Hubert H. Humphrey of Minnesota will deliver the keynote address at a dinner on 9 September.

### **Goiter Conference Travel Funds**

The fourth International Goiter Conference will be held 5-9 July 1960 in London, England, under the auspices of the London Thyroid Club and the American Goiter Association. The American

Goiter Association plans to make available to worthy candidates a limited number of travel grants to enable them to participate in this meeting. Application blanks are available from Dr. John C. McClintock, 149 1/2 Washington Ave., Albany 10, N.Y. Applications will be received until 1 January 1960.

# ONE SOURCE

for all your tissue  
culture apparatus

**KONTES**—manufactures high quality tissue culture products—designed to meet the requirements of leading tissue culture workers. Tissue Grinders, pipettes, special apparatus and a complete line of flasks—among them:

## 1. KONTES T-SERIES FLASKS

Dam in neck prevents fluid overflow. Pointed end permits fluid removal with minimal cell loss. Available in 4 sizes.

## 2. KONTES INVERTED NECK T-SERIES FLASKS

Similar to regular Kontes T-Series Flasks, except for inverted neck and flat end. Entire floor area can be probed and scraped. 4 sizes.

## 3. KONTES CARREL FLASKS\*

High quality windows permit optical observation with minimum distortion.

## 4. KONTES LEIGHTON TUBE

Cylindrical wall above closed end flattened to form a rectangular plane surface 34 mm. long and 13 mm. wide. This permits preparation of a sponge matrix culture and a 22 x 11 mm. "flying cover-slip" culture simultaneously in the same tube.

\*Carrel Flask with optically ground and polished windows also available.

WITH CAMERA II

WITH CINETUBE

PHASE CONTRAST EQUIPMENT

# WILD\* M20 MICROSCOPE

...available with sextuple revolving nosepiece if desired, 20-Watt built-in illumination, superior Swiss quality in craftsmanship and optics.

...with Camera II, permits continuous binocular observation. Phototube deflects 25% of light to binocular tube. Special format indicating eyepiece provides rapid, perfect focusing.

...with Wild Cinetube, using any 16mm movie camera having 50mm or 75mm focal lengths, permits critical focusing on specimen while exposing film. Two built-in beam splitters and photoelectric cell for exposure determination (with galvanometer). Internal projection tube for titling.

...with Phase Contrast, Incident Light, Varicolor and other equipment.

**UNMATCHED VERSATILITY, PRECISION AND UTILITY FOR RESEARCH AND SCIENTIFIC EXPLORATION.**
