**PROVEN ANSWER
TO TOUGH SEPARATION
PROBLEMS**

*Beckman/Spinco CP
Curtain Electrophoresis*

Results from research laboratories prove you can make even the most difficult separations with the Continuous-Flow Model CP.

More than 200 CP instruments are now being used for such varied and significant separations as

unknown antibiotics from a mixture; electrophoretically pure globulins; radioactive cystine; enzymes in connection with heart and cancer research; tryptic digests of papain; purification of catalase and various plant materials; amino acids; mucosal proteins; further fractionation of alpha-2 globulins; proteins of vitreous humor; serum proteins; hydrolysates.

These are actual—not theoretical—applications from the laboratories of CP users.

With Spinco's experience in continuous flow curtain electrophoresis, you would expect something new. And there is. Not a new CP, but one with major design modifications which makes it a far more serviceable, versatile instrument.

If you face the problem of preparing pure fractions in volume, investigate the improved CP now. Please write to Spinco Division, Beckman Instruments, Inc., Stanford Industrial Park, Palo Alto, California. Ask for folder CP 5.

Only NEW BAUSCH & LOMB STEREOMICROSCOPES

give you

STEREO

ZOOM

CONTINUOUSLY
VARIABLE POWER

Here's a completely new optical concept to speed and simplify work requiring 3D views. Just turn the magnification knob and watch the crisp stereo image zoom to the *exact* size you need. Not just a few fixed powers, but *any* power within the wide stereo range. The newest step forward to faster, easier 3D work . . . exclusive with Bausch & Lomb.

Featuring Exclusive POWER POD Design Concept

- Sealed to prevent dust and foreign matter from entering optical system!
- No nosepiece!
- No individual objectives . . . no objectives to change!
- No image jump!
- No image blackout!

Featuring NEW LOW PRICE

. . . about one-third lower than previous line!

BAUSCH & LOMB OPTICAL CO.
75945 St. Paul Street, Rochester 2, N. Y.

- ☐ Send me new B&L Stereomicroscope Catalog D-15.
☐ Schedule a demonstration at my convenience.

MAIL COUPON NOW!

NEW UNITRON stereo microscopesas low as \$110

Both models offer ... sharp clear erect image • large depth of focus • wide field • long working distance • interpupillary and diopter adjustments • rack and pinion focusing • coated optics

MSL — a precision, budget priced instrument. Vertical binocular body. Choice of single magnification from 5X to 45X. Extra eyepieces for additional powers. \$19.50 per pair. **\$110**

MSHL — a versatile general purpose instrument with a wide range of magnifications. Inclined binocular body, revolving nosepiece for rapid interchange of objectives. Model MSHL-1 with objectives: 1X, 2X, 3X; eyepieces: 8X, 12X, 15X; magnification range: 8X-45X. Other magnification ranges available. **\$267**

AVAILABLE FOR FREE 10-DAY TRIAL... WRITE FOR FREE CATALOG 00-0

ACCESSORY STAND — For use with binocular head and focusing mechanism of either Model MSL or MSHL. Price (stand only), \$75.

EASTERN CENTRIFUGAL JOB-RATED PUMPS

Original equipment manufacturers have chosen the Eastern D-11 Centrifugal Pump for 24,897 successful installations. With eighteen pounds of compact design (9 3/4" x 4 5/8"), this close-coupled, single-stage centrifugal pump with induction type motor provides an ideal job rating for many installations.

The D-11 and other Eastern Centrifugal Pumps are available in 18-8 Type 303 and Type 316 Stainless Steel, Monel, Hastelloy "C", Cast Iron and Bronze. They range from 1/8th to 3/4 H.P. with capacities up to 70 G.P.M., pressures to 65 P.S.I.

the
CRITICAL COMPONENT

in

AEL instruments
for
biological
and
medical research!

HALF THE SOLUTION IS KNOWING THE PROBLEM . . .

Our many years of experience in the engineering and manufacture of Electro-Medical Equipment such as:

Expanded Sweep Generators • Stimulators & Accessories • Precision Flame Spectrophotometers • A.C. & D.C. Amplifiers • Dual Regulated Power Supplies • Dual Beam Oscilloscopes • Audio Amplifiers • Electronic Batteries • Battery Floaters • Oximeters • Phonocatheters.

. . . plus our close association to your field allows us to build into AEL equipment that extra measure of sureness and knowledge that represents the "CRITICAL COMPONENT" upon which you must ultimately rely.

min' imum "clean- up"

High intensity, low "clean-up" rate and minimum spectral line width are among the benefits of using the Raytheon KV series, 100-watt microwave power generators to excite electrodeless discharge lamps. These fully-engineered, 2,450 Mc sources provide stable power output; 8% ripple on standard models can be reduced to less than 1%, if desirable. For complete information, please use coupon below.

A NEW USSR ACADEMY OF SCIENCES JOURNAL

ОПТИКА И СПЕКТРОСКОПИЯ

now available in translation as

OPTICS AND SPECTROSCOPY

beginning with January 1959 issue at new low rates

Publishing results of experimental and theoretical investigations by leading Soviet Scientists. Articles in all branches of optics and spectroscopy, including X-ray, ultraviolet, visible, infrared and microwave, thin layer optics, filters, detectors, diffraction gratings, electro-luminescence, thermal radiation backgrounds, infrared polarizers and many applications to other branches of science and to industry.

Translated and published by the OPTICAL SOCIETY OF AMERICA, this branch of Soviet Science is now made available to all interested individuals and organizations *along with the Journal of the Optical Society of America at the rate of a single journal alone.* This was made possible by a grant-in-aid from the NATIONAL SCIENCE FOUNDATION to the OPTICAL SOCIETY OF AMERICA. Comments on the Soviet articles will appear in the Letters to the Editor column of the Journal of the Optical Society of America.

	U.S. & Canada (both journals)	Elsewhere (both journals)
Associate membership dues Optical Society of America	\$13.00	\$13.00
Non-member subscription	\$25.00	\$28.00

International 1919 Centrifuge

1959 International Model UV
Centrifuge
Will No. 8042N . . . \$759.00

scientific progress thru
progressive laboratory supply

LOOK WHAT'S HAPPENED TO CENTRIFUGES...from Will

Compare the slow cumbersome machine that Will first offered four decades ago with this *new Universal Centrifuge*. Years ago you could get by with old-fashioned models; but for today's separations—and those of tomorrow—you need one better—*far better*.

Whether it's this latest centrifuge or any other new apparatus . . . *you can get it from Will!*

The Universal has ALL the features YOU've asked for:

Handles practically any type of separation—over 80 different accessory combinations, including all heads now used on Size 1, 2 or Model U Centrifuges (except No. 250).

Runs cooler for processing heat-sensitive materials—and at speeds up to 5600 rpm (21,600 with multi-speed attachment)!

Easy-to-clean stainless steel guard bowl—and accessories store right in the cabinet!

Unitized control panel with electric tachometer and new electric brake.

*Take another look . . . at your centrifuge—
and contact your nearest Will Supply & Service Center.
Ask the Will man to show you the
better way to centrifuge—the new Universal way.*
