

## Forthcoming Events

### April

27-30. American Meteorological Soc., general meeting with American Geophysical Union, Washington, D.C. (K. C. Spengler, AMS, 45 Beacon St., Boston 8, Mass.)

28-30. American Assoc. of Pathologists and Bacteriologists, Memphis, Tenn. (R. L. Holman, Dept. of Pathology, Louisiana State Univ., School of Medicine, New Orleans)

28-30. American Soc. of Human Genetics, Memphis, Tenn. (W. J. Schull, Dept. of Human Genetics, Univ. of Michigan, 1133 E. Catherine St., Ann Arbor)

28-30. Current Concepts in Medicine, 2nd intern. symp., Philadelphia, Pa. (M. J. Schwartz, Deborah Hospital, 901 Walnut St., Philadelphia 7)

28-30. Midwestern Psychological Assoc., Columbus, Ohio. (I. E. Farber, Dept. of Psychology, State Univ. of Iowa, Iowa City)

29. Parenteral Drug Assoc., Philadelphia, Pa. (H. E. Boyden, PDA, 4865 Stenton Ave., Philadelphia 44)

29-30. Thermonuclear Processes, conv., London, England. (Institution of Electrical Engineers, Savoy Pl., London, W.C.2)

30. Idaho Acad. of Science, annual, Pocatello. (A. E. Taylor, Graduate Div., Idaho State College, Pocatello)

30-2. Society for American Archaeology, Salt Lake City, Utah. (D. A. Baerreis, Sterling Hall, Univ. of Wisconsin, Madison 6)

### May

1-2. American Soc. for Clinical Investigation, Atlantic City, N.J. (S. J. Farber, New York University College of Medicine, 550 First Ave., New York 16)

1-5. American Assoc. of Cereal Chemists, Chicago, Ill. (J. W. Pence, Western Utilization Research and Development Div., 800 Buchanan St., Albany 10, N.Y.)

1-5. Electrochemical Soc., Chicago, Ill. (H. B. Linford, ES, 1860 Broadway, New York 23)

1-5. Society of American Bacteriologists, 60th annual, Philadelphia, Pa. (D. M. Cleary, Box 354, Upper Darby, Pa.)

1-5. AAAS Southwestern and Rocky Mountain Div., Alpine, Tex. (M. G. Anderson, New Mexico College of Agriculture and Mechanical Arts, P.O. Box 97, University Park)

2. American Federation for Clinical Research, Atlantic City, N.J. (J. E. Bryan, 250 W. 57 St., New York 19)

2-3. Reactions between Complex Nuclei, 2nd conf., Gatlinburg, Tenn. (R. S. Livingston, Oak Ridge Natl. Laboratory, Oak Ridge, Tenn.)

2-4. Aeronautical Electronics, conf., Dayton, Ohio. (L. G. Cumming, IRE, 1 E. 79 St., New York 21)

2-5. Flight Test Symp., natl., San Diego, Calif. (H. S. Kindler, Instrument Soc. of America, 313 Sixth Ave., Pittsburgh 22, Pa.)

2-11. International Cancer Cytology conf., Mexico, D.F., Mexico. (Office of Intern. Conferences, Department of State, Washington 25)

2-11. Pan American Medical Assoc.,

cong., Mexico City, Mexico. (J. J. Eller, 745 Fifth Ave., New York 22)

3-4. Association of American Physicians, Atlantic City, N.J. (P. B. Beeson, Yale Univ. School of Medicine, New Haven 11, Conn.)

3-4. Conference of Veterinarians, annual, Philadelphia, Pa. (W. H. Rhodes, School of Veterinary Medicine, Univ. of Pennsylvania, Philadelphia 4)

3-5. Society of Pediatric Research, Swampscott, Mass. (C. D. West, Children's Hospital, Cincinnati 29, Ohio)

3-6. Fuel Element Fabrication, symp., Vienna, Austria. (Intern. Atomic Energy Agency, 11 Kärntner Ring, Vienna)

5-6. American Pediatric Soc., annual, Swampscott, Mass. (A. C. McGuinness, 2800 Quebec St., NW, Washington 8)

5-8. Wilson Ornithological Soc., Gatlinburg, Tenn. (A. M. Bagg, Farm St., Dover, Mass.)

6-7. Minnesota Acad. of Science, St. Cloud. (J. P. Emanuel, Winona State College, Winona, Minn.)

6-7. North Carolina Acad. of Science, Greensboro. (J. A. Yarbrough, Meredith College, Raleigh, N.C.)

6-7. North Dakota Acad. of Science, annual, Fargo. (B. G. Gustafson, Box 573, University Station, Grand Forks, N.D.)

6-7. Population Assoc. of America, annual, Washington, D.C. (K. B. Mayer, Dept. of Sociology and Anthropology, Brown Univ., Providence 12, R.I.)

6-7. South Dakota Acad. of Science, 45th annual, Brookings. (J. M. Winter, Dept. of Botany, Univ. of South Dakota, Vermillion)

6-8. International Cong. of Phlebology, 1st, Chambéry, France. (J. Marmasse, 3, rue de la République, Orléans (Loiret), France)

(See issue of 18 March for comprehensive list)

## Easily the safest, most practical lab ware

- **Unbreakable NALGENE** is light and easy-to-handle... never slippery even when wet. Prevents accidents.
- **Chemically-resistant NALGENE** delivers long-lasting, dependable service.
- **Economical NALGENE** saves money right at the start with its low initial cost.

For a FREE Nalgene funnel  
and our Catalog H-459,  
write Dept. 153

**THE NALGE CO. INC.** ROCHESTER 2, NEW YORK

## GRASSLANDS

Editor: Howard B. Sprague 1959

6" x 9", 424 pp., 37 illus., index, cloth.  
Price \$9.00, AAAS members' cash orders \$8.00. AAAS Symposium Volume No. 53.

This volume is intended as a review of knowledge on many aspects of grasslands resources. The 44 authors were selected by their own professional colleagues as being particularly competent to present the respective subjects. Thirty-seven papers are arranged under these chapter headings:

1. Sciences in Support of Grassland Research
2. Forage Production in Temperate Humid Regions
3. Engineering Aspects of Grassland Agriculture
4. Forage Utilization and Related Animal Nutrition Problems
5. Evaluation of the Nutritive Significance of Forages
6. Grassland Climatology
7. Ecology of Grasslands
8. Range Management

British Agents: Bailey Bros. & Swinfen, Ltd.,  
Hyde House, W. Central Street,  
London, W.C.1

AAAS, 1515 Mass. Ave., NW,  
Washington 5, D.C.

## New Products

*The information reported here is obtained from manufacturers and from other sources considered to be reliable. Neither Science nor the writer assumes responsibility for the accuracy of the information. All inquiries concerning items listed should be addressed to the manufacturer. Include the department number in your inquiry.*

■ **TELEMETERING SYSTEM** for transmitting on-off information from remote stations to a central location uses existing telephone lines. Audio tones in the range from 200 to 450 cy/sec are used with adjacent tones spaced 10 cy/sec apart. Interference with normal telephone use is prevented by filters installed at each telephone. These block signal-tone frequencies, but pass voice and ringing frequencies. The equipment is transistorized. Modulators operate on 6 to 8 volts d-c power and demodulators, one for each 10 modulators, operate on 115 volts a-c. Ambient operating temperature range is 10° to 50°C. (Duplex Div., Bell & Gossett Co., Dept. Sci462, Morton Grove, Ill.)

■ **RESISTANCE-RATIO INSTRUMENTS** are available in three-, four-, and six-dial models. The six-dial model permits comparison of resistors with a standard up to ratios of 10 to 1 with ratio limit of error of  $\pm 0.01$  percent. Resistance between external terminals is a constant 2,111,110 ohms for all settings. Potential contact may be set at any point to the nearest 0.001 ohm. Ratio range of the 4-dial model is 0.994445 to 1.005555 in steps of 0.000001, and of the 3-dial model, 0.99445 to 1.00555 in steps of 0.00001. (Minneapolis-Honeywell Regulator Co., Rubicon Instrument Div., Dept. Sci463, Ridge Ave. at 35 St., Philadelphia 32, Pa.)

■ **LINEAR MOTION POTENTIOMETER** is designed to operate over the temperature range  $-65^{\circ}$  to  $+500^{\circ}$ F. Displacement range is 1.31 in. Available resistances range from 1000 to 20,000 ohms with resolutions ranging from 0.0013 to 0.0035 in. Power rating is 4.0 watts at 40°C. (Bourns Laboratories Inc., Dept. Sci447, P.O. Box 2112, Riverside, Calif.)

■ **ELECTRON MICROPROBE ANALYZER**, for analysis of magnesium and higher atomic number elements, operates by exciting x-radiation from elements in a volume of a few cubic microns on the surface of a sample. Electron-optics system contained in a vertical column includes a biased gun, two magnetic lenses, and alignment devices. Effective focus diameter is of the order of 2  $\mu$  when measured in zirconium at 25 kv. Accelerating voltage is adjustable in 5-kv steps from 10 to 50 kv. The specimen stage accommodates samples up to 0.5 in. in diameter and 0.25 in. thick. Translation facilities operate in two

orthogonal directions, one horizontal and one inclined 30 deg. X-ray optics are enclosed in a ray-proof chamber containing three or more adjustable curved-crystal spectrographs or one scanning x-ray spectrograph. Helium bags are optionally available. Three counting channels provide for two Geiger counters and one scintillation counter. An optical system is provided for viewing the sample surface at a fixed magnification of 220. The instrument is housed in two units, one a desk console and the other an electronics cabinet. (Philips Electronic Instruments, Dept. Sci461, 750 S. Fulton Ave., Mount Vernon, N.Y.)

■ **AMPLIFIER AND SWEEP VOLTAGE GENERATOR** are combined in this instrument that provides seven rates of sweep voltage for use with X-Y plotters. Rates range from 0.5 mv/sec to 50 mv/sec, with  $\pm 2$  percent accuracy. A rate of 0.1 mv/sec can be obtained with some loss of linearity. In its amplifier setting the instrument becomes a chopper-stabilized d-c amplifier delivering either amplified current output or voltage output by use of proper shunts. Used with a standard 10 mv/in. recorder, sensitivities up to 10 in./mv are obtainable. (Houston Instrument Corp., Dept. Sci464, 1717 Clay Ave., Houston 3, Tex.)

■ **OSCILLOSCOPE CAMERA** records patterns with object-to-image-size ratio 1 to 0.9. Multiple exposures are provided by moving the lens to 11 detented positions while the camera back remains fixed. Lens adjustment can be made without removing the camera from the oscilloscope. The pattern can be observed with both eyes while exposures are being made. (Hewlett-Packard Co., Dept. Sci460, 275 Page Mill Rd., Palo Alto, Calif.)

■ **FREQUENCY-TO-VOLTAGE CONVERTERS** are available in six standard models covering the audio frequency range to 5000 cy/sec, with models to 14,000 cy/sec available on special order. Standard outputs are 0 to 1 and 0 to 5 volts d-c filtered, 0 to 50  $\mu$ a filtered, and 0 to 1 ma unfiltered. Both zero setting and range scale are adjustable. Standard units offer linearity and accuracy said to be better than  $\pm \frac{1}{2}$  percent of full-scale frequency with temperature sensitivity less than  $10^{-4}/^{\circ}$ C from  $-60^{\circ}$  to  $+80^{\circ}$ C. Accuracies within  $\pm 0.1$  percent and temperature sensitivity under  $5 \times 10^{-5}/^{\circ}$ C are said to be available on special order. (Pioneer Magnetics Inc., Dept. Sci469, 5888 Wilshire Blvd., Los Angeles 36, Calif.)

JOSHUA STERN

National Bureau of Standards,  
Washington, D.C.

## HERE'S A QUALITY STUDENT MICROSCOPE AT A BUDGET PRICE!

Although budget priced, the UNITRON Model MUS is definitely not just another student microscope. It includes these significant features often lacking in much more costly student models:

- NOT JUST a disk diaphragm... but an iris diaphragm for perfect control of aperture.
- NOT JUST a single focusing control... but both coarse and fine.
- NOT JUST a mirror... but a condenser for optimum illumination and resolution.
- NOT JUST one objective... but three: 5X, 10X, 40X.
- NOT JUST one eyepiece... but a choice of two from 5X, 10X, 15X.

Durable, sturdy — ideally suited to withstand the use and abuse of classroom and laboratory.

## new instruments for infusion and retracting of liquids

## Syringe Driver

ECONOMICAL • CONVENIENT

Speed and syringe choice  
give wide range  
of delivery rates

Delivers small quantities  
of liquids at accurately  
controlled rates

This instrument has clinical applications in anaesthesia, surgery, gynecology, radiology and neuropsychiatry. It is particularly useful for administering small volumes of injectable drugs which are to be given over a period of time.

A threaded shaft, carrying a syringe holder and a pusher, is mounted in place of the regular drum spindle of the Bird Kymograph. The kymograph rotates the shaft and operates the pusher.

Any Luer syringe, from 5 ml to 50 ml capacity may be used. The kymograph drive provides a choice of five speeds. The combination of syringe and drive speed choice allows a wide range of delivery rates.

Request Syringe Driver  
and Retractor Bulletin  
for table of delivery rates  
and catalog numbers

### SYRINGE RETRACTOR

Similar to the Bird Syringe Driver, but is designed for withdrawing samples of liquids at accurately controlled rates.

## PHIPPS & BIRD, INC.

# PERSONNEL PLACEMENT

**CLASSIFIED:** Positions Wanted, 25¢ per word, minimum charge \$4. Use of Box Number counts as 10 additional words. Payment in advance is required. Positions Open, \$40 per inch or fraction thereof. No charge for box number.

**COPY** for classified ads must reach SCIENCE 2 weeks before date of issue (Friday of every week).

**DISPLAY:** Rates listed below—no charge for Box Number. Monthly invoices will be sent on a charge account basis—provided that satisfactory credit is established.

Single insertion	\$40.00 per inch
4 times in 1 year	38.00 per inch
7 times in 1 year	36.00 per inch
13 times in 1 year	34.00 per inch
26 times in 1 year	34.00 per inch
52 times in 1 year	32.00 per inch

For PROOFS on display ads, copy must reach SCIENCE 4 weeks before date of issue (Friday of every week).

Replies to blind ads should be addressed as follows:  
Box (give number)  
Science  
1515 Massachusetts Ave., NW  
Washington 5, D.C.

### POSITIONS WANTED

**Biologist**, young, expects Ph.D. in June 1960, interested in broadening his experience in cell biology; would like a research associateship with university research group. Box 70, SCIENCE. X

**Biologist**, woman, Ph.D., 35, 6 years of college teaching experience. Biology, anatomy and physiology, comparative anatomy, embryology. Primary interest teaching. Prefer West Coast or Southwest. Box 77, SCIENCE. X

**Plant Biologist**, M.S., 4 years' teaching experience—physiology, pathology, dendrology. Desires teaching, research. Box 76, SCIENCE. X

### POSITIONS WANTED

**Clinical Biochemist**, woman, Ph.D., 2 years of training and research in routine and special chemical analyses at large general hospital; seeking position with hospital or established commercial laboratory in Southern California area. Box 74, SCIENCE. X

**International Technical/Scientific Liaison or Marketing**; D.Sc.; 6 years chemical industry, 3 years technical representative. Have worked in United States, Europe, Venezuela. Available for foreign assignment. Box 73, SCIENCE. 4/8

(a) **Neurophysiologist** Ph.D.; research in psychophysiology of stress, sound, vision, altitude responses, teaching and administrative experience; available for top-level academic or research appointment in physiological psychology. (b) **Biologist** Ph.D.; teaching-research experience in anatomy, zoology, biology, including radiobiology and radiation medicine; prefers research appointment. (c) **Organic Chemist** Ph.D.; 3 years of science teaching, 8 years of research and clinical biochemistry experience; available for academic, clinical or pharmaceutical appointment. S4-1 Medical Bureau, Inc., Science Division, Burneice Larson, President, 900 North Michigan Avenue, Chicago. X

**Pharmacologist**, Ph.D., M.D. Laboratory, clinical, administrative, teaching experience; societies, publications. Unusually well-qualified man in early 40's seeks responsible position, research or clinical investigation. Replies confidential. Box 72, SCIENCE. X

### POSITIONS OPEN

**Technical Sales**. Position open in Chicago area for a man with a broad scientific background who is interested in selling to physiologists, psychologists, pharmaceutical and industrial research laboratories. Excellent opportunity to grow with a long established scientific apparatus manufacturer. Submit complete résumé to C. H. Stoelting Company, 424 N. Homan Ave., Chicago 24, Ill. X

### POSITIONS OPEN

**Anatomy Department, Dalhousie University, Halifax, Nova Scotia**. Applications are invited for two positions at the rank of **Assistant Professor** in the Department of Anatomy. Experience in the teaching of gross anatomy is essential and a willingness to undertake some teaching in neuroanatomy, histology, or embryology desirable. The successful candidates will be expected to participate in the active research program of the department, for which good facilities are available. Applicants with a medical degree will be preferred although those with an honors degree in medical science or biology will receive special consideration. The salary for a medical graduate with minimum qualifications will be \$6500. The salary will depend upon qualifications and experience. Applications should be made to Professor R. L. deC. H. Saunders at the above address. 3/4; 4/1; 5/6; 6/3

(a) **Regional Medical Director**; requires demonstrated administrative abilities to represent prominent pharmaceutical company to physicians; liaison, consultant, correspondence responsibility; some travel; to \$17,000; Midwest. (b) **Biochemist**; Ph.D. to supervise department; also responsible 30 technical employees in busy, well-equipped laboratory, 250-bed general hospital, expanding; upper Midwest. (c) **Associate Director, Clinical Research**; young M.D. particularly experienced cancer, arthritis, pulmonary, related areas to establish and coordinate clinical testing programs for new products, evaluate results; clinical, medical liaison; to \$16,000 with exceptional benefits; prominent company. (d) **Pharmacologist/Physiologist** for animal experimentation and (e) **Analytical Chemist or Biochemist**; for synthetic organic medicinals; expanding consulting firm principally in drug, medical evaluation; salaries commensurate ability; excellent advancement opportunities. (Please write for an analysis form. Our 64th year: Founders of the counseling service to the medical profession; serving medicine with distinction over half a century.) Science Division, Woodward Medical Bureau, Ann Woodward, Director, 185 North Wabash, Chicago. X

## POSITIONS OPEN

(a) **Head of Exploratory Pharmaceutical Research.** Ph.D. with creative experience in drug field; over \$10,000 year; leading pharmaceutical firm; East. (b) **Chairman of Biology Department** strong in botany with college teaching-research experience; South. (c) **Biochemist** for research on chemical changes in human brain development at leading university hospital; Chicago area. (d) **Endocrinologist**, Ph.D. or D.V.M., with biochemistry, physiology training; qualified to organize and supervise endocrine screening program for pharmaceutical manufacturer; East. (e) **Bacteriologist**, Ph.D. or M.S., interested in production of bacterial and viral antigens at large research foundation; Midwest. (f) **Laboratory Manager**, advanced degree, experienced in clinical services to supervise activities of large department in university hospital; Southeast. (g) **Pharmacologist/Physiologist** for animal experimentation for young, but established, consulting firm; salary open, many benefits; Midwest. (h) **Assistant Professor of Biochemistry** to teach in medical school and supervise hospital chemistry laboratory; Southwest. (i) **Medical Microbiologist**, Ph.D., with immunology training for important research institute; East. (Please write for details; also many other positions available through our nationwide service.) S4-1 Medical Bureau, Inc., Science Division, Burnice Larson, President, 900 North Michigan Avenue, Chicago, X

Internationally known firm seeks the following for its midwestern unit:

## MICROBIOLOGIST

Ph.D. or equivalent familiar with single, suspended and monolayer cell culture techniques, media formulation and staining methods. To serve as head of cell production facility and conduct cell culture research.

## VIROLOGIST

Ph.D. or equivalent experienced in virus techniques and general tissue culture methods. Assignment of diagnostic nature with unusual opportunity for research.

Salary commensurate with background. Excellent corporate benefit programs. Our staff knows of this advertisement. All replies held in confidence. Interested parties should give all particulars in first letter, including age, education, experience and salary range desired. Box 62, SCIENCE.

**Pharmacologist, Physiologist or Biochemist.** Academic career position open in pharmacology department for Ph.D. in one of the above disciplines. Good opportunity for constructive teaching and research at excellent starting salary for academic rank of **Instructor to Associate Professor**. Excellent laboratory facilities and assisting personnel for research in renal physiology, renal biochemistry, neurophysiology, and pharmacology, or other areas of interest to appointee. Send résumé to Box 71, SCIENCE. 4/8, 15

**Science Teachers, Librarians, Administrators** urgently needed for positions in many states and foreign lands. Monthly non-fee placement journal since 1952 gives complete job data, salaries. Members' qualifications and vacancies listed free. 1 issue, \$1. Yearly (11 issues) membership, \$5 individual; \$10 institutional. CRUSADE, SCI., Box 99, Station G, Brooklyn 22, N.Y. cow

## SCIENTIFIC INFORMATION OFFICER

Research Branch  
Department of Agriculture  
**OTTAWA, CANADA**  
SALARY \$5580-\$6780

To collect, review and evaluate scientific information on fungicide use and research.

For details, write to

**CIVIL SERVICE COMMISSION, OTTAWA**  
and quote competition number 60-546.

**Senior Technician.** Research projects in virology, tissue culture, and cancer. New laboratory in southern Florida. Connected with university and children's hospital. Send complete résumé. Box 75, SCIENCE. 4/8, 15

**Writer** for weekly journal to report developments in national and international affairs that bear on science. Familiarity with the Washington scene helpful, background in natural science helpful, experience as a journalist necessary. Position and salary open. State qualifications in a letter to Editor, SCIENCE, 1515 Massachusetts Avenue, NW, Washington 5, D.C. ew

## POSITIONS OPEN

### NEUTRON DIFFRACTIONIST

To head up a nuclear diffraction program in solid state at a new 5-megawatt reactor near Princeton, New Jersey. Address reply to R. E. Flory,

RCA Laboratories  
Box RL-10D  
Princeton, N.J.

## FELLOWSHIPS

**Graduate Study Fellowships.** For students working toward Ph.D. degree in biochemical pharmacology. Good chemical background desirable. Program emphasizes thorough biochemical training as preparation for research. Tax-free stipends, \$1800-\$3800, determined by academic qualifications and number of dependents, plus tuition and fees. Pharmacology Department, Washington University Medical School, St. Louis 10, Mo. 4/1

### Predoctoral and Postdoctoral

#### JAMES W. McLAUGHLIN FELLOWSHIPS

in the field of infection and immunity. These may be granted for study in any of the departments of The University of Texas Medical Branch. Stipends: Predoctoral \$3600 plus allowance for dependents; postdoctoral starting at \$7500. Additional allowances are made for equipment, supplies and travel. Renewable. For information and application write Chairman,

McLaughlin Committee  
The University of Texas Medical Branch  
Galveston, Texas

**Postdoctoral Traineeship in Neuropharmacology and Biochemical Pharmacology.** For the Ph.D. in chemistry, biochemistry, or pharmacology, or the M.D. who would like to broaden his training and enter research or teaching. Stipends, largely tax free, \$4500-\$7000 per year, determined by qualifications, experience, and number of dependents. Program emphasizes the biochemical approach to the study of pharmacology. Research areas include the nervous system, retina, kidney, antibiotics, energy-yielding processes, adaptive enzymes, and so forth. Department of Pharmacology, Washington University Medical School, St. Louis 10, Mo. 4/1

## The Market Place

BOOKS • SERVICES • SUPPLIES • EQUIPMENT

**DISPLAY:** Insertions must be at least 1 inch in depth. Monthly invoices will be sent on a charge account basis—provided that satisfactory credit is established.

Single insertion	\$40.00 per inch
4 times in 1 year	38.00 per inch
7 times in 1 year	36.00 per inch
13 times in 1 year	34.00 per inch
26 times in 1 year	34.00 per inch
52 times in 1 year	32.00 per inch

For PROOFS on display ads, copy must reach SCIENCE 4 weeks before date of issue (Friday of every week).

## BOOKS AND MAGAZINES

### Your sets and files of scientific journals

are needed by our library and institutional customers. Please send us lists and description of periodical files you are willing to sell at high market prices. Write Dept. A3S, CANNER'S, Inc., Boston 20, Massachusetts

## PROFESSIONAL SERVICES

SINCE 1870

### LABORATORY SERVICES

for the  
**FOOD and DRUG INDUSTRIES**  
Drug Evaluation, Food Additive Studies

...NEWS IS HAPPENING AT NORTHROP 

## How New Landing Systems from Radioplane Meet the Demands of High Altitudes, Increased Bail-out Speeds, and Recovery from Space

by Ed Ewing

*Engineering Specialist, Assigned to Project Mercury  
at Radioplane Division, Northrop Corporation*

In high-speed bail outs, the opening process of the standard personnel parachute is a nylon explosion. The fate of the man with his body harness attached to the risers depends mainly on the magnitude of this opening shock and his body position when he receives it. Today's increased speeds and altitudes (where parachutes open even faster) have made opening shock a serious hazard to survival.

An emergency ejection from a high-speed jet, for example, is a sudden thrust into the full blast of the airstream at speeds up to 800 miles per hour — enough to rip open most parachute containers and tear their contents to shreds. And because of the airman's disorientation during the shock of ejection, the most reliable system must place minimum dependence on human intelligence for its operation.

When the U.S. Naval Bureau of Aeronautics outlined its needs and set its requirements for an improved personnel parachute, industry-wide attempts were made to meet the challenge. Radioplane won the contract.

Radioplane took a new approach to the design and development of a canopy that would open just slowly enough to bring the shock

within tolerable limits and at the same time open positively and dependably. Radioplane experimented with five different models, seven modifications and 270 dummy drop tests to produce the now-famous "Skysail"—the ring parachute with the unique sawtooth profile.

Proved in more than 300 qualification jumps, "Skysail" opens one ring at a time starting from a small bubble in the crown. The leading edge of each ring bites into the air in a succession of deliberate step-by-step openings that takes an important fraction of a second longer than the explosion-like filling of the standard canopy. The resultant reduction in opening shock is between 35 and 50 per cent, the drag coefficient is 20 per cent higher than that attained by other parachutes of equivalent opening force and stability.

"Skysail" proves to be the solution to a challenging phase of the jet age.

For the space age, Radioplane is already delivering "Ringsail"—the landing system for America's first man-in-space capsule — NASA's Project Mercury.

As new needs and new challenges arise, the Radioplane scientist, specialist or engineer is in a

position to develop and use his creative talents freely. Besides working on escape and landing systems, he engages in scope-widening studies in re-entry mechanics, hyper-environments and physics of materials. Radioplane fosters an atmosphere in which he is urged to develop new ideas and new techniques in the missile, pilotless aircraft, and space recovery fields. With Radioplane's outstanding facilities, colleagues, and current programs to encourage him, horizons for the individual are wide at Radioplane. They are wide to allow outstanding ingenuity and creativity full range to advance.

*Current papers by Northrop scientists and engineers include:*

"Disintegration Barriers to Extremely High-Speed Space Travel" by Dr. Elliot T. Benedikt.

"An Astrovehicle Rendezvous-Guidance Concept" by Norman V. Petersen, Robert Swanson and Leroy Hoover.

## PRECISION INSTRUMENTATION FOR NUCLEAR MEASUREMENTS

*The superbly designed systems for biological, clinical and industrial research shown here are part of the complete line of radioactivity measuring instruments developed and manufactured by Nuclear-Chicago. Instruments of superior quality, versatility and performance have made us the world's leading supplier to the nuclear industry. General Catalog R contains complete specifications and application information on these systems and details on our complete line. Please ask us for your copy.*

1. Automatic Sample Changer system accepts 35 radioactive samples and presents printed data on length of time required to accumulate predetermined number of counts.

2. Actigraph® system presents record of position and total activity of radioactive spots on strip chromatograms.

3. The Dynacon® Electrometer measures soft beta samples in solid, liquid, or gaseous

phases. Ideal for continuous flow analysis.

4. Scintillation Well Counter and Scaler-Spectrometer permit low background measurements of gamma emitting liquid or solid samples.

5. Model 4000 Training System includes scaler, timer, G-M Tube, sample mount, radioactive reagents, pipette, sample pans.
