

which is morally certain and accepted both by Eastern Orthodox churches and by the Catholic Church.

There is *nothing* in Catholic doctrine which is contrary to any scientific fact, nor can there be any such in the future.

The publication of these letters marks the end of a series of comments on M. E. Davis' review of A. W. Sulloway's book, Birth Control and Catholic Doctrine [Science 130, 559 (1959)].—ED.

Revolution by Committee?

Reading John W. Gardner's account of the life of Abraham Flexner [*Science* **131**, 594 (26 Feb. 1960)] I could not help but ask (as I'm sure many other readers asked): What would be the state of American medical education today had Pritchett appointed a *committee* to look into the matter 50 years ago?

GARRETT HARDIN
University of California (Santa Barbara), Goleta

Meetings

Clinical Scientists

The Association of Clinical Scientists, a recent affiliate of the AAAS, was organized in 1949 by a group of physicians and scientists working in various fields of laboratory medicine. During the early years the group held frequent informal meetings at the laboratories of its members and arranged a number of symposiums, workshops, and seminars on methodology in clinical chemistry which were held in the United States, Great Britain, and Puerto Rico. Until 1956, the association was called the Clinical Science Club. By 1956 the scope of activities of the Clinical Science Club had expanded, as had its membership, and it was then decided to incorporate the group as the Association of Clinical Scientists. The association received a charter from the state of Pennsylvania on 1 March 1957 as a nonprofit scientific organization. The objectives of the association, as outlined in the constitution, are as follows: (i) to promote education and research in clinical science by practical methods; (ii) to maintain and improve the accuracy of measurements in clinical laboratories and to promote uniformity in clinical laboratory procedures; (iii) to encourage cooperation between physician and nonphysician groups concerned with the application of scientific methods to medical practice; and (iv) to support the principles and ethics of the field of medicine and of its constituent basic sciences.

The association holds scientific meetings in the spring and fall. The spring meeting is held in either March or April and is devoted to the presentation of scientific papers by members and invited guests and to visiting clinical and research laboratories. The fall meeting is held in either October or November and is devoted to the presentation of an applied seminar in clinical science. In addition, informal dinner meetings of the association are held periodically in conjunction with international medical congresses and national scientific conventions.

Try UNITRON'S new POLARIZING MICROSCOPE

The Model MPS is a precision instrument designed to meet the exacting requirements of science, education and industry. Ideal for work in chemistry, crystallography, biology, as well as the technology of paper, glass, textiles and petroleum.

- Eyepieces: 5X (micro.), 10X (cross.)
- Objectives: 4X, 10X, 40X, achromatic, strain-free, centerable
- Nosepiece: quick-change type
- Substage condenser: focusable, 3-lens, swing-out top mount, iris diaphragm
- Polaroid polarizer: rotatable 360°
- Polaroid analyzer: in sliding mount
- Bertrand lens: centerable
- Stage: 115mm diameter, revolves 360°, reads to 5' with vernier
- 2 Compensators: quarter-wave plate and first order red plate
- Focusing: both coarse and fine
