REHABILITATION OF THE MENTALLY ILL

Social and Economic Aspects

A symposium of the American Psychiatric Association, cosponsored by the AAAS Section on Social and Economic Sciences and the American Sociological Society.

Edited by Milton Greenblatt and Benjamin Simon

This volume presents an up-to-date picture of rehabilitation in its broadest sense. The contributions are from outstanding researchers and practitioners in the field. The process of rehabilitation is examined from the standpoint of (a) hospital, (b) transitional aspects, and (c) community. The rehabilitation of the individual in the total sense is seen as a continuum starting from the moment of admission to his final resettlement in the community and many techniques and recommendations for improved patient care and treatment are contained in the book.
