

ISOTOPES

for Your Development Work

Oak Ridge National Laboratory offers more than 300 radioactive and stable isotope products.

RADIOISOTOPES

Processed Solutions—90 processed radioisotopes may be obtained, including many carrier-free and high specific activity products.

Now Available—Iridium-192 gamma sources with specific activity up to 100 curies per gram, and cobalt-60 radiography sources 1/8 and 1/16-inch in diameter with specific activity greater than 100 curies per gram. At a reduced price, carbon-14 barium carbonate is available at \$9.50 per millicurie.

STABLE ISOTOPES

More than 200 stable isotopes available from 50 elements.... Chemical processing and target fabrication services also offered.... Ultra-high isotopic purity in a number of isotopes.

For information or literature, write to: Isotopes Division, Oak Ridge National Laboratory, P. O. Box X, Oak Ridge, Tennessee.

CLASSICS IN SCIENCE

Edited by

E. N. da C. Andrade

This volume presents more than forty selected readings in scientific thought, method and applications, ranging from Aristotle, Ptolemy and Pythagoras to Darwin, Marconi and Appleton. Following a special introductory essay by Professor Andrade on the general topic: What Is Science?, the book presents a wide-ranging anthology of writings on the origin and meaning of science, the universe, matter and energy, and science and everyday life. Among the authors represented, in addition to the above, are Immanuel Kant, William Peddie, Copernicus, Galileo, Newton, Lavoisier, Osler, John Dalton, Michael Faraday, F. W. Aston, Hector Macpherson, Sir Charles Lyell, Richard Jefferies, C. F. Powell, Erwin Schrödinger and Sir Robert Ball.

"Thoroughly recommended as a guide to the basic principles of scientific method."—*Special Libraries Association*

"Valuable to anyone interested in the history of ideas . . . It gives the reader a personal acquaintance with the people who have developed the ideas."—*American Journal of Physics* \$6.00

PHILOSOPHICAL LIBRARY, Publishers

buy ASCO for

shockproof • accurate

PIRANI-TYPE GAUGE

Wide range, fine calibrations, and easy reading are attained with its wide scale, illuminated meter movement and dual reading scale, (.1 microns Hg. to 5000 microns Hg.). It is self-calibrating. A new transistorized circuit insures long, trouble-free use and Zener diode stabilization helps to insure accuracy to better than .1%. The gauge is shock resistant to 8 g.'s and is made of strong polyester, shock-proof case and mount. 115 V.—50-60 cycle operation. 6" wide x 6½" high x 8½" deep. Only **\$149**

For use with Asco Pirani-Type Gauge, an inexpensive yet highly efficient recorder and controller, in 2 ranges — 0 to 25 microns and 0 to 5000 microns.

ASCO RECORDER

small, compact trouble-free

The smallest and simplest strip chart recorder on the market, it provides true rectilinear recording free from inconvenient distortion. Operating at one inch per hour, a 63-foot chart roll records for 31 days. A galvanometer pointer swings free for maximum accuracy, being clamped for marking briefly once every 2 seconds, generating a continuous line of many small dots. Scale length—2½". For portable use or panel mounting. 3½" wide x 5½" high x 4½" deep. Only **\$193**

ASCO CONTROLLER

versatile, easy-to-operate

Electro-mechanically controlled, the Asco Controller uses contact meter-relays as its principal component. The meter-relay indicates the control variable, and it initiates control action. In applications where a variable is held to a present level, an interrupter is used to separate the meter-relay's locking contacts periodically. This allows the meter-relay to sample to see if further control action is necessary. Input—115/230 volts, 50/60 cycles. SPDT load switch rated 5 amperes 115/230 volts resistive. For portable use or panel mounting. 5½" wide x 5¾" high x 10" deep. Only **\$194**

AAAS Cooperative Committee on the Teaching of Science and Mathematics (J. R. Mayor, Director of Education, AAAS, Washington, D.C.). 28, 29 Dec.

Academy Conference (J. G. Arnold, Jr., Loyola Univ., New Orleans, La.). 26-27 Dec.

Now—for the first time—scientists in the space and physical sciences will be able to keep up with rapid-fire developments in such fields as missiles and rockets, electronics, mathematics, computers, physics and instrumentation. A unique service — **Current Contents of Space and Physical Sciences** — enables you to locate essential reading in minutes. This new service is similar in concept to the Life Sciences Edition of **Current Contents*** which has proven itself to more than 10,000 scientists and is now in its third year of publication. **Current Contents of Space and Physical Sciences** satisfies the pressing need of physical scientists and engineers to keep abreast of current scientific developments. This new weekly service comprehensively reports the contents of 425 primary journals — over 100,000 individual articles per year. The inaugural issue will appear in January, 1961. For a gratis specimen copy and additional information, write: **INSTITUTE for SCIENTIFIC INFORMATION, 1122 Spring Garden Street, Philadelphia 23, Pa.**

* A weekly guide to the chemical, pharmacological and life sciences, the Life Sciences Edition of **Current Contents** lists the title of every article in more than 600 scientific journals—over 130,000 articles per year.

PO₄-CARRYING COFACTORS

ADENOSINE 3': 5'-CYCLIC PHOSPHATE (AOC) Phosphorylase activator present in heart and liver tissue. A pure crystalline material. Homogeneity established by several methods, including paper electrophoresis and paper chromatography. Now offered at prices that allow for wider use.

GUANOSINE 5'-DIPHOSPHATE (GDP) AND GUANOSINE 5'-TRIPHOSPHATE (GTP) GDP has been found to be a substrate in the synthesis of ribonucleic acid. GTP is involved in the synthesis of microsomal protein.^{1,2} GDP acts as phosphate acceptor and GTP as phosphate donor in ketoglutarate oxidation³ and in the phosphopyruvate carboxykinase and adenylosuccinate synthetase reactions.^{4,5} In the phosphohexokinase and pyruvic kinase reactions, these compounds can replace the adenosine polyphosphates.^{6,7} Full details and prices on request. Send now for free copy of our new 1960 Price List. References 1-7 will be supplied on request.
