

**NO. 1**

DATA SERIES Evaluating Spectrophotometer Performance

RESOLUTION:

The degree to which the instrument separates adjacent spectral peaks.

**Cary model 14
resolves spectra
to 1Å or better in
UV-VIS region: 3Å
in near-IR region**

length as curve A in Figure 2, was recorded again with about 10Å resolution. This appears as curve B in Figure 2. A comparison of the curves in Figure 2 emphasizes the value of high resolution, which would be especially important in the case of similar materials having nearly identical spectra.

High resolution also strengthens absorption peaks. Note that the highly resolved spectrum in curve A more accurately represents actual peak absorption and wavelength. Such precise measurement of absorption assures accurate quantitative results.

Resolution is just one of several important criteria on which the evaluation of spectrophotometer performance should be based. Others include: Photometric accuracy and reproducibility; wavelength accuracy and reproducibility; stray light. Because the Cary Model 14 excels in each of these performance criteria, it is considered by many as being the finest instrument of its kind. A brochure is yours for the asking. Write for data file E21-11.

High resolution, by sharpening absorption peaks of interest, isolates them from adjacent peaks. To illustrate this, the spectrum of carbon disulfide vapor was recorded with 1Å resolution as shown in Figure 1. An enlarged portion of this appears as curve A in Figure 2. A portion of the spectrum, covering the same wavelength as curve A in Figure 2, was recorded again with about 10Å resolution. This appears as curve B in Figure 2. A comparison of the curves in Figure 2 emphasizes the value of high resolution, which would be especially important in the case of similar materials having nearly identical spectra.

between quality and quantity of ingested food and metabolism was presented by F. W. Heggeness. Weanling rats fed high carbohydrate diets ingested calories in excess of requirements and developed a transient, self-limiting elevation in metabolism. This could be prevented by initially presenting the diets in amounts just sufficient to maintain body weight. Modification of capacity for lipogenesis appeared to be the critical factor.

The 1960 Conference on Physiological and Behavioral Aspects of Taste brought together researchers from many disciplines: L. M. Bartlett (zoology), University of Massachusetts; R. M. Benjamin (physiology), University of Wisconsin; J. A. Carpenter (applied biodynamics), Yale; K. Christensen (psychology), University of Illinois; W. C. Dilger (ornithology), Cornell; T. Engen (psychology), Brown; I. Y. Fishman (biology), Grinnell; G. P. Frommer (psychology), Brown; A. Goldstein (psychology), Cornell; E. B. Hale (poultry husbandry and psychology), Pennsylvania State; A. E. Harri-man (psychology), Franklin and Marshall; F. W. Heggeness (physiology), University of Rochester; H. L. Jacobs (physiology and psychology), University of Rochester; R. L. Kitchell (anatomy), University of Minnesota; R. B. MacLeod (psychology), Cornell; G. R. Morrison (psychology), McMaster; R. M. Pangborn (food technology), University of California; F. J. Pilgrim (food acceptance), Quartermaster Institute; M. W. Schein (poultry husbandry), Pennsylvania State; J. Tepperman (pharmacology), State University of New York, Upstate Medical Center; and L. F. Titlebaum (nutrition), Harvard.

The conference proceedings were recorded. An edited version is being prepared for publication.

6-8. Geodesy in the Space Age, symp., Ohio State Univ., Columbus. (W. A. Heiskanen, Ohio State Univ., 1314 Kinnear Road, Columbus 12)

6-10. British Medical Assoc., annual, Auckland, New Zealand (E. Grey-Turner, B.M.A., Tavistock Sq., London, W.C.1)

9-15. Second Allergy Conf., Nassau, Bahamas. (I. M. Wechsler, P.O. Box 1454, Nassau)

13-16. American Soc. of Heating, Refrigerating and Air-Conditioning Engineers, Chicago, Ill. (R. C. Cross, 234 Fifth Ave., New York 1)

14-15. Conference on Microdosimetry, 2nd, Rochester, N.Y. (N. Kreidl, Bausch & Lomb Optical Co., Inc., Rochester 2)

15-17. International Solid-State Circuits Conf., Philadelphia, Pa. (J. J. Suran, Bldg. 3, Room 115, General Electric Co., Electronics Park, Syracuse, N.Y.)

16-18. Biophysical Soc., annual, St. Louis, Mo. (W. Sleator, Dept. of Physiology, Washington Univ., St. Louis 10)

22-25. American Educational Research Assoc., annual, Chicago, Ill. (G. T. Buswell, 1201 16th St., NW, Washington 6)

23-25. Fifteenth Annual Symp. on Fundamental Cancer Research, Houston, Tex. (Publications Dept., Univ. of Texas M.D. Anderson Hospital and Tumor Inst., Texas Medical Center, Houston 25)

23-25. Symposium on Molecular Basis of Neoplasia, Houston, Tex. (Publications Dept., Texas Medical Center, Houston 25)

26-1. American Inst. of Chemical Engineers, natl., New Orleans, La. (F. J. Van Antwerpen, AIChE, 25 W. 45 St., New York 36)

26-2. American Inst. of Mining, Metallurgical, and Petroleum Engineers, annual, St. Louis, Mo. (AIME, 29 W. 39 St., New York 18)

27-3. Conference on Analytical Chemistry and Applied Spectroscopy, 12th, Pittsburgh, Pa. (L. P. Melnich, U.S. Steel Corp., Monroeville, Pa.)

March

2-4. Optical Soc. of America, spring meeting, Pittsburgh, Pa. (Miss M. Wurga, 1155 16th St., NW, Washington 6, D.C.)

5-9. Gas Turbine Conf. and Products Show, 6th annual, Washington, D.C. (Meetings Dept., American Soc. of Mechanical Engineers, 29 W. 39 St., New York 18)

6-8. North American Wildlife and Natural Resources Conf., 26th, Washington, D.C. (C. R. Gutermuth, Wildlife Management Inst., 709 Wire Bldg., Washington 5)

7-9. American Railway Engineering Assoc., annual, Chicago, Ill. (N. D. Howard, 59 E. Van Buren St., Chicago 5)

8-10. Instrument Soc. of America Conf., 11th annual, Pittsburgh, Pa. (R. R. Webster, 900 Agnew Ave., Pittsburgh 30)

8-11. Neurosurgical Soc. of America, Boca Raton, Fla. (R. K. Thompson, 803 Cathedral St., Baltimore 1, Md.)

9-10. Magnetohydrodynamics, symp. on engineering aspects of, Philadelphia, Pa.

20 JANUARY 1961

Optically and mechanically, the M-5 offers unequalled precision, convenience and versatility for the most diverse research applications. Uniform, maximum sharpness throughout the field, with no change in accommodation, is one of the many exclusive features of the instrument.

With a constant working distance of 96 mm., standard magnifications are 6x, 12x, 25x, and 50x, conveniently selected on the rotatable horizontal drum. Using 8x, 10x, 15x, and 20x eyepieces and attachment objectives, a total power range of from 5x to 200x is obtainable. Accessories not illustrated include other wide field eyepieces, various light sources, stages and polarizing, photographic and measuring attachments.

Your own evaluation of this superb stereomicroscope will prove most rewarding. Write for Booklet M-5.

*the FIRST name in a complete line of Surveying Instruments, Photogrammetric Equipment and Microscopes.

ACE interchangeable REACTION APPARATUS for research & production

Bottoms, Tops are available in stainless steel, Monel and other metals as well as glass. The 1 to 72 litre range permits use for bench top applications as well as pilot plants and small batches; the 50 to 72 litre size proven ideal for specialized pharmaceutical and biological compounds.

All tops are interchangeable with all bottoms regardless of size. Experiments can be carried out with only one top and a series of bottoms ranging from 1 litre to 72 litres. Necks are wide, facilitate cleaning of viscous material. In addition to standard heads, Ace will custom make to your specifications.

Standard clamp adaptable to entire series of reaction flasks. Top section removable without disturbing lower section. Convenient arm for clamping to supporting frame. Hammertone finish.

Full line of accessories:
Glas-Col Heaters
Powerstats
Trubore Stirrers
Stirring Motors.

Ace Reaction Apparatus is fully described in Ace Brochure No. 58.

Write Dept. S for your copy.
