**CHROMATOBOX®**

*for paper  
chromatography*

It measures only 3" x 3" x 2", and produces a 17" paper chromatogram faster, easier, more economically than larger equipment. Uses only 10 to 15 ml of solvent; quickly saturates its small atmosphere. Little jobs done in the CHROMATOBOX leave cabinets and jars free and uncontaminated for larger jobs. Use it for solvents that damage other apparatus. All parts are solvent resistant plastic or glass.

*The low price and convenience of the CHROMATOBOX open new opportunities to every user—*

Students can be given individual practice in developing chromatograms.  
■ Lectures can be illustrated with active demonstrations. ■ Test strips can be run that were previously neglected because of the bother with larger equipment.  
■ The scope of clinical laboratories can be broadened with data given only by chromatography.
