

Awards for excellence in science writing in newspapers and magazines (27 Dec.).

The national convention of the *Scientific Research Society of America* (Donald B. Prentice, Yale) is scheduled for 29 December. The award of the William Procter prize and the annual RESA address will follow the luncheon held jointly with the Society of the Sigma Xi.

A regional meeting of *Sigma Delta Epsilon*, graduate women's scientific fraternity (Ernestine B. Thurman, Nation-

al Institutes of Health), will include a tea for all women in science. A headquarters room will be maintained throughout the meeting period.

The 62nd annual convention of the *Society of the Sigma Xi* (Thomas T. Holme, Society of the Sigma Xi, New Haven) will be held on 29 December, after the joint luncheon with RESA. In the evening the Society of the Sigma Xi will join with the *United Chapters of Phi Beta Kappa* (Carl Billman, Phi Beta Kappa, Washington, D.C.) in sponsoring the address by Harrison

Brown. Since the inauguration of the series in 1922, these distinguished lectures, of interest to all participants, have been a special feature of the Association meeting.

... in response to inquiries for a simple, basic syringe driver directly aimed towards applications that require operation at one delivery rate, while providing a wide range of choice of this rate.

This basic apparatus consists of a synchronous motor drive and a syringe holder. Drive is arranged to accept any one of fifty interchangeable ratio gears and syringe holders are available for 50, 30, 20, 10, 5, 2, 1, and .5 ml capacities. The above gears provide for rotation of the syringe holder driving screw throughout a range of one revolution in ten minutes to one revolution in three hours.

Pump is a single stroke unit and is normally furnished with the ratio gears that provide a single, selected delivery rate with any given syringe. The wide choice of ratio gears and syringe capacities provide a practically unlimited choice of delivery rates up to the maximum of 2.35 ml per hour. With synchronous motor drive, delivery rate is constant and predictable. 115 volt, 60 cycle, a.c. lines.

Gives reproducible results, bottle after bottle

Take one set of results you got with Du Pont Ammonium Hydroxide Reagent. You can change bottles, shipments or locality, and you'll reproduce the same results—time after time! That's because each bottle gets 113 separate analytical tests to keep it uniform for your use.

It's of uniformly high purity, too, exceeding American Chemical Society requirements. And you get the convenience of single-trip cartons, dripless sleeves, safety grips on 5-pint bottles and color-coded caps and labels.

Du Pont's family of reagents includes Nitric, Sulfuric, Hydrochloric and Glacial Acetic acids, and Ammonium Hydroxide. They're readily available all over the country. Ask your local laboratory supply house or write for list of suppliers. Industrial and Biochemicals Dept., N-2545 S, Wilmington 98, Delaware.
