It is simple to use and the operator soon becomes proficient so that liquids can be delivered quickly, precisely and safely. Measurement precision is extremely high (0.01cc). The instrument has three agate-ball valves which operate independently and the entire procedure can be done with only one hand.

PRICE \$6.90 each . . . comes in black, red, green and blue, sent on approval.

all laboratory pipettes can be used with the PROPIPETTE—Safety Pipette Filler.

ence and Technology; the *Excerpta Medica Foundation and the Danish Technical Information Service*), by D. B. Baker, G. M. Conrad, J. C. Green, M. Hoseh, and R. A. Jensen; and the published proceedings of each year's annual meeting.

The federation has recently undertaken the preparation of a program for studying the role of science abstracting and indexing services in solving the over-all information problem. The results of this work should provide a broad picture of efforts to communicate scientific information in the United States, from the time such information is available until it becomes obsolete. It is hoped that this plan will provide direction for all efforts in abstracting and indexing in the United States, both within and outside the government, for some years ahead.

The present AAAS Council representative is G. Miles Conrad, organizer, founder, and first president of the federation.
