

## IF YOU USE COMPRESSED GASES

this book  
is almost  
essential !

The new Matheson Gas Data Book is the most comprehensive fact book and use manual on compressed gases ever published. Extensive data and recommended procedures on use and handling make this book a most important reference for every laboratory and research library.

### MATHESON GAS DATA BOOK PARTIAL CONTENTS

3rd Edition—444 pages—68  
Charts—68 Tables  
Information on use of 81  
compressed gases  
Safety procedures for each  
gas and a general chapter,  
"Safe Handling of Com-  
pressed Gases"  
Recommended controls and  
regulators for all gases with  
dimensional drawings of con-  
nections  
Toxicity and first aid proced-  
ures for hazardous gases  
Physical constants and spe-  
cifications  
Cylinder handling and storing

ORDER NOW—Available only  
by mail from The Matheson  
Company, Inc., Box 85—East  
Rutherford, N. J. Price \$8.00  
postpaid in U.S. and Canada.

## Meetings

### Plant Physiologists

On 6–8 February the southern section of the American Society of Plant Physiologists met with the Association of Southern Agricultural Workers at Jackson, Mississippi. All the sessions were well attended. The program included 28 contributed papers and a symposium on photosynthesis.

Chairman of the symposium was Hans Gaffron, of Florida State University. Papers were presented by André Jagendorf (McCormick-Pratt Institute, Johns Hopkins University), Birgit Vennesland (University of Chicago), and Roderick K. Clayton (Oak Ridge National Laboratory). The proceedings will be published, and copies will be available from the secretary-treasurer at a cost of \$1.

The annual Plant Physiologists' breakfast was held on 8 February. An award of \$25 for the best paper given by a graduate student was made to Theodore Holmsen (University of Florida) for a paper on geotropism in *Zea mays*. Award of a copy of volume 11 of the *Annual Review of Plant Physiology* was made to Coleman Ward (Virginia Polytechnic Institute) for his paper on effects of potassium levels on orchard grass and red clover in sand culture. The annual breakfast address was given by Harold Evans (North Carolina State College) on the essentiality of cobalt for leguminous plants grown under symbiotic conditions.

Officers elected for 1961 were as follows: chairman, Howard E. Joham (Texas Agricultural Experiment Station); vice-chairman, Robert D. Powell (University of Florida); and secretary-treasurer, Joseph C. O'Kelley (University of Alabama). Elected members of the executive committee are Howard Teas (University of Puerto Rico), Wayne C. Hall (Texas Agricultural Experiment Station), and Robert Burns (U.S. Department of Agriculture, Experiment, Ga.). Teas is the southern section representative to the American Society of Plant Physiologists.

JOSEPH C. O'KELLEY  
*University of Alabama, Tuscaloosa*

### Forthcoming Events

#### July

9–14. Bio-Medical Electronics, 4th intern. conf., New York, N.Y. (H. Schwan, Moore School of Electrical Engineering, University of Pennsylvania, Philadelphia)

9–15. American Library Assoc., annual conf., Cleveland, Ohio. (D. H. Clift, 50 E. Huron St., Chicago, Ill.)

9–15. International Dental Federation,

## TIME SAVERS

**CURRENT CONTENTS OF CHEMICAL, PHARMACO-MEDICAL & LIFE SCIENCES** is a comprehensive weekly service that lists the tables of contents, most of them in advance, of more than 600 primary scientific journals. With this service, the scientist is given a unique, convenient method to scan the title pages of journals of interest to him without physically handling thousands of individual issues per year. Spending about one hour per week, he can easily check off articles of interest. **CURRENT CONTENTS** also provides, when possible, author addresses so scientists can write to colleagues for reprints. In addition, Original Article Tear Sheets are available.

**CURRENT CONTENTS OF SPACE & PHYSICAL SCIENCES** enables scientists to keep up with new developments in such fields as missiles and rockets, electronics, mathematics, computers, physics, nuclear energy and instrumentation. This new weekly service comprehensively reports the contents of more than 500 primary journals—over 100,000 individual articles per year. As a special bonus, all basic chemical journals are covered in this edition of **CURRENT CONTENTS**. Available only to **CURRENT CONTENTS** subscribers is our exclusive Original Article Tear Sheet service, OATS supplies the principal ingredient in the effective utilization of scientific information—prompt and convenient access to original documents. And cost of OATS is lower than hard-to-read photocopies.

Gratis review copies of the above listed services are available upon request.

21-22. World Power Conf. (members only), Moscow, U.S.S.R. (Central Office, 201-2 Grand Buildings, Trafalgar Sq., London, W.C.2, England)

16 JUNE 1961

OFFERS YOU AN  
ELECTRONIC SQUARE WAVE

# STIMULATOR

• FOR EVERY PURPOSE  
• FOR EVERY PRICE RANGE

Study the brief summaries below of the complete line of quality AEL Electronic Square Wave Stimulators designed to meet every requirement of classroom and research laboratory use. You will find the Stimulator that will meet both your budget and technical requirements. AEL Stimulators come to you with a background covering thousands of hours of classroom and laboratory operation.

## model 198 . . . \$95.

### CLASSROOM AND RESEARCH LABORATORY USE

A many-purpose . . . yet inexpensive unit, designed for both classroom and research laboratory use. Undergraduate students find it particularly desirable because of its simple-to-operate controls. However, the ranges of variable stimulus, output and duration also make the "198" attractive for research laboratory use. Produces recurrent or single stimuli. Versatility provided through continuously variable controls. Offers sync-pulse of 10 volts amplitude for use with cathode ray oscilloscopes.

## model 751 . . . \$145.

### CLASSROOM AND RESEARCH LABORATORY USE

Performance-proven over years of service, the "751" offers stepped controls of frequency and duration that permit exact resetting in conducting consistent, repeatable experiments. Straightforward control operation and a wide range of variables make this unit ideal for both student and research laboratory use. Pulse pairs are obtained by combining two Model 751's with a Model 951 Dual-pulse Synchronizer, making it possible to study the refractory cycle of such tissue as nerve, striated muscle and cardiac muscle. A signal magnet output is also provided.

## model 404 . . . \$400.

### ALL-PURPOSE RESEARCH LABORATORY USE

Designed for the physiology laboratory, the "404" provides a wide variety of stimuli. The five modes of operation include . . . SINGLE SHOCKS . . . REPETITIVE STIMULATION . . . SINGLE PAIR OF STIMULI . . . REPETITIVE PAIRS OF STIMULI . . . DIRECT CURRENT STIMULATION. Trains of pulses are produced by coupling two Model 404's. Output: 60 ma at 150V or 9 watts. Stimulus Intensity: 1 millivolt to 150 volts. Stimulus Duration: 10 microseconds to 1 second. Delay: Adjustable from 10 microseconds to 1 second. Stimulus Frequency: 1 every second to 10,000/second.

## model 104-A . . . \$550.

### THE ULTIMATE IN RESEARCH LABORATORY USE

An extremely accurate, all-purpose stimulator, the "104-A" is designed specifically for the most exacting research laboratory use. Six modes of operation include . . . SINGLE SHOCKS . . . REPETITIVE STIMULATION . . . SINGLE PAIRS OF STIMULI . . . REPETITIVE PAIRS OF STIMULI . . . SINGLE TRAINS OF STIMULI . . . REPETITIVE TRAINS OF STIMULI. Utilizing 10-turn linear helipot which are resettable to 0.1 percent, the "104-A" is accurate within five percent across the dial . . . in all ranges. It produces trains of pulses, can be externally or remotely driven and has a 250 volt output.

### ACCESSORIES FOR USE WITH MODEL 104-A & 404 STIMULATORS

#### STIMULUS ISOLATION UNIT . . . model 112

Provides the means of isolating a stimulator pulse from ground reference to reduce ground loop artifacts.

#### PHOTIC STIMULUS ACCESSORY . . . model 127

Provides a source of short duration light flashes at three different intensities and at repetition rates controlled by the stimulator.

Write for detailed literature on each of the above instruments and accessories. Send your request, plus any other information that you may desire, to . . .

One year warranty  
on all models

**American Electronic Laboratories, Inc.**

121 NORTH SEVENTH STREET, PHILADELPHIA 6, PENNA.

Read temperature directly... from  $-100^{\circ}\text{C}$  to  $900^{\circ}\text{C}$  with  $0.25^{\circ}\text{C}$  accuracy! No calculations required!

VERY SPECIAL ease and speed—with outstanding performance to match! This exceptional thermometer gives direct digital reading of temperature...covers an unusually broad range from minus  $100^{\circ}\text{C}$  to plus  $900^{\circ}\text{C}$ , with  $0.25^{\circ}\text{C}$  accuracy. No tedious, time-consuming paperwork. You save minutes...save money, too—thanks to this newly perfected design at a new low price.

For complete information, write for Bulletin ERT

**The EMIL GREINER Co.**  
20-26 N. Moore Street, Dept. 427, New York 13, N. Y.

- High accuracy:  $0.25^{\circ}\text{C}$  or  $0.2\%$ , whichever is greater.
- Each resistance bulb and bridge individually calibrated.
- Vacuum sealed platinum elements and leads in resistance bulb; hermetically sealed head; choice of stainless steel or quartz jacket.
- Plug-in controller accessory with  $0.25^{\circ}\text{C}$  reproducibility.

**Price List:**

<b>T32300</b> Electronic Resistance Thermometer complete, but without Bulb or Controller .....	<b>\$975.00</b>
<b>G 23525D</b> Stainless Steel Bulb only .....	<b>385.00</b>
<b>G 23525E</b> Quartz Bulb only .....	<b>385.00</b>
<b>G 23525F</b> Temperature Controller only .....	<b>112.50</b>

**0.001 CPS  
RESOLUTION  
REAL TIME  
SPECTRUM ANALYZER**

For analysis of:

- seismic waves
- structural vibrations
- heart beats
- flutter phenomena
- underwater sound

This Very Low Frequency Spectrum Analyzer provides up to 1000 line resolution for frequency ranges from 0.1 cps to 0-1000 cps. Analysis time in all frequency ranges is 1 second. Transistorized Models SA-12 and SA-14 will provide expanded frequency range and, with GASL auxiliary equipment, offer power density and normal density capability.

# THE EQUIPHASE<sup>\*</sup> TRIPLE-POINT-OF-WATER CELL

*a convenient standard for  
establishing a fixed  
temperature  
reference point.*

EQUIPHASE Triple-Point-of-Water Cell establishes a reference temperature of 0.01°C with guaranteed accuracy of 0.0005°C. Unaffected by atmospheric pressure, contamination-free, easy and convenient to use. Just 17" high, 8" diameter.

This new laboratory standard establishes the precise point, 0.01°C, where ice, water, and water vapor coexist in equilibrium. The reference temperature point produced by the Equipphase Cell is accurate within 0.0005°C and may be quickly established with a minimum of technique or set-up.

The Equipphase Cell's accuracy cannot be easily duplicated with an ice bath. The triple-point-of-water is a physical constant—so precisely reproducible that it has been recently designated as a defining fixed point for the International Practical Temperature Scale of 1948 by the General Conference on Weights and Measures.

Reliability? Ease of use? Reasonable price? You get all these as well. But even more important—if you must have accuracy, this must be your standard.

Please write today for complete information.

## ONE SOURCE

for all your tissue  
culture apparatus

KONTES—manufactures high quality tissue culture products—designed to meet the requirements of leading tissue culture workers. Tissue Grinders, pipettes, special apparatus and a complete line of flasks—among them:

### 1. KONTES T-SERIES FLASKS

Dam in neck prevents fluid overflow. Pointed end permits fluid removal with minimal cell loss. Available in 4 sizes.

### 2. KONTES INVERTED NECK T-SERIES FLASKS

Similar to regular Kontes T-Series Flasks, except for inverted neck and flat end. Entire floor area can be probed and scraped. 4 sizes.

### 3. KONTES CARREL FLASKS

High quality windows permit optical observation with minimum distortion. Same type modified and used by National Cancer Institute.

### 4. KONTES LEIGHTON TUBE

Cylindrical wall above closed end flattened to form a rectangular plane surface 34 mm. long and 13 mm. wide. This permits preparation of a sponge matrix culture and a 22 x 11 mm. "flying cover-slip" culture simultaneously in the same tube.

*NOW* the accuracy of glass in breakproof Nalgene® graduates

*New Nalgene graduated cylinders feature calibration to best glass standards, in accordance with federal specifications.*

New Nalge techniques give you accuracy never before possible in plastic, or even in glass, because now for the first time graduates can be *molded* to absolute uniformity *every time*. You get finer calibration lines than ever before. Meniscus is flat, easy to read. Non-wetting walls contain and deliver the same amount of solution every time.

Corrosion resistant, of course. Virgin polypropylene throughout, with stable octagonal base. No more loss of valuable contents and no dangerous acid splash through breakage. So next time you break a glass graduate, replace it with Nalgene—complete line of sizes from 25 to 2000 ml. Ask your laboratory supply dealer.

*Nalge makes them unbreakable... and keeps making them better!*

**Accuracy tested, accuracy proved!**

A random sampling by a nationally-known testing laboratory\* shows new Nalgene graduates to be well within National Bureau of Standards Class A specifications for accuracy. Actual calibrations found in tests on 50 ml graduates:

Capacity, ml.	10.00	20.00	30.00	40.00	50.00
Nalgene Instrument No. 12	10.01	19.99	29.86	39.92	50.01
Nalgene Instrument No. 13	10.04	19.99	29.87	39.88	49.92
Nalgene Instrument No. 14	10.07	20.03	29.89	39.87	49.97

\*Name and data on request.

*The Quality Standard of Plastic Laboratory Ware*

# ELECTROLYTIC CONDUCTIVITY EQUIPMENT

## CONDUCTIVITY BRIDGES

Industrial Instruments offers a complete line of electrolytic conductivity bridges for the measurement and control of solution concentration. Standard models are available for use in conductive solutions ranging from distilled water to concentrated acids or alkalis, and in all temperature ranges.

## CONDUCTIVITY CONTROLLERS

For steam generation, water purification, chemical processing general lab work, and wherever continuous indication and/or control of solution conductivity is required Industrial Instruments has a wide line of practical instruments designed specifically for the job. Also available are conductivity recorders in circular and strip-chart, single and multi-point types as well as battery-operated units.

## CONDUCTIVITY CELLS

A single source for all your cell needs. Body materials in the widest range of materials to meet every requirement for temperature, pressure and corrosion resistance. Complete selection of cells designed to meet your application requirements...no universal compromises. Nickel platinum, graphite, gold or tin electrode materials as well as a comprehensive selection of cell constants and ranges for every measurement application.

Write for your personal copy of our new Catalog #23.

# ISOTOPES for Your Development Work

Oak Ridge National Laboratory offers more than 300 radioactive and stable isotope products.

## RADIOISOTOPES

**Processed Solutions**—90 processed radioisotopes may be obtained, including many carrier-free and high specific activity products.

**Now Available**—Technetium at \$100 per gram (as element or ammonium pertechnetate); calcium-47, with less than 5% Ca-45, at \$200 per mc; iodine-125 in research quantities; iodine-124 and iodine-126 are available on special request.

## STABLE ISOTOPES

More than 200 stable isotopes available from 50 elements....Chemical processing and target fabrication services also offered.... Ultra-high isotopic purity in a number of isotopes.

For information or literature, write to: Isotopes Division, Oak Ridge National Laboratory, P. O. Box X, Oak Ridge, Tennessee.

## Available Now Complete "Animal Care Equipment" Brochure

Ask your Aloe Scientific Representative for a copy of this brochure, or — fill in the form below, — clip and mail to the address indicated.

Included in this brochure are products born of long experience in the field — selected, tested and proved with the Animal Care Requirements in mind.

Thoroughly presenting the current available equipment, the brochure includes —

- Cages — all types plus custom availability
- Cage Stands and Racks
- Feeders and Watering Services
- Dissecting and Operating Equipment
- Animal Balances and Holders
- Clippers and I. D. Equipment

Complete equipment — with the assurance that your related needs can be readily integrated and filled. Complete stock of Laboratory Equipment, Apparatus, Reagents — from Aloe Scientific with fully stocked Divisions Coast to Coast.

## GRASSLANDS

Editor: Howard B. Sprague 1959

6" x 9", 424 pp., 37 illus., index, cloth.  
Price \$9.00, AAAS members' cash or-  
ders \$8.00. AAAS Symposium Volume  
No. 53.

This volume is intended as a review of  
knowledge on many aspects of grass-  
lands resources. The 44 authors were  
selected by their own professional col-  
leagues as being particularly competent  
to present the respective subjects.  
Thirty-seven papers are arranged under  
these chapter headings:

1. Sciences in Support of Grassland Research
2. Forage Production in Temperate Humid Regions
3. Engineering Aspects of Grassland Agriculture
4. Forage Utilization and Related Animal Nutrition Problems
5. Evaluation of the Nutritive Significance of Forages
6. Grassland Climatology
7. Ecology of Grasslands
8. Range Management

# PURE DISTILLED WATER by design

Stokes Automatic Laboratory Water Stills produce distilled water that's completely free of bacteria, pyrogens, and minerals. They give you distillate that contains less than 2 parts per million impurities . . . purer than the standards set by United States and British Pharmacopoeia.

Stokes stills give you control of purity at every step of the distillation process:

1. preheating removes dissolved gases in feed water

2. gentle boiling action practically eliminates water entrainment in steam

3. triple baffling traps any and all particles . . . permits only the steam to enter condenser tube.

These features add up to distilled water of highest purity!

Rated capacities from 1/2 to 100 gallons per hour in electric, gas and steam models.

Specify high-purity Stokes Stills at your local Laboratory Supply House.
