UNIMAT
 FOR RESEARCH LABS & MODEL SHOPS

Engineers and designers supplement their sketches and blueprints with machined-to-scale models anybody can "read". Technicians in research labs turn out machine work with amazingly small tolerances, down to .0005-of-an-Inch! Manufacturers developing new products find UNIMAT indispensable in the mock-up shop. A complete machine shop in miniature, UNIMAT converts from lathe to drill press, tool and surface grinding machine, vertical milling machine, or polisher/grinder—in seconds! Hundreds of efficiency-minded companies, hospitals and government agencies are now putting their UNIMATS through a-thousand-and-one paces. So can you!

Gives reproducible results, bottle after bottle

Take one set of results you got with Du Pont Glacial Acetic Acid Reagent. You can change bottles, shipments or locality, and you'll reproduce the same results—time after time! That's because Du Pont continuously runs this reagent through 113 separate analytical tests to keep it uniform for your most stringent requirements.

It's of uniformly high purity, too, exceeding American Chemical Society requirements. And you get the convenience of single-trip cartons, dripless sleeves, safety grips on 5-pint bottles and color-coded caps and labels.

Du Pont's family of reagents includes Nitric, Sulfuric, Hydrochloric and Glacial Acetic acids, and Ammonium Hydroxide. They're readily available all over the country. Ask your local laboratory supply house or write for list of suppliers. Industrial and Biochemicals Department, N-2545 S, Wilmington 98, Delaware.

Mighty Useful

EA Recording DC MILLIAMMETERS DC MICROAMMETERS

For a thousand and one uses in every field of research and production of which the following are typical:

Performance tests

Life tests

Tracer element studies

Photronic measurements

Medical electronics

Quality control in production

On some of the above, the recorder is used direct. On others it operates in conjunction with additional equipment.

DC Range	Approximate Input Resistance	Response
0-50 (A) Microamperes	200 ohms	½ sec.
0-1 Milliamperes	1400 ohms	½ sec. (B)
(A) Power required: 120 volts, 60 cycles. (B) With 50,000 ohms in external circuit.		

Here's a versatile team of direct writing instruments that combines extreme sensitivity with simplicity of design and ruggedness of construction for long, trouble-free life. The simple, direct-writing movement eliminates maintenance associated with servo or linkage driven systems.

Like all E-A recording meters, E-A Milliammeters and E-A Microammeters are guaranteed for two years.
