"The First" and "Still First". Since its introduction Beckman's Model DU has maintained its position as the "Number One Spectrophotometer" in the laboratory. The A.C. line operated unit eliminates storage batteries and dry cells and provides insured current stability. When equipped with an ultraviolet accessory set it covers a range from 210 mμ to 1000 mμ. Continued research has extended its utility by providing accessories for flame photometry, fluorescence analysis, diffuse reflectance, temperature control of cell compartment, spectral energy recording and a wide range of cell compartments and cells which accommodate many types of liquid and gas samples.

If you are considering the purchase of a spectrophotometer request bulletins 733B and 736, "Consider the Facts" and "Buy Beckman".
