

**Outstanding...  
IN EVERY RESPECT**

**THE Vactronic 450 LINE**

*Specially designed for high vacuum applications in research, production and testing.*

Kingpin of the Vactronic 450 Line, the HVE-450, the most compact evaporator now available... providing clean, convenient and effective control of varied high vacuum operations.

Also available from Vactronic... the HVS-450 precision-built, high efficiency Vacuum Station and the dependable HVBS-450 Basic Vacuum System, furnishing Manual or Pneumatic control... a complete complement of the following high vacuum components separately available:

HVP-450 Oil Vapor Diffusion Pump, CBF-450 Baffle, CVP-450 Cold Trap, CVS-450 and AVS-450 High Vacuum Valves, and RGH-450-NP Roughing Manifold.

## de Fonbrune Micromanipulator — Has Smooth, Uniform Pneumatic Movement

### Improved de Fonbrune Micro-Forge With Binocular Body

Specifically developed for use in the fabrication of simple and intricate micro-tools of glass or metal under controlled conditions. Use of the de Fonbrune micro-forge is recommended with any type micromanipulator. The forge is now built with binocular stereoscopic microscope. With this modification, the image is observed erect — not inverted — in three dimensions, an important factor in rapid, accurate work.

### Affords new simplicity and flexibility for micro-studies in biological or chemical technics

The de Fonbrune micromanipulator has proved to be of great value in micro-studies in many fields. In biology the instrument is used in cell dissection and isolation . . . micro-injection and operation on protozoa . . . pH studies on living cells . . . isolation and transfer of single bacteria, etc. It has proved equally serviceable in study of fibers and yeast cells, in investigating oils, rust deposits, colloidal, and other materials.

Manufactured under exclusive license of the French patents, the instrument consists of a manipulator and receiver. Use with any microscope . . . arranged for right or left hand operation. The micro-tool is mounted on the receiver; impulses from the manipulator are transmitted to the tool through sensitive pneumatic membranes. Within a range of 3 mm, the micro-instrument may be moved in any plane or angle by a single control. Ratio of displacement of control lever and micro-tool may be adjusted from 1:50 to 1:2500.

Write for prices and descriptive bulletin T114.

# NEW Microtiter\* SAVES TIME AND REAGENTS

Now eight times as many serological and other dilutions may be performed with the same amount of reagents formerly used.

Because our Microtiter kit utilizes individually calibrated spiral loops and pipette droppers, you get fast and accurate titrations. What's more, the loop handles are tapered so that eight may be used simultaneously.

Sixteen plates, half conical bottoms and half radial bottoms—or sixteen of either type—are supplied with each Microtiter kit at the same price. The two types of plates permit complement fixation, hemagglutination, hemagglutination inhibition, and metabolic inhibition tests.

Versatility, durability and simplicity and ease of cleaning make the Microtiter kit ready for use any time, anywhere in the world without ancillary equipment. The storage case is heat and acid resistant, and each half may be used as a wash rack for the plates and cleaning solutions.

## CBS TYPE 7818 PHOTOMULTIPLIER

For Gamma-Ray Spectrometers,  
Flying Spot Scanners, and Photo-  
metric Instruments

Sensitive to the blue region of the spectrum, this new 3-inch diameter, 10-stage, end-on tube has a plano-concave faceplate to insure uniform sensitivity across its face. Focusing is accomplished by means of a separate electrode to optimize photoelectron collection and to improve resolution.

The tube's linear multiplier structure provides short transit-time spread and fast rise time; shock and vibration specifications of the rugged multiplier structure are guaranteed by CBS.

The 7818 is one of CBS' complete line of photomultipliers; a catalog of detailed specifications is available on request.

Engineers and Physicists: If you are experienced in electron optics or electronics research and development we invite you to investigate our employment openings. An Equal-Opportunity Employer.
