

Glen Canyon dam: diversion tunnel, *left*; construction site, *right*. [U.S. Bureau of Reclamation, by A. E. Turner]

128th Annual Meeting

There's still gold in Colorado's "shining mountains," but it's a kind of wealth the '59ers did not dream of. It took a scientist, indifferent to the lure of placer gold, to discern the source of Western economic growth. John Wesley Powell boated down the wild Colorado in 1869 and lived to spend the rest of his life reminding the nation that not gold or land but water is the real wealth of the West.

Water, land, and climate are major themes of the AAAS annual meeting in Denver in December. The interdisciplinary symposium in the social sciences, **Water and Climate**, convenes Thursday morning, 28 December, as one of the AAAS general sessions. Among other subjects, the symposium will take a look at the figures on whether cloud seeding has increased average rainfall, whether rainfall is related to meteor showers, and what the prospects are for hurricane control and man-made weather over large areas. **Water Improvement**, a general session symposium on Saturday, 30 December,

will cover such subjects as electrochemical demineralization of water and new dimensions in pollution research.

The Colorado River's Upper Basin is a giant laboratory backdrop for the symposium on **Land and Water Use** cosponsored by the Agriculture and Geology sections (27, 28, 29 December). Here, in the last U.S. wilderness, high scalars are blasting the red-rock canyon walls and contractors are pouring concrete for three great Bureau of Reclamation dams. Glen Canyon dam (photo, *right*) will add 3.6 billion kilowatt hours annually to the West's great wealth of low-cost hydroelectric power. With Flaming Gorge and Navajo dams, Glen Canyon will store water of the fluctuating Colorado for Upper Basin states and may help ease such clashes as *Arizona vs. California*, a bitter water dispute that has been before the Supreme Court since 1952 and brought the Arizona National Guard out in 1935 to halt construction of the Los Angeles aqueduct. The new Glen Canyon bridge, highest steel arch bridge in the

U.S., is now a link in U.S. highway 89. Underneath, the "old red bull" churns through two half-mile diversion tunnels blasted through each side of the canyon (photo, *left*).

You are likely to hear a good deal at the land and water symposium about what these dams will mean for industrial development in a wilderness that holds 90 percent of U.S. uranium deposits and 200 other minerals, for the poverty-stricken Navajos, and for the competing uses of western land. The reporters include W. I. Palmer, assistant commissioner, U.S. Bureau of Reclamation, and L. B. Leopold, chief hydraulic engineer, U.S. Geological Survey.

You may also hear something about how Denver is dropping a tunnel into the heart of a mountain to bring 14 billion gallons of Blue River water each day to its faucets, and about the plan to tunnel under the Continental Divide to bring water from Frying Pan and Roaring Fork rivers on the western slope to the dry Arkansas valley in eastern Colorado.

BARNSTEAD MIXED-BED DEMINERALIZERS

Illustrated: Barnstead MM-3, Mixed-Bed Demineralizer installed at General Dynamics Corporation's Electric Boat Division at Groton, Conn. Demineralized Water is used in atomic energy experimental work. Flow rate is 300 G.P.H.

UP TO
5000 G.P.H.
BUILT TO LAST
30 YEARS
OR MORE

Linking hands with America's dynamic industries to keep America strong, Barnstead research has pioneered standards of water purity to a degree not possible a decade ago . . . not possible even three months ago. Nuclear, Electronics, missiles, atomic energy, radar, chemicals, — the top names in our technological advancement look to Barnstead for mineral-free water required to make precision specifications a reality..

Barnstead engineers are specialists in PURE WATER. Barnstead is the only company that builds a complete line of both Stills and Demineralizers. Frequently, both systems of water purification, plus other specialized equipment, are combined to produce the kind of purity needed for a specific operation. Isn't this the kind of unbiased experience you would like to have "on call"? Why not contact Barnstead today!

Program Summary

Geology and Geography

Tuesday 26 December

Ground Water Problems in the Rocky Mountains and Great Plains District, Part I. Joint symposium of AAAS Section E—Geology and Geography and the Geological Society of America, cosponsored by the American Geophysical Union. Arranged by Theodore R. Walker, University of Colorado. William G. Weist, Jr., U.S. Geological Survey, Denver, will preside. Ground water in Colorado—its importance during a national emergency, Paul T. Voegeli, Sr. How much do we know about ground water in the Colorado High Plains?, Harold E. McGovern and Donald L. Coffin. Artesian aquifers of the Denver Basin, Colorado, George H. Chase. Legal and management problems related to the development of an artesian ground water reservoir, Edward A. Moulder. Engineering and geology as an aid in solving ground water litigation, Edward D. Jenkins.

Wednesday 27 December

General Session for Contributed Papers in Geology.

Ground Water Problems in the Rocky Mountains and Great Plains District, Part II. James H. Irwen, U.S. Geological Survey, Denver, will preside. Management of radioactive waste in a basalt terrane, Idaho, Raymond L. Nace. Geological aspects of the Rocky Mountain Arsenal disposal well, Louis J. Scopel. The measurement of geohydrologic features affecting waste movement at Hanford, Washington, Randall E. Brown and John R. Raymond. Artificial ground water recharge: an aid to better water management, Dean O. Gregg. Pond water for domestic use, R. W. Stallman. Hydrologic significance of six core holes in carbonate rocks, Nevada test site, Stuart L. Schoff and Isaac J. Winograd.

Section E Dinner. John M. Parker, Kirby Petroleum Company, Denver, arranger.

Retiring Vice President's Address, Section E. Richard J. Russell, director, Coastal Studies Institute, Louisiana State University, and vice president for Section E, will preside. Some attributes of numerical data in geology, William C. Krumbein, professor of geology, Northwestern University, retiring vice president for Section E.

Thursday 28 December

Section E Committee Meeting.

Association of American Geographers, Great Plains—Rocky Mountain Division

Program chairman: M. John Loeffler, University of Colorado.

Tuesday 26 December

Contributed and Invited Papers in Geography, I. Program of the Association of American Geographers, Great Plains—Rocky Mountain Division, cosponsored by Section E. Arranged by Karl Stacey, Kansas State University. Alan D. Tweedie, Newcastle University College, New South Wales, Australia, and University of Colorado, will preside. Cascade Alp slopes and Gipflerfluren as clima-geomorphic phenomena, Will F. Thompson. Agricultural frontier in northern Alberta: a preliminary look, Thomas M. Griffiths and Clark N. Crain. The proportional relief landform map, Merrill K. Ridd. Water balance and the history of ancient Lake Bonneville, Vasyly M. Gvodetsky and H. Bowman Hawkes.

Wednesday 27 December

Contributed and Invited Papers in Geography, II. Arranged by M. John Loeffler and the department of geography, University of Colorado. Col. Joseph P. Hereford, U.S. Air Force Academy, Colorado Springs, will preside. Population growth in California: a problem in distribution, Howard F. Gregor. Population change, resource use, and income distribution, Calvin Patton Blair. Recognizing and meeting the map requirements of the population explosion in the western United States, John C. Sherman. Colorado oil shale: an undeveloped strategic resource, Harold A. Hoffmeister.

Contributed and Invited Papers in Geography, III. Arranged by M. John Loeffler and the department of geography, University of Colorado. John C. Sherman, department of geography, University of Washington, will preside. Modern Los Angeles, creature of the population explosion, Howard J. Nelson. The impact of an exploding population on a semideveloped state: the case of Arizona, Andrew W. Wilson. The changing pattern of population distribution in Texas, Stanley A. Argin-gast. Implications of land inventory

programs in Chile, Donald D. MacPhail.

Geographers' Dinner. Arranged by M. John Loeffler, University of Colorado.

Thursday 28 December

Contributed and Invited Papers in Geography, IV. Arranged by M. John Loeffler and the department of geography, University of Colorado. Karl Stacey, Kansas State University, will preside. The impact of growing metropolitan areas on water resources planning, Robert S. Collins. The Piedmont: Colorado's expanding core, M. John Loeffler and Albert W. Smith. Area and people in political geography, Joseph Velinkonja. Water problems in eastern Australia, Alan D. Tweedie.

National Geographic Society

Saturday 30 December

Annual Lecture and Color Film of the National Geographic Society. Margaret Mead, member AAAS board of directors, will preside. The sacred well of Chichén Itzá, Matthew W. Sterling, research associate, Smithsonian Institution; Committee for Research and Exploration, National Geographic Society.

National Speleological Society

Program chairman: Brother G. Nicholas, F.S.C., University of Notre Dame.

Friday 29 December

Speleogenesis. Program of the National Speleological Society, cosponsored by AAAS Section E—Geology and Geography, and the Geological Society of America. Opportunities for geological research in caves, William E. Davis. Speleogenesis in the Marble Mountain area, Colorado, Donald Davis. Geology and speleogenesis of Porcupine Cave, Utah, Jon Haman. Crystal wedging as

Program summaries for the chemistry and mathematics sections appeared in the 27 October issue of *Science*, and for the physics and astronomy sections, in the 3 November issue. Program summaries for other sections will appear in subsequent issues.

a factor in cavern breakdown, William B. White and Elizabeth L. White.

General Session. Brother G. Nicholas, presiding. Notes on Colorado cave insects, Robert Ayre. Origin and development of lava tubes, William R. Halliday. Recent progress in Montana speleology, Howard McDonald. Preview of 1962 Black Hills meeting of NSS, John Streich.

Agriculture

Land and Water Use with Special Reference to Mountain and Plains Regions. Symposium in four sessions, arranged by D. Wynne Thorne, Utah State University. One session jointly arranged by Terah L. Smiley, University of Arizona, and D. Wynne Thorne, Utah State University. Program of AAAS Section O—Agriculture, cosponsored by AAAS Section E—Geology and Geography, and the Committee on Desert and Arid Zones of the Southwestern and Rocky Mountain Division, and by the following societies: American Dairy Science Association, American Farm Economic Association, American Geophysical Union, American Society of Agricultural Engineers, American Society of Agronomy, American Society of Animal Production, American Society of Range Management, Ecological Society of America, Gamma Sigma Delta, Society of American Foresters, Soil Conservation Society of America, Wilderness Society, Wildlife Management Institute, Wildlife Society.

Wednesday 27 December

Part I: Land and Water Resources. Roland Renne, president, Montana State University, will preside. Population demands for land and water resources of the western hinterland, S. C. Smith. Land resources and potential use, R. D. Hockensmith. Water resources, development and uses, W. I. Palmer. Public grazing lands in the economy of the West, M. L. Upchurch.

Part II. Optimum Uses for Resources. E. F. Frolik, dean, College of Agriculture, University of Nebraska, will preside. Criteria and planning for optimum use, E. N. Castle. Economic priorities on water use in arid regions, Nathaniel Wollman. Agriculture as a competitive segment of multiple use, B. Delworth Gardner. Recreation as a competitive segment of multiple use, Marion Clawson.

New colloid mill for 25 to 75 ml batches

MINI-MILL macerates, homogenizes, emulsifies... for research in cosmetics, pharmaceuticals, paint, resins, coatings, polish, ink, soap... also bacteria, tissues, cells.

MINI-MILL provides intense mechanical shear by blades on the bottom of the rotor (see drawing) and cutting edges of serrations on rotor and stator, also hydraulic shear as material is forced through a fine gap, 3 to 125 mils, adjustable while running. Self circulating. Also used with 120 μ diam. glass beads for further breakdown.

Rotor speed: 0 to 22000 rpm with variable transformer. Mixing cups are immersed in cooling water in a steel container (not illustrated). Micrometer gap adjustment. Contact surfaces are stainless steel. Ports for introducing or removing material without removing cup... also for steam or inert gas. Quickly disassembled for sterilization. Overall height—approx. 15".

MICRO-MILL for 150 ml to 2 liters. Same principle as MINI-MILL but with 1 gal. hopper with recirculating pipe, jacket and removable internal cooling coil.

Send for free catalogs

GIFFORD-WOOD CO.

Dept. S11 • Eppenbach Division • Hudson, N. Y.

Eppenbach colloid mills, homogenizers, homogenizer-mixers... for laboratory, pilot-plant and large-scale production.

Thursday 28 December

Part III: Interdisciplinary Symposium in the Social Sciences: Water and Climate. Joint program of AAAS Section O—Agriculture and the Committee on Desert and Arid Zones Research of the AAAS Southwestern and Rocky Mountain Division, cosponsored by Sections E—Geology and Geography, K—Social and Economic Sciences, M—Engineering, and P—Industrial Science, the American Meteorological Society, and the American Geophysical Union. Arranged by Terah L. Smiley, University of Arizona, and Wynne Thorne, Utah State University. Terah L. Smiley will preside. A meteorologist looks at hydroclimatology, Paul R. Julian. Capture of additional water for increasing supplies, John W. Harshbarger. Weather modification, Earl G. Droessler. Legal aspects of a national water policy, Morris K. Udall.

Friday 29 December

Part IV: Impact of Public Policy on Land and Water Use. W. E. Morgan, president, Colorado State University, will preside. The government's responsibility for land and water, L. B. Leopold. Problems associated with wilderness and other reserves of public lands, C. R. Gutermuth. Problems growing out of the spaciousness of the West, M. M. Kelso. Public and/or private investment in resource development, W. E. Folz.

Part V: Projecting Management Programs. R. E. Hodgson, Director, Animal Husbandry Research Division, Agricultural Research Service, Beltsville, Maryland, will preside. Providing for multiple use in managing land and water, J. A. Hopkin. Modifying management and vegetation of watershed areas for improved water yields, F. H. Kennedy. Management associated with complex use for wildlife, livestock, and recreation, A. L. McComb. Managing private lands in relation to changing uses of public lands, N. Keith Roberts.

Saturday 30 December

Water Improvement, Part I. Symposium of the Committee on Desert and Arid Zones Research of the AAAS Southwestern and Rocky Mountain Division, cosponsored by AAAS Section O—Agriculture. Arranged by Terah L. Smiley, University of Arizona, and Joseph A. Schufle, New Mexico Institute of Mining and Technology. Terah L. Smiley will preside. Contamination of underground water—vicinity of Denver,

FALLOUT

A science supplement
from Cenco Educational Films

Fallout—the sometimes feared and often misinterpreted phenomena of nuclear radiation—is discussed simply and completely in this topical 16 mm sound, color film.

Produced especially for high school and junior college classes, this dramatic 15 minute film pinpoints often misunderstood topics such as fallout radiation patterns; Alpha, Beta and Gamma radiation; Carbon-14 and Strontium-90; and radiation's genetic effects on man's future development and environment.

Produced in collaboration with Dr. S. Allison of The Enrico Fermi Institute of Nuclear Studies, FALLOUT is a timely film that treats all fallout radiation and its effect in a simple, step-by-step manner.

Color price for each film is \$150, black and white, \$75. For further details contact your nearest Cenco branch office or write direct for Booklet 504.

CURRENT CONTENTS OF CHEMICAL, PHARMACO-MEDICAL & LIFE SCIENCES is a comprehensive weekly service that lists the tables of contents, most of them in advance, of more than 600 primary scientific journals. With this service, the scientist is given a unique, convenient method to scan the title pages of journals of interest to him without physically handling thousands of individual issues per year. Spending about one hour per week, he can easily check off articles of interest. **CURRENT CONTENTS** also provides, when possible, author addresses so scientists can write to colleagues for reprints. In addition, Original Article Tear Sheets are available.

CURRENT CONTENTS OF SPACE & PHYSICAL SCIENCES enables scientists to keep up with new developments in such fields as missiles and rockets, electronics, mathematics, computers, physics, nuclear energy and instrumentation. This new weekly service comprehensively reports the contents of more than 500 primary journals—over 100,000 individual articles per year. As a special bonus, all basic chemical journals are covered in this edition of **CURRENT CONTENTS**. Available only to **CURRENT CONTENTS** subscribers is our exclusive Original Article Tear Sheet service, OATS supplies the principal ingredient in the effective utilization of scientific information—prompt and convenient access to original documents. And cost of OATS is lower than hard-to-read photocopies.

Gratis review copies of the above listed services are available upon request.

tern. Geophysical Year/Intern. Geophysical Cooperation-1959 Symp., Nice, France. (A. H. Shapley, URSI World-Wide Soundings Commission, Central Radio Propagation Laboratory, Natl. Bureau of Standards, Boulder, Colo.)

12-14. Association for Computing Machinery, eastern joint computer conf., Washington, D.C. (B. Oldfield, I.B.M. Corp., 326 E. Montgomery, Rockville, Md.)

12-15. American Soc. of Agricultural Engineers, Chicago, Ill. (J. L. Butt, ASAE, 420 Main St., St. Joseph, Mich.)

12-19. Latin American Congr. on Microbiology, 2nd, San Jose, Costa Rica. (J. de Abate, Apartado 1404, San Jose)

13. American Acad. of Arts and Sciences, Brookline, Mass. (J. L. Oncley, 280 Newton St., Brookline 46)

15-16. Oklahoma Acad. of Science, Stillwater. (D. Buck, Northern Oklahoma Junior College, Tonkawa)

17-18. International Congr. of Comparative Pathology, 9th, Paris, France. (L. Grollet, Comité International Permanent des Congrès de Pathologie Comparée, 63 Avenue de Villiers, Paris 17*)

19-23. Inter-American Congr. of Psychology, 7th, Monterrey, Mexico. (G. M. Gilbert, Psychology Dept., Long Island Univ., Brooklyn 1, N.Y.)

22-29. Plant Tissue and Organ Culture, intern. symp., New Delhi, India. (P. Maheshwari, Univ. of Delhi, Delhi)

26-28. History of Science Soc., annual, Washington, D.C. (J. C. Greene, 1121 Iowa Ave., Ames, Iowa)

26-31. American Assoc. for the Advancement of Science, annual, Denver, Colo. (R. L. Taylor, AAAS, 1515 Massachusetts Ave., NW, Washington 5)

The following 35 meetings are being held in conjunction with the AAAS annual meeting.

AAAS Southwestern and Rocky Mountain Div., Committee on Desert and Arid Zones Research (M. G. Anderson, University Biological Station, Pulston, Mich.). 26-31 Dec.

Alpha Epsilon Delta (M. L. Moore, 7 Brookside Circle, Bronxville, N.Y.). 28 Dec.

American Assoc. of Clinical Chemists (R. L. Dryer, State Univ. of Iowa, Dept. of Biochemistry, Iowa City). 26-27 Dec.

American Astronautical Soc. (J. Campbell III, R.C.A., Front and Cooper Sts., Bldg. 10-7, Camden, N.J.). 26-30 Dec.

American Astronomical Soc. (H. J. Smith, Yale Observatory, 135 Prospect St., New Haven, Conn.). 27-30 Dec.

American Economic Assoc. (J. W. Bell, Northwestern Univ., Evanston, Ill.). 26 Dec.

American Educational Research Assoc. (G. T. Buswell, 1201 16 St., NW, Washington 6). 30 Dec.

American Meteorological Soc. (J. M. Austin, Dept. of Meteorology, Massachusetts Inst. of Technology, Cambridge 39). 26-31 Dec.

American Nature Study Soc. (B. Schultz, Dept. of Biology, Western Michigan Univ., Kalamazoo). 26-30 Dec.

American Physiological Soc. (R. G. Daggs, APS, 9650 Wisconsin Ave., Washington 14). 28 Dec.

10 NOVEMBER 1961

AEL OFFERS YOU AN ELECTRONIC SQUARE WAVE **STIMULATOR**

• FOR EVERY PURPOSE
• FOR EVERY PRICE RANGE

Study the brief summaries below of the complete line of quality AEL Electronic Square Wave Stimulators designed to meet every requirement of classroom and research laboratory use. You will find the Stimulator that will meet both your budget and technical requirements. AEL Stimulators come to you with a background covering thousands of hours of classroom and laboratory operation.

model 198 . . . \$95.

CLASSROOM AND RESEARCH LABORATORY USE

A many-purpose . . . yet inexpensive unit, designed for both classroom and research laboratory use. Undergraduate students find it particularly desirable because of its simple-to-operate controls. However, the ranges of variable stimulus, output and duration also make the "198" attractive for research laboratory use. Produces recurrent or single stimuli. Versatility provided through continuously variable controls. Offers sync-pulse of 10 volts amplitude for use with cathode ray oscilloscopes.

model 751 . . . \$145.

CLASSROOM AND RESEARCH LABORATORY USE

Performance-proven over years of service, the "751" offers stepped controls of frequency and duration that permit exact resetting in conducting consistent, repeatable experiments. Straightforward control operation and a wide range of variables make this unit ideal for both student and research laboratory use. Pulse pairs are obtained by combining two Model 751's with a Model 951 Dual-pulse Synchronizer, making it possible to study the refractory cycle of such tissue as nerve, striated muscle and cardiac muscle. A signal magnet output is also provided.

model 404 . . . \$400.

ALL-PURPOSE RESEARCH LABORATORY USE

Designed for the physiology laboratory, the "404" provides a wide variety of stimuli. The five modes of operation include . . . SINGLE SHOCKS . . . REPETITIVE STIMULATION . . . SINGLE PAIR OF STIMULI . . . REPETITIVE PAIRS OF STIMULI . . . DIRECT CURRENT STIMULATION. Trains of pulses are produced by coupling two Model 404's. Output: 60 ma at 150V or 9 watts. Stimulus Intensity: 1 millivolt to 150 volts. Stimulus Duration: 10 microseconds to 1 second. Delay: Adjustable from 10 microseconds to 1 second. Stimulus Frequency: 1 every second to 10,000/second.

model 104-A . . . \$550.

THE ULTIMATE IN RESEARCH LABORATORY USE

An extremely accurate, all-purpose stimulator, the "104-A" is designed specifically for the most exacting research laboratory use. Six modes of operation include . . . SINGLE SHOCKS . . . REPETITIVE STIMULATION . . . SINGLE PAIRS OF STIMULI . . . REPETITIVE PAIRS OF STIMULI . . . SINGLE TRAINS OF STIMULI . . . REPETITIVE TRAINS OF STIMULI. Utilizing 10-turn linear helipot which are resettable to 0.1 percent, the "104-A" is accurate within five percent across the dial . . . in all ranges. It produces trains of pulses, can be externally or remotely driven and has a 250 volt output.

ACCESSORIES FOR USE WITH MODEL 104-A & 404 STIMULATORS

STIMULUS ISOLATION UNIT . . . model 112

Provides the means of isolating a stimulator pulse from ground reference to reduce ground loop artifacts.

PHOTIC STIMULUS ACCESSORY . . . model 127

Provides a source of short duration light flashes at three different intensities and at repetition rates controlled by the stimulator.

Write for detailed literature on each of the above instruments and accessories. Send your request, plus any other information that you may desire, to . . .

One year warranty
on all models

27-29. American Geophysical Union, 1st Western natl., Los Angeles, Calif. (A. N. Sayre, U.S. Geological Survey, Washington 25)

27-29. American Physical Soc., Los Angeles, Calif. (K. K. Darrow, 538 W. 120 St., New York 27)

27-29. Western Soc. of Naturalists, Eugene, Ore. (I. A. Abbott, Hopkins Marine Station, Pacific Grove, Calif.)

27-30. Institute of Mathematical Statistics, annual, New York, N.Y. (D. C. Riley, American Statistical Assoc., 1757 K St., NW, Washington 6)

28-29. American Chemical Soc., Div. of Industrial and Engineering Chemistry, Newark, Del. (Scientific Liaison Office, Natl. Research Council, Sussex Dr., Ottawa, Canada)

28-29. Linguistic Soc. of America, annual, Chicago, Ill. (A. A. Hill, Box 7790 University Station, Austin 12, Texas)

28-29. Northwest Scientific Assoc., Spokane, Wash. (E. J. Larrison, Univ. of Idaho, Moscow)

28-30. Archaeological Inst. of America, Detroit, Mich. (L. A. Campbell, 5 Washington Square N., New York 3)

28-30. Phi Delta Kappa, Bloomington, Ind. (R. S. Merkel, Indiana Central College, Indianapolis 27)

(See issue of 20 October for comprehensive list)

NOW...7 MORE VALUES FOR CONTROL OF YOUR CLINICAL CHEMISTRY DETERMINATIONS

Hyland Clinical Chemistry Control Serums are useful as CONTROLS, run in parallel with unknowns as checks on equipment, reagents and technic, or as STANDARDS to calibrate equipment and standardize reagents. Prepared from freshly drawn human blood, they have the same natural constituents as your specimens. Freeze-dried for STABILITY, they are prepared for use simply by the addition of distilled water. After reconstitution they remain stable for five days (except for glucose) when stored under refrigeration.

Supplemental Normal Clinical Chemistry Control Serum: 5 cc vials, box of 3 vials (list no. 36-935) at \$5.50. Abnormal Clinical Chemistry Control Serum: 5 cc vials, box of 3 vials (list no. 36-835) at \$5.50 or 6 vials (list no. 36-865) at \$9.00. Normal Clinical Chemistry Control Serum: 5 cc vials, box of 6 vials (list no. 36-905) at \$9.00.

**HYLAND
LABORATORIES**

4501 Colorado Blvd., Los Angeles 39, Calif.

Branch Office: 160 Lockwood Ave., Yonkers, New York

PROVIDING NORMAL VALUES FOR:
Albumin
Calcium
Chloride
Cholesterol
Creatinine
Globulin
Glucose
Non-protein Nitrogen
Phosphorus, inorganic
Potassium
Protein-bound Iodine
Protein, total
Sodium
†Transaminase (SGO-T)
Urea Nitrogen
Uric Acid

PROVIDING ELEVATED VALUES FOR:
†Amylase
†Alkaline Phosphatase
Bilirubin
Calcium
Chloride
Creatinine
Glucose
†Lactic Dehydrogenase
Non-protein Nitrogen
Phosphorus, inorganic
Potassium
Protein-bound Iodine
Sodium
†Transaminase (SGO-T)
Urea Nitrogen
Uric Acid

†Component represents actual enzyme activity
