Esperantists

The 46th annual international congress of Esperantists was held from 6 to 12 August 1961 in Harrogate, England, with an attendance of 1700 members from 35 countries. Lord Boyd-Orr was the "Honora Protektanto." Hideo Yagi, president of Okayama University and dean of its medical school, opened the congress and presided over its formal sessions. Because this year a "festival of art" was to illustrate the wide capability of Esperanto, there was much less emphasis than usual on the interests of the technical and other organizations which regularly meet in conjunction with the congress. However, the Internacia Scienca Asocio Esperantista held one open session, on the popular subject "Why travel to other planets?" A relevant lecture on life in outer space was also given.

For the week of business sessions and recreation and for Catholic and Protestant services on Sunday, only Esperanto was used, with no translation into any other language.

The 47th annual international congress will be held in August 1962, in Copenhagen, Denmark.

THERMOLYNE TYPE 2000

Just dial desired temperature. This electric furnace, specifically designed for laboratory use, automatically holds preset temperatures within close limits by means of an electronic potentiometer control system. Practically immune to vibration, dust, dirt . . . Will fail "safe" in case of malfunction . . . long-life heating elements embedded in interchangeable plates that give fast, even heat distribution. Chamber surrounded by high-grade, multiple layer type insulation. Chamber size 4" x 3 3/4" x 9". Operating temperatures to 2000°F continuous, 2150°F intermittent. 115 and 230 volts. Price complete, \$257.50. Write for literature and name of nearest dealer.
