## HONEYWELL PHOTO EQUIPMENT ... THE PROVEN WAY TO FINE RESULTS

The photomicrographs at upper right are of an adrenal cortical carcinoma at 100x and 400x magnification. They were taken with the setup pictured above—a standard laboratory microscope, a Honeywell Pentax 35mm single lens reflex camera with microscope adapter and right-angle finder, and a Honeywell Strobonar (electronic flash) light source. A second Honeywell Pentax body, loaded with color film, stands by.

These versatile, highly efficient instruments from Honeywell will help you make photomicrographs of outstanding quality, yet they are not expensive—camera, accessories, and Strobonar light source total less than \$275. Your Authorized Honeywell Photo Products Dealer will be glad to demonstrate this equipment for you, or you may write for illustrated literature to:

Scientists have been quick to accept tilting dispensers because they offer speed and convenience. Now here's a new dispenser with versatility and which saves you money, too!

Versatility because Kontes K-75920 dispensers have an exclusive adjustable plunger in the chambers, permitting a range of volumes from each chamber. It saves you money because you need buy only one to get a wide range of volumes.

A Coors Shapiro Speedi Filter disc greatly increases the efficiency of Buchner funnels through the utilization of a major portion of the filter paper surface. In some filtering operations, filtration is limited to those areas of the filter paper which lie directly over the holes in the Buchner funnel plate. With the Coors Shapiro Speedi Filter disc interposed between the plate and the filter paper, you utilize completely the entire area of the filter paper. The speed of filtration is greatly increased as is the quantity of suspension which can be filtered by a single sheet of paper. What's more, the total surface is uniformly coated. Coors filter discs are immediately available through your laboratory supply dealer, in four standard sizes or in an assortment of the four sizes.

1. Linear-Log Count Rate Meter

2. Printing Scaler-Timer, Single Channel Analyzer, High Voltage Power Supply

3. Chromatograph Scanner, Linear-Log Count Rate Meter, Linear Amplifier, High Voltage Power Supply.

## MODULAR BUILDING BLOCKS

Start with a single module (linear amplifier, single channel analyzer, or count rate meter). Add a power supply, detector and read-out device and you have the simplest of spectrometer systems. As funds permit, you can add other modules.

A double module scaler-timer can be added for automatic scaling or counting. Simultaneously, you can add a print-out facility to integrate total energy under a peak automatically or to record it as a digital output. Chart recording is also possible.

Advanced devices for automatic sample counting, gas flow counting, or paper chromatograph counting also are available.

Each instrument features transistorized reliability; modular construction; built-in electronic gating circuits; and plug-in etched circuit boards. Individual modules may be interchanged or combined to provide unsurpassed measurement capability.

## SULFRIAN STAINLESS STEEL RESEARCH DEWARS

Craftsmanship... ingenuity... talent... all of these are built into Sulfrian Cryogenic vessels. Sulfrian Cryogenics is the only place that this consolidation of special low temperature skills can be found... and Sulfrian is backed by 20 years of cryogenic experience. Whatever your requirement, check Sulfrian first... it's the best source of true reliability in the low temperature field.

## **it's the most versatile apparatus for ultrasonic cell disruption**

The Biosonik is pretuned for sample loads up to 100ml and can be converted to semi-continuous flow to accommodate samples from  $\frac{1}{4}$  to 500ml/hr. Its easy, semi-automatic tuning remains stable throughout the run and provides positive repeatability. Biosonik operates on quiet 20 Kc . . . there's no need for shielding or sound-proofing. No excessive or uneven heating. A peak 600-watt energy input enables breakdown of larger cell suspensions. Important too, the Biosonik is completely steam sterilizable because of its stainless steel construction.

Some of the applications for which the Biosonik is ideal are sonic research on liquids, living organisms, chemical mixtures, oil-water emulsifications and the preparation of solutions of difficult-to-dissolve substances such as steroids. A continuous flow Biosonik is available for processing large quantities of cells. Write for technical literature or free demonstration. No obligation, of course.

**UN-TEST®...ACCURATE UREA NITROGENS...FAST**

"...an efficient and reproducible means for direct estimation of urea in normal and pathologic sera."\*

Hyland UN-TEST can be completed in less than 15 minutes. Test is performed by incubating specimen with Buffered Urease, adding Phenol Color Reagent and Alkali-Hypochlorite Reagent, incubating, and reading color absorbance.

Test requires no deproteinization, no Nessler's solution, no boiling. Specimen may be serum, plasma or diluted urine—and only 0.02 ml is required.

UN-TEST is supplied in compact kits, each sufficient for 100 specimen or control tests (Hyland list number 69-000).

**SIMPLE . . . UP TO DATE . . . EASY TO READ  
FROM ANYWHERE IN A ROOM — FISHER'S NEW  
PERIODIC CHART** Gives all-new 1961 atomic weights based  
on carbon-12; includes Lawrencium. Lists latest, most important  
information about all 103 elements (symbol, atomic number and  
weight, group, maximum orbital electron distribution for each  
period). Lanthanum and Actinium series are separated. Printed in  
two colors for easier reading. Lab-size chart is 32" wide x 23" high  
on easily cleaned Texoprint that won't curl, flake or fray (Catalog  
No. 5-702, \$3.00 ea. or \$2.75 ea. in lots of 12). Lecture-size chart
