

## VIBRATING REED ELECTROMETER

The newest Vibrating Reed Electrometer Type N616B measures direct currents down to  $-10^{15}$  amps full scale using internal resistance! Very low noise and drift— $\pm 100$  Microvolts over 24 hours. Applied D.C. is converted to A.C. by a vibrating reed capacitor and amplified by a stable A.C. amplifier. Output meter calibrated in voltage plus recorder output facility. Proven performance at low cost!

tain to current and projected areas of research. Conferences allow detailed review of the many examples of disease found on post-mortem examination of animals that die in the zoo. The purpose of these conferences is to develop skills in interpreting signs of disease and in formulating dynamic concepts of disease that may be tested by experiment.

This program is flexible. It has been combined with residency training in the schools of medicine and veterinary medicine. However, it is also designed for the graduate student who wishes to take an advanced degree in this area.

Graduates in medicine or in veterinary medicine who combine this training in comparative pathology with the residency training in pathology will find many opportunities awaiting them. Biologists who complete this program creditably will be equally well equipped for research, but possibly would not be accepted so readily for teaching-research positions in schools of medicine or veterinary medicine. However, a consensus of the conference was that, as the trained persons become available, so will the opportunities.

accurate,  
specific,  
reliable  
lab **O<sub>2</sub>** analysis

—exclusive BECKMAN paramagnetic operation makes it possible!

Faster, easier, more specific O<sub>2</sub> measurements are yours with Beckman laboratory oxygen analyzers. Which model best fits your application?

**PORTABLE MODEL D2**...compact and battery-operated, delivers fast and reliable measurements. Accuracy is  $\pm 2\%$  of full scale. Corrosion-resistant analysis cell available. Choose from two ranges: 0-25% or 0-100% O<sub>2</sub>.

**SEMI-PORTABLE MODEL C2**...line-operated, is ideal for any routine static or flowing sample analysis. Accuracy is  $\pm 1\%$  of full scale. Factory precalibration includes background gas correction. Corrosion-resistant, small volume, or fast response analysis cells available. Choose any range with 5% minimum span between 0-75%, or any range with 15% minimum span between 75-100%.

**RESEARCH MODEL E2**...finest of all lab O<sub>2</sub> analyzers—accuracy is  $\pm 0.025\%$  O<sub>2</sub> on 5% spans. Line-operated null-balance circuitry facilitates precise readout from a 1000-division Helipot. Zero and span adjustments allow compensation for barometric pressure and background gas changes. Choose dual or multiple ranges with a 1% minimum span—up to 5 different zero-based or suppressed ranges on one instrument.

**FOR YOUR PROCESS APPLICATION**...there's also a complete line of highly-accurate, highly-specific Beckman process gaseous and dissolved oxygen analyzers.

Your nearest Beckman representative has details on the C2, D2, and E2. Contact him or write direct for Data File LO-38-162.

**HONEYWELL PHOTO PRODUCTS**

**EXCELLENT RESULTS WITH ECONOMY AND SIMPLICITY**

The classic maple shape outlines a specimen micrograph of leaf epidermis made at X100 with a Honeywell Pentax camera and a Honeywell 52-A Strobonar for flash illumination. (Sharp eyes will identify the leaf as *philodendron*, not maple; please indulge our preference in design!)

A Pentax should be a part of your standard laboratory equipment. At \$149.50 for the Model H-1, the reliable Pentax is undoubtedly your very best choice of a versatile single lens reflex camera. There are 13 interchangeable lenses for it (35 mm to 1000 mm).

The 52-A Electronic Flash Unit (\$69.95) plugs into 110V-AC and features a modeling light which insures your directing the flash into your microscope's mirror. This flash unit absolutely stops specimen movement and the effects of camera shake; it cannot burn or cook slides.

See these fine products at your local Honeywell Photo Products dealer's, or write for brochure to David Moore (209) Honeywell-Heiland, Denver 10, Colorado.
