

ants. By the time this review was written several additional items of income and expense that were applicable to 1961 but that were not available when the Association's report was prepared had been received. Taking account of these items reduces the excess of receipts over expenditures from \$218,886, the figure given above, to \$210,-

038. The auditor's report concludes with the statement that records have been kept "in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year."

SALINITY IN SITU

the **RS-5 INDUCTION
SALINOMETER**
determines
SALINITY • TEMPERATURE • CONDUCTIVITY
without electrodes

IN SITU determinations of salinity, temperature, and conductivity may be made by unskilled personnel. Sample bottles and time consuming titrations are no longer necessary.

The RS-5 INDUCTION SALINOMETER operates without electrodes and eliminates all problems inherent in electrode systems. Solid epoxy cell construction avoids all sea water-to-metal contacts and keeps maintenance to a minimum. Calibration checks may be performed in the field with a small fixed resistor.

The Salinometer consists of a compact transducer, an abrasion resistant cable, and a small hand held instrument. The transducer, containing the induction cell and a thermistor thermometer, is 4" dia. x 2" long. The instrument, self-powered with batteries and transistorized electronics, measures 5" x 6" x 8" in its covered and gasketed carrying case. Cables up to 300' long are stocked in 50' increments.

In operation, the cell is lowered to depth, the selector switch set to the desired function, and the proper dial adjusted to give a meter null. The reading is then taken directly from the dial setting. All three measurements may be taken and noted down in less than a minute by one operator.

Industrial Instruments, for over twenty years the world's leading manufacturer of electrolytic conductivity instrumentation, stands ready to serve you with a complete line of conventional and induction salinometers both indicating and recording.
