hibiting myogenic autoregulation, a type which depends upon vascular transmural pressure. This response should exist only in vessels possessing active smooth muscle tone, or might be evoked in previously atonic vessels if they are sufficiently reactive to the stimulus, and should be abolished by any agent which paralyzes vascular smooth muscle. Such autoregulation may occur in the absence of a parallel change in tissue pressure, venous resistance, or organ weight. When venous pressure is elevated, total vascular resistance should increase except where capillary pressure is high (for example, in the kidney), or where tissue pressure increases substantially.

3) The group considered metabolic autoregulation. Generally, resistance is dependent on blood flow in a manner consistent with maintenance of an adequate nutrient supply. In comparing it to myogenic autoregulation it is similar in that it requires active smooth muscle tone and may be seen in the absence of parallel changes in tissue pressure, venous resistance, or organ weight, and dissimilar in that vascular resistance to blood flow should decrease with elevation of venous pressure.

Finally, the group discussed further experiments which should be performed to determine the nature of autoregulation demonstrated in the various organs.

The workshop was a most useful method to the participants in trying to resolve individual differences and in determining the areas most likely to be fruitful in this research field. It was generously supported by a grant (H-7124) to one of us (P.C.J.) from the National Heart Institute.

RUN A DAY'S SULFUR DETERMINATIONS BEFORE MORNING COFFEE BREAK WITH FISHER'S NEW INDUCTION SULFUR APPARATUS In less time than it

takes to bring a conventional hot-tube furnace up to temperature, you can run 10 accurate sulfur determinations with the new Induction Sulfur Apparatus—and keep right on running them at the rate of 10 an hour. You'll finish a day's usual sulfur work by midmorning. The new apparatus warms up in 30 seconds, is simple to operate, can handle up to 2.5 grams of ferrous or nonferrous metals. Connect it to a Fisher Model 36 Titrimeter® and the entire analysis is automatic. **Full facts** in free Bulletin 10-466. Write for it and ask about acquiring the Induction Sulfur Apparatus through the Fisher Financing Plan. Fisher Scientific Company, 139 Fisher Building, Pittsburgh 19, Pa.

NEW

IMPROVED

HISTOWAX®

This world-famous embedding medium is now better than ever.

□ Excellent ribbonability □ Freedom from crumbling □ Doesn't distort or crinkle tissue □ Sections adhere readily to slide □ Inert to histochemicals □ Granular, for easier handling, rapid melting □ Four melting ranges □ 1 lb. and 25 lb. packages. Write for data.

AGITHERM

ONLY \$6750

Hot Plate-

-Magnetic Stirrer

New low cost plus advanced design features

Now you can heat and stir simultaneously with WACO AGITHERM. Heavy-duty individual controls allow use of either stirrer or hot plate independently when desired.

The 500 watt hotplate can be set thermostatically at any temperature up to 600° F. Pilot light indicates when heat is on. The perforated stainless steel case assures cool operation of motor. Compact design, $6\frac{1}{2}$ " diameter by 5" high.

WHY SELECT ACE FIBER GLASS SINTERED FILTERS?

Quality and Greater Abrasion Resistance. Ace filters, the first American made sintered glass filters, feature a glass fiber structure, more abrasion resistant because it is fused together on a larger area. Particles do not detach from the filter body as easily as spherical granules. The shock and chemical attack resistance of glass is unimpaired as the Ace fiber glass sintered filter is made entirely of glass. You are assured of Ace Glass quality: each filter plate is individually tested for porosity and hardness.

Selection and Economy. Ace fiber glass sintered filters are economically priced. For instance, the Filter Funnel (Cat. #7305 in the 20 ml. cap. with 20 mm. disc), shown in photograph above, is listed at \$3.20. Ace fiber glass sintered filters have been incorporated into a wide variety of Ace glassware described in our new filterware brochure. Get it for your files!

Write Dept. S for your copy of Filterware Brochure No. 6050.
