

HOTPACK STOPS OVEN OVER-HEATING!

New Solid State (all semi-conductor) Proportional Temperature Controlled Ovens Give Ultimate Reliability!

Now, Hotpack offers a complete series of high temperature ovens (to 280°C) with an automatic proportional temperature control system, and infinite stepless control. Any single phase load may be proportioned. The system includes a 10-turn, 1,000 division selector; calibrated output meter; Hi-Lo range selector; accurate indicating pyrometer; automatic safety Limitstat and a sensing thermistor, sensitive within .02°C! There's one price . . . no hidden "extras".

- NO cumbersome saturable cores (or load matching)
- NO capillaries or bellows to fail
- NO contactors, tubes, relays
- NO over-heating

Compact, Lightweight WARBURG APPARATUS

Designed for today's modern lab, the dependable Bronwill Warburg features a unique electrode heating system . . . there's no lag or overshooting of temperature, *and* operating temperature is reached in 20-30 minutes. You'll make new temperature settings faster, too, (from 0 to 50°C) with magnetic thermoregulator.

The new Warburg is rotatable through 320°—lets you bring any of 14 double capillary manometers in front for easy reading. Has transparent Plexiglas bath chamber. Compact—only 20½" in diameter; its circular shape conserves vital space on lab bench.

A specially designed unit with 14 built-in spotlights is available for photosynthesis.

WRITE today for complete information on both models

A New Concept!

**A SQUARE SHOULDER
CONstriction PIPEtTE
FOR DRAWING A LIQUID
TO THE SAME LEVEL
TIME AFTER TIME!**

the SPEEDI-PET

DELIVERS REPEATEDLY
... ACCURATELY!

Assures .5% reproducibility
even when used by untrained
personnel.

Specifically suited for doing
Prothrombins, the SPEEDI-PET
remove the necessity of
continuous mouth suction until
discharge of liquid is desired.

Liquid is drawn up to the
constriction and into the capillary
bore where it is held until
blown out. If liquid is drawn
above the square shoulder, it
may be blown down or allowed
to fall automatically.

Available in .1ml and .2ml sizes.

THE SECRET IS
IN THE
SQUARE
SHOULDER
CONstriction*

*patented

POSITIONS WANTED

Clinical Chemist, Ph.D., age 33; 5 years as head of chemistry laboratory of 500-bed hospital. Clinical diagnostic methodology, radioisotope procedures, microchemistry. Box 158, **SCIENCE**. 6/14

Information Retrieval/Scientific Documentation. B.S., chemistry; Ph.D., life science, 1958. Broad interests. Appropriate experience. Box 155, **SCIENCE**. X

Organic Synthesis Chemist seeks basic research position in pharmaceutical company or research institute. Background in heterocyclics, also polymers and colloids. Medical research, industrial, and academic postdoctoral experience. Available September. Ph.D. Stanford 1958. Family. Publications. Box 160, **SCIENCE**. X

Pharmacologist. Drug evaluation and development. European assignment or position considered. Box 157, **SCIENCE**. 6/14, 21, 28

(a) **Ph.D. Biophysicist**, experienced in photo-synthesis; prefers basic research. (b) **Ph.D. Zoology** (radiation, physiology), prefer teaching, stress research. (c) **Ph.D. Anatomy** (physiology minor); neuroanatomy background; interested in administration, research, teaching. (Please write for information regarding these and other scientists, senior and junior, in all fields.) **Science Division, The Medical Bureau, Inc., Burnice Larson, Chairman, 900 North Michigan Avenue, Chicago 11, Illinois.** X

Physiologist-Biochemist (pharmacologist), Senior, requests temporary appointment. Box 159, **SCIENCE**.

Research Assistant: B.S., male, 13 years' industrial experience in pharmacology, toxicology, radioisotopes, cancer research, medical writing. Publications. Desires challenging industrial or academic position. Box 150, **SCIENCE**. 6/14

Technical Editor, Writer, M.S. Strong chemical background; 15 years' experience in analytical chemistry and pharmaceutical editing. General knowledge of languages. Box 154, **SCIENCE**. X

Terrestrial Vertebrate Ecologist Ph.D. Seeks research-teaching or research position; 5 years' of desert research; 3 years of teaching experience; general biology, plant taxonomy, vertebrate field zoology. Box 153, **SCIENCE**. X

POSITIONS OPEN

Clinical Biochemist, Ph.D. to head department in 600-bed hospital (375,000 tests per year) with 3 Pathologists, Bacteriologist, Ph.D., 35 ASCP Technologists, Resident and Technologist Training programs. Top salary. Opportunity for research program.

Write to **Dr. Bernard Taylor, Chief Pathologist, St. Elizabeth Hospital, 1044 Belmont Avenue, Youngstown, Ohio.**

POSITIONS OPEN

AMERICAN UNIVERSITY OF BEIRUT

Beirut, Lebanon

Appointment in Biology

Professor of Biology, capable of assuming chairmanship of the department. Beginning October, 1963. Ph.D. and experience. Teaching in area of microbiology. Research interests should be oriented toward modern biochemical, developmental, cellular, metabolic or genetic microbiology, perhaps in algology. Salary equivalent to U.S. levels; transportation allowance; generous fringe benefits. Send detailed résumé to Miss S. Elizabeth Ralston, Near East College Association, 548 Fifth Avenue, New York 36, N.Y., or Dr. A. B. Burdick, Department of Biological Sciences, Purdue University, Lafayette, Indiana.

BACTERIOLOGY

Applications are invited from M.D. or Ph.D. graduates for the vacant position of Assistant Professor. Salary according to experience. For details of duties apply to the Professor of Bacteriology, **Dalhousie University**, Halifax, Nova Scotia.

BIOCHEMIST—EDITOR FOR SCIENTIFIC BOOK PUBLISHER. Duties will consist of developing ideas for advanced level monographs and treatises, contacting potential authors, maintaining close liaison with important academic and industrial research personnel. Should be willing to travel and enjoy frequent personal association with members of the profession. Box 161, **SCIENCE**.

Expanding Medical School Biomedical Electronics laboratory has opening for a qualified engineer with creative R&D ability. Must have degree and minimum of 3 years' experience. Knowledge of pulse and video circuitry, scanning systems, CRT displays, photoelectric devices, analog computers desirable. Training in biology preferred, but not essential. Box 148, **SCIENCE**.

Histologist, Histochemist

M.S., or equivalent to supervise routine histology, and take part in research program with emphasis on enzyme and electronhistochemistry. Hospital affiliated research institute. Send résumé to Box 151, **SCIENCE**.

PHARMACOLOGIST-M.D./Ph.D.

Excellent opportunity for individual with at least 3 years postdoctoral experience, particularly in the physiology and pharmacology of the autonomic system.

Please send résumé with salary requirements to:
PERSONNEL DIRECTOR
GEIGY Chemical Corp.
P.O. BOX 430 YONKERS, N. Y.
An Equal Opportunity Employer

RESEARCH ASSOCIATE IN BIOCHEMISTRY—Position open for someone with training in Chemistry and experience in Biochemical research capable of working semi-independently. Investigations involve problems of enzyme mechanism and control. Salary is open. Travel expenses to St. Louis will be provided. Box 162, **SCIENCE**.

POSITIONS OPEN

CHEMISTS . . .

Melpar has positions available immediately for **CHEMISTS** with training and experience in biochemistry, microbiology, immunochemistry or biophysics to conduct research in space biology, bioelectricity, mechanism of enzyme action, biological detection and bioinstrumentation.

For further details, write in strictest confidence to:

John A. Haverfield

Manager—Professional Placement

MELPAR INC

A Subsidiary of
Westinghouse Air Brake Company

3364 Arlington Blvd.
Falls Church, Virginia

(a suburb of Washington, D. C.)
an equal opportunity employer

DIRECTOR OF RESEARCH MEDICAL RESEARCH FACILITY

The Gillette Company is seeking a man with ability to manage a medical research program supporting comprehensive research and development programs in all divisions of a diversified company producing a wide range of consumer products. A Ph.D., M.D. or Ph.D. to manage scientists working in fields such as biochemistry, pharmacology, dermatology, physiology and toxicology is being sought. Experience in the administration of animal and clinical programs designed to establish medical safety and efficacy of compounds is also desirable. This is an excellent opportunity for a man who desires a top-level managerial position in a well-managed company with rapidly expanding and successful research programs.

Send resume in confidence to
Dr. Milton Harris, Vice President
THE GILLETTE CO., BOSTON 6, MASS.

PHARMACEUTICAL RESEARCH POSITIONS

SR. PHARMACOLOGIST—to assume responsibility for testing program aimed at characterizing pharmacologically a broad field of chemical agents.

SR. ENDOCRINOLOGIST—to initiate and develop new investigative programs in endocrine physiology and chemotherapy.

Both positions require solid academic exposure to the preclinical sciences. Postdoctoral experience will be additionally credited. Send inquiries to: W. R. Hall

**SMITH KLINE & FRENCH
LABORATORIES**

1516 Spring Garden Street Philadelphia 1, Pa.
An Equal Opportunity Employer

POSITIONS OPEN

CHEMAGRO CORP.

Formulation Chemist

Recent expansion has created the following position:

B.S. degree in chemistry or pharmacy, with experience in the preparation and development of pharmaceutical-type formulations, including tablets, capsules, and injectables. Challenging position in the animal health field.

Send complete résumé to:

Charles Carroll
Chemagro Corporation
Box 4913, Hawthorn Road
Kansas City 20, Missouri

MICROBIOLOGIST III

for the state of Hawaii bubonic plague research project. Requires master's degree in biological or medical science and 3 years' experience conducting bacteriological, parasitological and serological tests and analyses. \$7488-\$9522. Contact Mrs. L. Fukuda, Department of Personnel Services, 825 Mililani St., Honolulu 13, Hawaii.

6/7; 7/5; 8/2

Research in Otolaryngology

For individual interested in research career in otolaryngology, especially otology. M.S. minimum with emphasis on mathematics. Traineeship plus salary leading to Ph.D. offered in this area of research. Detailed information available on request. Write **Department of Otolaryngology, Tulane School of Medicine, New Orleans 12, La.**

PARKE-DAVIS Research Laboratories now have three challenging positions for chemists, biologists, or pharmacologists interested in **SCIENCE INFORMATION**:

LITERATURE SEARCHER for research library, Detroit, Michigan, to handle literature problems of microbiologists, chemists, and physicians. Must have B.S. or M.S. in science, reading proficiency in German or French, and capacity to work independently.

PATENT INFORMATION CHEMIST for patent liaison staff, Ann Arbor, Michigan. Must be young, imaginative woman with B.S. or M.S. in organic chemistry. Responsibilities include maintaining and developing program for monitoring, selecting and abstracting pharmaceutical patent literature; also related information retrieval. Requires creative interpretation and dissemination of pertinent patent information to research personnel. Writing and editing ability desirable. Experience preferred.

LITERATURE BIOLOGIST for technical information staff, Ann Arbor, Michigan, to scan current scientific papers in physiology, pharmacology, chemotherapy, etc., and to make searches in depth when data suggest research toward new drug is justified. Applicant should have knowledge of the scientific literature and facility with French or German.

Applicants should enjoy working creatively with laboratory staff. Please send résumé to: **Manager of Salaried Employment, PARKE-DAVIS & COMPANY, Detroit 32, Michigan.**

POSITIONS OPEN

(a) **Ph.D. Research Pharmacologist**, evaluate pharmacodynamic areas; eastern chemical company. (b) **Ph.D. Microbiologist**, R&D environmental biocidal agents; Central (c) **B.S. Bacteriologist**, biological production; Central laboratory. (d) **Editor**, experienced medical/scientific editing, writing; new research journal; Southwest; to \$12,000. **Faculty Appointments:** (e) **M.S. Biology, Chemistry, Physics**, southern resort area junior college. (f) **Ph.D. Geneticist**, teaching, direct graduate research; midwestern state college. (g) **Biology, Chemistry, M.S./Ph.D.**; small southeastern college. (h) **Biology Instructor**; small eastern college. (i) **Chemistry, Ph.D.** or near; some research; southwestern state college. Many other opportunities available for both Junior and Senior scientists. Please write to Science Division, **The Medical Bureau, Inc., Burneice Larson, Chairman**, 900 North Michigan Avenue, Chicago 11, Illinois. X

FELLOWSHIPS

Predocutorial Assistantships and Fellowships in Physiology. Excellent opportunity for graduate students leading to the Ph.D. Ample stipends and free tuition. Training and research in biophysics, membrane and subcellular physiology, endocrinology, muscle, water metabolism, cardiovascular, gastrointestinal, and environmental physiology. Write for details to Head, Department of Physiology, **University of Illinois at the Medical Center**, Chicago 12, Illinois. 5/24, 31; 6/7

PREDOCUTORIAL FELLOWSHIPS IN PHYSIOLOGY. Didactic and research training leading to the Ph.D. with special orientation in cardiovascular, temperature regulation, bio-medical instrumentation and neurophysiology. Emphasis upon preparation for academic careers, combining teaching and research. Attractive stipends with tuition and dependency allowance available to qualified undergraduates in engineering, biology, chemistry, mathematics or physics. A maximum of four new students accepted each year, maintaining a low student-advisor ratio. Detailed information from: **The Department of Physiology, Loyola University, Chicago 12.**

MODEL JO/1 ROUSSEL JOUAN DICHROGRAPH

The Model JO-1 Dichrograph provides a new tool for the study of molecular structure. Automatic recording of *circular dichroism* against *wavelength* offers obvious advantages over previous methods. By utilizing the *Cotton* effect in measuring the difference in absorption of right and left circularly polarized light in the visible and ultraviolet, we can study the characteristic

properties of certain functional groups. Optically active ketones, especially steroid ketone, both saturated and unsaturated, are particularly susceptible to this type of analysis.

A variety of scan speeds, automatic slit control, and linear wavelength recording directly in optical density units, provide *quick* and *easily interpreted* results.

Serum, plasma or urine determinations quickly and accurately... from a single drop

THE NEW AO TS METER* requires just one drop of sample to provide immediate, accurate determinations of total solids, specific gravity, refractive index, protein concentration or water concentration in serum, plasma and urine.

MINUTE SAMPLE REQUIRED: As little as 0.02 ml . . . a single drop . . . of sample is sufficient for the most precise determinations.

TEMPERATURE COMPENSATED: Unique, hermetically-sealed liquid prism eliminates error due to temperature changes. Samples, whether at body or refrigerated temperatures, can be read immediately when the ambient temperature of the instrument is between 65-95° F.

URINE SPECIFIC GRAVITY: No more "Q.N.S." reports. Ideal for pediatrics, oliguric patients and in collections

from ureteral catheters. Readings are consistently obtained with a degree of accuracy, speed or reproducibility significantly better than those obtained with urinometers, the falling-drop method or with instruments uncompensated for temperature.

SERUM PROTEINS: Ideal for rapid screening of serum proteins. Samples as small as those obtained from a microhematocrit tube are ample.

DIRECT READINGS: You make an immediate analysis directly from the built-in scale . . . reading to 0.1 percent total solids . . . without references to graphs, tables or thermometer readings. Model 10400 provides determinations of total solids in plasma or serum and urine specific gravity; model 10401 gives readings of protein concentration and refractive index. Write for complete information!

**Total Solids Meter. This method of analysis using the Goldberg Refractometer was developed in close cooperation with Dr. A. V. Wolf, Head of the Department of Physiology, University of Illinois, College of Medicine, Chicago, Ill.*
