and served to emphasize the difficulties involved in such studies and the necessity for a great number and a wide variety of measurements. These studies, including the investigation of adequate control populations in regions of lower natural radiation levels, have barely begun and it appeared clear that much more time and effort on the part of workers in many disciplines will be required to isolate any definitive environmental factors, of which natural radiation is only one.

The symposium was supported by the U.S. Atomic Energy Commission, Division of Radiological Health of the U.S. Public Health Service, and Rice University.
