

fallout and the date of first pasturing. Therefore it would seem that the amount of fission products ingested by a milk-drinking, pregnant woman subsequent to 12 May would have been very small indeed.

There could have been little ingestion of fission products with leafy vegetables, for only asparagus was grown and marketed before June 1953 in this area. Asparagus was first harvested on 10 May, according to the records of a representative market gardener.

The cancer report files of this department reveal no increase in the incidence of cancer or leukemia over the past ten years in children of the Albany, Troy, and Schenectady areas—who were 15 years of age or younger in 1963—as compared with children of this age elsewhere in upstate New York.

JAMES H. LADE

Albany*

## Fluorescence Microscopy:

### Use in Intracellular Microscopy

Bullock, in his paper on "Neuron doctrine and electrophysiology" [*Science* **129**, 997 (1959)], calls attention to the difficulty that intracellular microelectrodes must be placed blindly because a tiny glass tip is invisible in a medium of high refractive index. *Science* publishes numerous reports on intracellular microelectrode studies, and some of those working in this field might find it worth-while to try using fluorescence microscopy with electrodes of a fluorescent glass such as uranium glass or a rare earth glass. Since a fluorescent object is self-luminous, objects of any size and any refractive index can be seen if fluorescence emission is adequate. With preparations thin enough for substage illumination, cells can be made visible by combined phase and fluorescence microscopy [Price and Christenson, *Mikroskopie* **12**, 14 (1957)—(no reprints left)]. Thicker specimens can be observed with an incident light microscope, with cells made visible by a fluorescent dye such as acridine orange, which has been used for vital staining of nerve tissue by, among others, Zeiger and Harders [*Z. Zellforsch. Mikroskop. Anat.* **36**, 62 (1951)].

# SIMULTANEOUS CONTRAST FLUORESCENCE MICROSCOPY

exclusively with the

REICHERT  
**Zetopan**

This unique new approach may very well become instrumental in solving some of your intricate microbiological research problems. It can be accomplished with the ingeniously designed Reichert "ZETOPAN" by simultaneous application of white light and ultra-violet illumination supplemented by a newly developed fluorescence contrast condenser.

The combined advantages of Phase or Anoptral Contrast and the fluorescent techniques now appear simultaneously in the microscopic image.

Our constant, self-regulating Power Supplies for operation of the fluorescent light source prolong the lifetime of the Osram burner and insure a steady arc and increased light.

The "ZETOPAN" is a versatile instrument for all microscopic investigations of transmitted, reflected, and mixed illumination. It is a truly universal research microscope.

## Personnel Placement

Replies to blind ads should be addressed as follows:

Box (give number)  
SCIENCE  
1515 Massachusetts Ave., NW  
Washington, D.C. 20005

### POSITIONS WANTED

**Developmental Biologist**, 34; Ph.D. in anatomy. Radiation and other research experience. Prefers situation in which rural home life possible. Size of institution unimportant. Adequate time for research essential. Available early 1964. Box 211, SCIENCE. X

**Electron Microscopist**, Ph.D., extensive technical experience: Normal, experimental, and pathological cytology; publications. Box 212, SCIENCE. X

**Neurophysiologist** Ph.D.; 30 recent publications: new approach to CNS integration; new brain imidazole compound; neuroenzyme adaptation. Desires basic research in neurochemistry, U.S. or abroad. Box 210, SCIENCE. X

(a) **Ph.D. Physical Chemist** (minor organic chemistry), industrial experience, publications; desires supervisory position emphasizing chemical/analytical problems. (b) **Ph.D. Physiologist/Pharmacologist**, publications; experience and preference: industrial research/teaching. (c) **B.A., M.B.A.**, graduate work anatomy, biochemistry, microbiology; research experience; interested in training position, advancement potential. (Please write for information regarding these and other scientists, senior and junior, in all fields.) Science Division, The Medical Bureau, Inc., Burnside Larson, Chairman, 900 North Michigan Avenue, Chicago 11, Illinois. X

## CARDIO- VASCULAR RESEARCH

Ph.D. or M.D. required to direct and supervise the Cardiovascular Research Group involved in drug evaluation and basic studies. Independent research experience in cardiovascular physiology or pharmacology essential.

Suburban location within easy reach of New York and Philadelphia. Professional associations and publication of work encouraged. Library, technical information and abstracting service. Full benefit program.

Send résumé to Employment  
Department

### WARNER-LAMBERT RESEARCH INSTITUTE

Tabor Road, Morris Plains, New Jersey

An Equal Opportunity Employer

## VIROLOGISTS

Melpar's Research Division has an immediate need for virologists to engage in:

The investigation of monolayer and submerged culture cell-virus interactions. Successful applicants should have a Ph.D. and experience in the preparation of primary cell cultures and passage of established cell lines. A broad mammalian virus experience spectrum is preferred.

• • • • •

The investigation of the biological, physical and chemical changes occurring during a virus cell interaction. Requirements include a Ph.D. and a background in physics or biochemistry. Experience in instrumentation is also desired.

For further information, send resume in strictest confidence to:

JOHN A. HAVERFIELD—Manager, Professional Placement

**MELPAR INC**

A Subsidiary of Westinghouse Air Brake Company

3405 Arlington Boulevard, Falls Church, Virginia  
(a suburb of Washington, D. C.)

an equal opportunity employer

A Message from ONR  
to Professors and  
other Senior Research  
Scientists expecting  
their sabbaticals:

Special one and two  
year appointments  
are available to  
qualified senior  
research investigators  
in these locations:

### Northern Italy (Riviera)

Emphasis on laboratory work in Under-  
seas Sciences. PhD preferred with a  
minimum of 5 years productive research  
showing qualitative achievements.

- OCEANOGRAPHER
- PHYSICIST (Sound)
- OPERATIONS RESEARCH ANALYST

### London, England

Senior Scientists to maintain liaison  
with important research by traveling  
throughout Europe and the United  
Kingdom. Full and Associate Profes-  
sors expecting sabbaticals, and active  
in research, are especially encouraged  
to reply. (Recent productive research  
and PhD are essential.)

- MATHEMATICIANS
- METALLURGISTS
- PHYSICISTS (Optics, Sound,  
Nuclear, Solid State)
- BIOLOGISTS (Physiology,  
Microbiology)
- PSYCHOLOGIST
- CHEMISTS (Physical, Organic)
- OCEANOGRAPHER
- ELECTRONICS SCIENTIST

### Washington, D.C.

Positions similar to those outlined  
above are also available at ONR head-  
quarters in Washington, D.C.

Salaries range between \$11,725 and  
\$13,615 (effective January 1st), and  
include Civil Service benefits PLUS  
overseas allowances (up to \$2,000 for  
Northern Italy, \$3,500 for London).  
You must be a U.S. citizen to qualify.

Send either curriculum vitae, or  
Standard Form 57 (available at any  
Post Office) to the Director, Civilian  
Personnel, Code 700.

### Office of Naval Research

17th and Constitution Avenue, N.W.  
Washington 25, D.C.

Outstanding Professional  
Assignment Available For:

# Ph.D.

with  
achievement  
in  
systems  
development

If you are a creative innovator with the desire to follow your ideas from concept to completion, a rewarding and satisfying future can be yours at HUGHES-FULLERTON R&D in Southern California.

Based on your capability you will contribute to the development of advanced projects in Air Defense Weapon Systems, Underwater Systems, Command & Control Systems, Weapon Systems and Display Systems.

3-8 years' experience in systems-oriented assignments is desired. U.S. citizenship is required.

Enjoy encouragement of initiative and recognition of achievement in an established professional environment.

## HUGHES

HUGHES AIRCRAFT COMPANY  
FULLERTON R & D

An equal opportunity employer

### POSITIONS OPEN

#### BIOCHEMIST

M.S., preferably with experience. To assist Director of Pharmacological Chemistry in coordinating activities among several disciplinary areas and to carry out special, non-routine biochemical assignments without direct supervision.

Salary commensurate with qualifications. Liberal fringe benefits program.

Interested persons write to Mr. Robert O'Connor, Director, Research Personnel, Merck Sharp & Dohme Research Laboratories, West Point, Pennsylvania.

An Equal Opportunity Employer

#### BIOCHEMIST, CHEMIST OR BACTERIOLOGIST

B.S. or M.S. with lab experience to assist with basic research in protein metabolism. Salary \$6675 to \$7125. Contact Dr. Harry Walter, ext. 495, Veterans Administration Hospital, Long Beach 4, California.

MONASH UNIVERSITY, Melbourne, Australia

#### FOUNDATION CHAIR OF PSYCHOLOGY

The Council of Monash University proposes to establish a Chair of Psychology and accordingly invites applications from suitably qualified persons for the appointment.

It will be the initial responsibility of the appointee to advise the Council on how best to establish and develop teaching in Psychology for students mainly in the Faculties of Arts, Science and Medicine.

Salary: (under review) £A4,250 p.a. Superannuation on the F.S.S.U. basis.

Full information on application procedure, conditions of appointment, etc., is available from Registrar of the University, P.O. Box 92, Clayton, Victoria, Australia.

Closing Date: 31st October 1963.

F. H. Johnson, REGISTRAR

(a) **Ph.D. Research Biochemist**, pharmacological interest; eastern hospital; to \$12,000. (b) **Ph.D. Pharmacologist**; experience not required; eastern pharmaceutical firm. (c) **Ph.D. Biochemist/Bacteriologist**, industrial experience testing, screen compounding; germicides, fungicides, some enzymology; excellent opportunity new division; central manufacturer. (d) **B.S./M.S. Bacteriologist**, state hygienic laboratory; Midwest. *Faculty Appointment*: (e) **Ph.D. Biologist**, some biochemistry strength; eastern university. (f) **Ph.D. Physical Chemistry**, introductory, quantitative analysis; eastern college. Many other opportunities available for both junior and senior scientists. Please write to Science Division, **The Medical Bureau, Inc., Burneice Larson, Chairman**, 900 North Michigan Avenue, Chicago 11, Illinois. X

(a) **Research Pharmacologist**; Ph.D. exp'd cardiovascular renal pharmacol and/or physiol for new prod develop; also cons. exp'd pharmacodynamics for drug eval; prominent indus co; E.; salary competitive. (b) **Biochemist**; M.S. int. clin chem for co hlth lab serv'g 2 area hsp's; to \$8000; coll tw'n 25,000; NE. (c) **Microbial Physiologist**; Ph.D. exp'd microbial genetics; join staff famed So. univ; teach med, grad stud only; 80% avail rsrch own choos'g; excel oppty devel own progs; ass't-assoc prof; to \$13,000; also (d) **Virologist**; Ph.D. exp'd tissue culture; same sch; to \$14,000. Science Division, **Woodward Medical Personnel Bureau**, Ann Woodward, Director, 185 North Wabash, Chicago. X

#### UNIVERSITY OF ALBERTA, CANADA, DEPARTMENT OF PHYSIOLOGY, FACULTY OF MEDICINE

Applications are now invited for the post of Associate Professorship in Physiology, the appointment to commence early in 1964. Teaching responsibilities would be at an intermediate to senior level, and would be adjusted to allow half of the appointee's time for his research program. Some preference will be given to candidates working on the integrative aspects of mammalian physiology, especially in the neuroendocrine, gastrointestinal, or cardiovascular fields. The starting salary will be \$9500 to \$10,000 per annum; medical qualification is desirable but not essential. Inquiries should be directed to Professor J. W. Pearce from whom particulars of application may also be obtained. 9/6, 13

### POSITIONS OPEN

#### MEDICAL WRITER

Young M.D. with ability and interest in medical writing for medical services. Clinical and laboratory experience desirable. Equal opportunity employer. Please send complete résumé to

**TECHNICAL EMPLOYMENT COORDINATOR  
THE UPJOHN COMPANY  
KALAMAZOO, MICHIGAN**

**HITACHI  
PERKIN-ELMER  
ULTRAVIOLET  
VISIBLE GRATING  
SPECTRO-  
PHOTOMETER**

The Model 139 Grating Spectrophotometer, a compact, precise modern instrument, out performs similar spectrophotometers costing significantly more.

Check these features: High resolution grating Monochromator — gives exceptional radiation purity in transmittance / absorbance measurement from 205 to 800 millimicrons; Direct reading meter — presents measurements in both transmittance and absorbance quickly and accurately; Single wide-range phototube — covers the entire range from 205 to 800 millimicrons, eliminates need to change even at wavelength extremes; Dual Hydrogen/Tungsten lamp source assembly — has high energy output, gives

instant switching from one source to the other; Direct line-operated power supply — is stable, fully transistorized, eliminating batteries and drift problems; Low cost — brings the advantages of modern instrumentation to any laboratory with unmatched economy and superior performance.

The five basic functional units, in combination, provide the analyst with a fully integrated instrument for the rapid and precise analysis of any sample by absorption measurement.

For details see your Aloe Scientific representative or write Aloe Scientific, ☐ Division of Brunswick, 1831 Olive Street, St. Louis 3, Mo.

*Serving the Sciences that Serve Mankind*

# ONLY THE OBJECTIVE

# MOVES

## WHEN YOU FOCUS THE NEW AO MICROSTAR

Introducing the new AO  
American Optical. Its infinity-

concept make it the most revolutionary new microscope of this century. The newly-designed infinity-corrected optics give field curvature, astigmatic and chromatic corrections never before obtainable except at a premium price. The image is crisply in focus and flat over the entire field of view. Photomicrographs are flat and sharply in focus from edge-to-edge and corner-to-corner of the print. The focusable objective means the body and stage can remain fixed and rigid. The nosepiece moves smoothly inside a protective arm housing on ball-bearing slideways. Virtually frictionless action brings new ease and precision to coarse adjustment focusing. The only force exerted in focusing is the weight of the nosepiece assembly ... prevents damage to objectives, slides and even the thinnest of coverslips.

But there is much more to the AO Microstar story! Get all the information. Ask your AO Sales Representative for a demonstration, or write.

Microstar® Microscope by Amer-

ican Optical. Its infinity-corrected optics and new focusing
