parative atherosclerosis. However, the conference did lack papers on the many other species, comparative histology, and various experimental approaches.

In analyzing the results of the meeting, three summaries must be noted: the "comparison of spontaneous animal and spontaneous human lesions" (Wissler), the "comparison of experimental animal and spontaneous human artherosclerosis" (McGill), and the "charge for the future" (McMillan).

In discussions on terminology it was noted that a lesion should not be labeled "early" because of its small size or its morphologic appearance. Conversely, a lesion should not be called "advanced" because of its character. There is much doubt about time relationships. The terms "spontaneous" and "experimental" may be used only if one is aware that they are but convenient substitutes for the correct designations of alterations, such as "unintentional" and "intentional." Many of the defects described, whether as chance findings or as experimental, do not warrant the designation of "atherosclerosis." Thus, it may be advisable to change the name of the atlas from "Comparative Atherosclerosis; Spontaneous and Experimental" to "Comparative Arteriopathies; Unintentional and Intentional.'

The meeting was sponsored by the Council on Arteriosclerosis of the American Heart Association and by the Los Angeles County Heart Association. It was supported by the National Heart Institute of the National Institutes of Health. Proceedings of the conference will be published in the near future and will include coverage of 26 formal lectures and seven discussion periods.

Surface Contamination

Broad areas of interest related to redispersible and evaporable contaminants, including radioactive, biological, chemical, and abrasive contaminants were covered at the first international symposium on surface contamination, held in Gatlinburg, Tennessee, 8–12 June 1964. Coverage was confined to contamination of limited areas—for example, rooms or other semi-isolated environments.

There were about 170 registrants;

about 20 foreign participants attended and were primarily from the United Kingdom and France. Professionally the participants represented several fields, including engineering, health physics, and chemistry. The sessions on fundamentals dealt with aerosol physics, surfaces, adhesion-redispersion, and transport and deposition. The session on surfaces was concerned primarily with adsorption at gas-solid interfaces. S. Ross (R.P.I.) described the adsorption of neopentane gas by solid adsorbents carrying thin films of nonvolatile oils. The volume of adsorbed gas per unit volume of liquid film increased as film thickness decreased. J. F. Pudvin (Bell Labs) reported on a modified condensation method and a contact angle measurement method for detecting surface contamination by hydrophobic films. The wetting of clean metal surfaces required the presence of an oxide film; gold surfaces which possessed no such film were hydrophobic. Measurements of the evaporation of thin oil films from contaminated surfaces have made by J. L. Anderson (Space Research, Inc.). The rate of evaporation was determined by labeling the film material with C14 and placing a counter window above the surface. Films evaporated more rapidly from dirty surfaces than clean surfaces.

G. B. Morgan (University of Florida) reported on the adsorption of radioisotopes on materials commonly used in the laboratory handling of solutions. Neoprene in particular showed high adsorptivity for all of the isotopes studied. Polyethylene and polypropylene were recommended as vessel materials.

In experiments on the adhesion and redispersion of particles at surfaces, Fish and co-workers (ORNL) sonically vibrated a surface over which glass beads, 16 microns in diameter, were dispersed. The equipment was of a type used previously by Deryagin, but his results could not be reproduced. K. Stewart and I. S. Jones, of the United Kingdom, and Fish and coworkers reported measurements of empirical resuspension factors. measurements relate air concentrations of radioactivity (in microcuries per cubic meter) to surface activities (in microcuries per square meter) doors. Friedlander and Pasceri described the use of a rotating disk for the diffusional sampling of particles in the range from 70 Å to 0.1 micron in diameter. The particle size distribution function for particles in room air showed a maximum at about 0.03 micron diameter, but the maximum changed with time.

The meeting was sponsored by the American Association for Contamination Control (AACC), the Health Physics Society, and Oak Ridge National Laboratory. Proceedings of the symposium will be published at a later date.

S. K. FRIEDLANDER W. M. Keck Engineering Laboratories, California Institute of Technology, Pasadena

Forthcoming Events

September

8-10. Gas Chromatography, 5th intern. symp., Brighton, England. (Organizing Office, 61 New Cavendish St., London, W.1, England)

8-10. Nonsteroidal, Antiinflammatory Drugs, intern. symp., Milan, Italy. (S. Garattini, Instituto di Richerche Farmacologische "Mario Negri," Via Eritrea 62, Milan)

9-11. Applied Spectroscopy and Analytical Chemistry, 11th symp., Ottawa, Ontario, Canada. (Chemical Inst. of Canada, 48 Rideau St., Ottawa 2)

9-11. Kinetics of **Pyrolytic Reactions**. Ottawa, Ontario, Canada. (K. J. Laidler, Dept. of Chemistry, Univ. of Ottawa, Ottawa 2)

9-11. European Organization for Quality Control, 8th conf., Baden-Baden, Germany. (Secretariat, Weena 700, Rotterdam 3, Netherlands)

9-11. International College of Surgeons. North American Federation, congr., Chicago, Ill. (Secretariat, 1516 Lake Shore Dr., Chicago 60610)

9-12. Society of General Physiologists, Woods Hole, Mass. (R. Milkman, Dept. of Zoology, Syracuse Univ., Syracuse, N.Y. 13210)

9–12. American **Political Science** Assoc.. annual, Chicago, Ill. (The Association, 1726 Massachusetts Ave., NW, Washington, D.C. 20036)

10-13. **General Practice**, 6th intern. congr., Salzburg, Austria. (K. Engelmeier, Intern. College of Medical Practice, Lange Str. 21a, 474 Oelde, Germany)

11-12. Diseases Common to Animals and Man, annual West-Northcentral conference, Omaha, Nebr. (N. G. Miller, College of Medicine, Univ. of Nebraska, Omaha 5)

11-12. Scandinavian Neurosurgical Soc., 18th annual, Oslo, Norway. (K. Kristiansen, Neurosurgery Dept., Ulleval Sykehus, Oslo)

11-14. German Soc. of Metallurgy and Mining, general assembly, Hanover. (Gesellschaft Deutscher Metallhütten und Bergleute, Paul-Ernststr. 10, Clausthal-Zellerfeld, Germany)

13-16. Electrical Insulation, conf., New York, N.Y. (J. Lenkey, Anaconda Wire

and Cable Co., 605 Third Ave., New York, N.Y. 10016)

13-16. American Fisheries Soc., Atlantic City, N.J. (E. A. Seaman, 1404 New York Ave., Washington, D.C.)

13-17. Power, World conf., Lausanne, Switzerland. (U.S. Natl. Committee, World Power Conf., c/o Engineers Joint Council, 345 E. 47 St., New York 10017)

14-15. Chromatography, 3rd intern. symp., Brussels, Belgium. (Belgian Soc. of Pharmaceutical Sciences, rue Archimede 11, Brussels 4)

14–15. Nutrition, Canadian-U.S. conf., Toronto, Ont., Canada. (J. M. R. Beveridge, Dept. of Biochemistry, Queen's Univ., Kingston, Ont.)

14-16. Military Electronics (MIL-E-CON 8), intern. conf., Inst. of Electrical and Electronics Engineers, Washington, D.C. (H. M. O'Bryan, Bendix Corp., 1730 K St., NW, Washington, D.C. 20006)

14-17. International Assoc. of Milk and Food Sanitarians, Hartford, Conn. (H. L. Thomasson, Box 437, Shelbyville, Ind.)

14-18. Aeronautical Research and Development, NATO advisory group, 14th general assembly, Lisbon, Portugal. (The Assembly, 64, rue de Varenne, Paris 7°, France)

14-18. Analogue Computation, 4th intern., Brighton, England. (E. L. Harder, Westinghouse Electric Corp., East Pittsburgh, Pa.)

14-18. Aviation and Space Medicine, intern. congr., Dublin, Ireland. (S. O'Quigley, Aer Lingus-Irish International Airlines, Dublin Airport, Dublin, Ireland)

14-18. Mass Spectrometry, intern. conf., Paris, France. (Secretariat, Groupement pour l'Avancement des Méthodes Spectrographiques, 1, rue Gaston-Boissier, Paris 15°)

14-18. Microwave Tubes, 5th intern. congr., Paris, France. (Secretariat, B.P. No. 20, Bagneux, Seine, France)

14-18. Operational Research and the Social Sciences, intern. conf., Cambridge, England. (Operational Research Soc., 64 Cannon St., London, E.C.4, England)

14-18. Radio Meteorology, world conf., Boulder, Colo. (J. W. Herbstreit, Central Radio Propagation Laboratory, National Bureau of Standards, Boulder 80301)

14-18. Weather Radar, 11th conf., Boulder, Colo. (J. W. Herbstreit, Central Radio Propagation Laboratory, National Bureau of Standards Boulder Research Laboratories, Boulder)

14-19. Ceramics, 9th intern. congr., Brussels, Belgium. (European Assoc. for Ceramics, 13, rue des Poissoniers, Brussels 1)

14–19. Instruments and Measurements, 6th intern. conf., Stockholm, Sweden. (RESO Congr. Service, Stockholm 1)

15-17. Armed Forces Management Assoc., 11th natl. conf., Detroit, Mich. (The Association, P.O. Box 7603, Washington, D.C.)

15-17. Luminescence, conf., Hull, Yorkshire, England. (G. F. J. Garlick, Physics Dept., Univ. of Hull, Hull)

15-17. Chemical Reaction Engineering, 3rd European symp., Amsterdam, Netherlands. (J. G. van de Vusse, c/o Kon. Shell Laboratorium, Badhuisweg 3, Amsterdam)

15-18. Nuclear Photography, intern. conf., Geneva, Switzerland. (Scientific

Conf. Secretariat, European Organization for Nuclear Research, Geneva 23)

15-19. Industrial Chemistry, 35th intern. congr., Warsaw, Poland. (Secretariat, Rydgiera 8, Warsaw 86)

16-18. American Assoc. of **Medical Clinics**, annual, Bal Harbour, Fla. (The Association, Box 58, Charlottesville, Va.)

17-18. Computing, 7th annual Northwest conf., Seattle, Wash. (R. K. Smith, Northwest Computing Assoc., Box 836, Seahurst, Wash.)

17-18. Engineering Management, conf., Cleveland, Ohio. (Inst. of Electrical and Electronics Engineers, Box A, Lenox Hill Station, New York, N.Y. 10021)

17-18. Polypropylene Fibers, symp., Southern Research Inst., Birmingham, Ala. (W. C. Sheehan, SRI, 2000 Ninth Ave. S., Birmingham, Ala. 35205)

17-19. Cancer, 5th natl. conf., Philadelphia, Pa. (American Cancer Soc., 219 E. 42 St., New York, N.Y. 10017)

17-19. British Assoc. of **Urological Surgeons**, annual, Sheffield, England. (Joint Secretariat, 47 Lincoln's Inn Fields, London, W.C.2, England)

17-20. Science Education, intern. conf., Banff, Alberta, Canada. (S. Trieger, Faculty of Education, Univ. of Alberta, Edmonton, Canada)

18. Hungarian Chemical Soc., Tihany. (M. T. Beck, Szabadsag ter 17, Budapest 5, Hungary)

19-26. Gynecology and Obstetrics, 4th world congr., Buenos Aires, Argentina. (R. Lede, Primera Catedra de Ginecología, Hospital de Clínicas, Córdoba 2149, Buenos Aires)

19-27. Scientific Films Assoc., 18th intern. congr., Athens, Greece. (SFA, 38, Avenue des Ternes, Paris 17°, France)

20–23. Ceramic-Metal Systems, American Ceramic Soc., French Lick, Ind. (ACS, 4055 North High St., Columbus, Ohio)

20–23. American Inst. of Chemical Engineers, Las Vegas, Nev. (F. J. Van Antwerpen, 345 E. 47 St., New York, N.Y. 10017)

20-24. American Soc. of **Oral Surgeons**, Chicago, Ill. (E. W. Gilgan, 119 North Michigan Ave., Chicago 11)

20-25. **Neuroradiology**, 7th symp., New York, N.Y. (J. M. Taveras, Neurological Inst., Columbia-Presbysterian Medical Center, New York, N.Y. 10032)

20–26. Anaesthesiology, 3rd world congr., São Paulo, Brazil. (L. Rodrigues Alves, Caixa Postal 330, São Paulo)

21–24. Agricultural Engineering, intern. congr., Lausanne, Switzerland. (P. Regamey, Etat de Vaud, 14. Cite-Devant, Lausanne)

21–24. German Soc. for **Psychology**, 24th congr., Vienna, Austria. (J. Rohracher, Deutsche Gesellschaft für Psychologie, Am Hof le, 5300 Bonn, Germany)

21-25. Animal Care Panel, 15th annual New York, N.Y. (ACP, P.O. Box 1028, Joliet, Ill. 60434)

21–26. **Documentation**, 30th intern. conf., The Hague, Netherlands, (Intern. Federation for Documentation, 7 Hofweg, The Hague)

21–26. Electrochemical Thermodynamics and Kinetics, intern., London, England. (M. Fleischmann, Dept. of Physical Chemistry, Univ. of Newcastle upon Tyne, England)

NEW 2nd EDITION

An Introduction to THE FINE STRUCTURE OF CELLS AND TISSUES

By **KEITH R. PORTER**, Ph.D., Harvard University, Cambridge; and

MARY A. BONNEVILLE, Ph.D., Brown University, Providence, Rhode Island

136 loose-leaf sheets, 8½" × 11", punched to fit standard size notebooks. 32 full-page electron microscopic illustrations and 5 text figures, all with accompanying legends. Loose-leaf edition \$4.50. Available also in a cloth-bound edition. \$7.50.

NEW (2nd) 1964 EDITION. This 81/2" × 11" portfolio of full-page electron micrographs and accompanying legends has been completely revised. Several illustrations of the first edition have been replaced, and more are drawn from human tissues to satisfy student interest in such material. 5 additional illustrations cover such important cell and tissue types as bone, ovary, gastric mucosa and spleen. The legends, revised and updated to reflect newer information, are supplemented by text figures — line and three-dimensional drawings of structural relationships that are difficult to understand from the two-dimensional micrographs. This book effectively overcomes the problems peculiar to teaching submicroscopic histology by presenting illustrations of exceptional clarity and size, and which depict the fine structure of intracellular components without sacrificing essential information on the interrelation-ships of several cell types. They are ideally suited to illustrate lecture and laboratory notes. When used in tests as "unknowns" they will reveal promptwhether students have learned enough about submicroscopic morphology to discuss and interpret previously unseen micrographs.
