

See separations
clearly...
right down
to the
stopcock
housing!

UNBREAKABLE NALGENE® SEPARATORY FUNNELS

See for yourself! Separation lines between two phases are clearly defined right down to the stopcock housing. And, the parallel bore above the stopcock allows better separations. Precision one-piece molding for a smooth, continuous surface assures a smooth flow.

Nalgene Separatory Funnels of autoclavable polypropylene are unbreakable... even the stem won't break or chip. They resist all chemicals—even HF. Can be centrifuged by cutting off the stem. The non-stick Teflon* TFE stopcock provides a perfect seal without lubrication... no danger of contamination.

Assortable with other Nalgene labware for maximum discounts. Order from your lab supply dealer or write for new Catalog P-166 to Dept. 21271, The Nalge Co., Inc., Rochester, N. Y. 14602.

TRAINING

For Careers in

HEALTH

SCIENCE

ADMINISTRATION

Through the PHS Grants

Associates Program

Scientists interested in the administrative challenge implicit in Federal programs supporting training, research, and services in health related fields are urged to consider opportunities in the Grants Associates Program of the Public Health Service.

The program provides a unique educational experience designed to prepare each associate for a career in health science administration. For a 12 month period the grants associate participates in an individually structured program. He has the opportunity of working with senior scientist administrators, attending seminars, visiting project sites, attending scientific meetings and taking part in evaluation and analysis of grant supported programs.

The nature of the biomedical and health services programs in the Public Health Service affords many opportunities for exceptionally well qualified Scientist Administrators.

If you hold a doctorate in a discipline related to the biomedical sciences, including the behavioral sciences, have some post doctoral research experience, and are motivated toward the administration of federally supported programs in the biomedical and behavioral sciences, you should investigate the opportunities offered by the Grants Associates Program. The beginning salaries for these Civil Service appointments range from \$8,900 to \$14,500. For further information write: The Executive Secretary, Grants Associates Program.

New and Important from Holt, Rinehart & Winston

BIOLOGY, 3rd Edition

Willis Johnson, Richard A. Laubengayer,
Louis E. DeLanney, and Thomas A. Cole,
all of Wabash College

This third edition of a most successful
basic text is distinguished by its balanced
treatment of plant and animal material.

April 1966 800 pp. \$9.25 tent.

LABORATORY MANUAL IN BIOLOGY

Willis H. Johnson, Richard A. Lauben-
gayer, Louis E. DeLanney, and Thomas
A. Cole, all of Wabash College

This manual not only accompanies the
text but also aids in setting up labora-
tories.

July 1966 192 pp. \$3.95 (tent.) paper

PLANT DIVERSIFICATION

Theodore Delevoryas, Yale University

This survey of the evolution of form and
function in the plant kingdom outlines
and traces some of the major changes in
that domain. (*Modern Biology Series*)

1966 160 pp. \$2.25 paper

AN INTRODUCTION TO MARINE BOTANY

E. Yale Dawson, The Smithsonian Institu-
tion

No other current book in English sur-
veys all of the major fields of marine
botany included in this volume and pre-
sents them as a unified subject of scientific
inquiry.

April 1966 352 pp. \$8.50 tent.

REGENERATION

Elizabeth D. Hay, Harvard Medical School
Offers a modern cellular approach to re-
generation, dealing with the subject at
the level of nucleic acids and protein syn-
thesis. (*Biology Study Series*)

August 1966 150 pp. \$4.75 tent.

ORGANOGENESIS

Edited by Robert DeHaan, Carnegie In-
stitution of Washington, and Heinrich
Ursprung, The Johns Hopkins University
Carefully edited and integrated, this book
presents for the first time in print a num-
ber of important papers on organogenesis.

1965 816 pp. \$20.00

Chromatography in a New Light
Brighter Contrast—Better Definition
With
**CHROMATO-VUE® Portable UV Darkroom
and TRANSILLUMINATORS**

Paper chromatogram under ordinary ultraviolet illumination Clearer definition, brighter contrast with Transilluminator Fluorescence

Now, thin layer and paper chromatography are more precise techniques with the improved CHROMATO-VUE® Cabinet and TRANSILLUMINATORS.

- Short wave (2537 Å) and long wave (peak at 3650 Å) sources in the CHROMATO-VUE® Cabinet quickly and accurately locate fluorescing and absorbing spots on chromatograms.
- MINERALIGHT® Short Wave and BLAK-RAY® Long Wave TRANSILLUMINATORS are positioned directly under and emit through chromatograms. Thus, greatly increased ultraviolet intensity turns dim or marginal fluorescence into clearly defined spots with brilliant contrast.

For complete information, write for Catalog S-150.
