Chromatography in a New Light
Brighter Contrast—Better Definition
With
**CHROMATO-VUE® Portable UV Darkroom
and TRANSILLUMINATORS**

Paper chromatogram under ordinary ultraviolet illumination Clearer definition, brighter contrast with Transilluminator Fluorescence

Now, thin layer and paper chromatography are more precise techniques with the improved CHROMATO-VUE® Cabinet and TRANSILLUMINATORS.

- Short wave (2537 Å) and long wave (peak at 3650 Å) sources in the CHROMATO-VUE® Cabinet quickly and accurately locate fluorescing and absorbing spots on chromatograms.
- MINERALIGHT® Short Wave and BLAK-RAY® Long Wave TRANSILLUMINATORS are positioned directly under and emit through chromatograms. Thus, greatly increased ultraviolet intensity turns dim or marginal fluorescence into clearly defined spots with brilliant contrast.

For complete information, write for Catalog S-150.

New AAAS Symposium Volume:

MAN, CULTURE, AND ANIMALS: THE ROLE OF ANIMALS IN HUMAN ECOLOGICAL ADJUSTMENTS

Editors: Anthony Leeds and Andrew P. Vayda
304 pp., illus., bibliog., indexes, August 1965. Price:
\$8.00. AAAS members' cash orders: \$7.00.

The volume is based on a symposium held at the AAAS meeting in Denver, December 1961. It presents case studies of the relationships among human populations, the animals they use for food or food-getting, the plants significant for maintaining both animals and men, and the socio-cultural usages by which plants, animals, and men are linked in ecosystems.

Anthropologists and geographers discuss animal characteristics, populations dynamics, diets, and other ecosystem variables, including culture. The case material is used for a unique effort to rethink the logic of functional analysis in anthropology in terms of general systems approaches.

PERSONNEL PLACEMENT

POSITIONS WANTED

Analytical Chemist, Ph.D. 1952, female, interested in medical research, considerable background in microchemistry and clinical chemistry, some toxicology. Experienced in TLC. Box 50, SCIENCE. X

AS Research Director and Lecturer of Mathematics, Astronomy and Philosophy. Doctorate level of studies. Pure science level. University staff position. Astronomical scientist. Box 52, SCIENCE. X

Biochemist, Ph.D. 1963. Extensive experience in intermediary metabolism and enzymological aspects of ion-transport chemistry. Desires academic appointment. Box 57, SCIENCE. X

Biologist-Anatomist, Ph.D. seeks position requiring excellent teaching. Extensive experience in histology, embryology, cytology, neuroanatomy, human and comparative anatomy. Publications. Box 53, SCIENCE. X

Botanist, M.S., research and college teaching experience. Desires teaching position in college or junior college in New England. Box 55, SCIENCE. X

Embryologist, Developmental Physiologist, Ph.D., research in chemical differentiation, immunology, teratogenesis. Teaching experience. Academic position desired. Box 56, SCIENCE. X

Ph.D. in Solid-State Physics desires position associated with research group in biophysics, medical physics or related field. Box 41, SCIENCE. X

(a) **Ph.D. Pharmacologist**, CNS training, industrial experience; prefers research management.
(b) **Ph.D. Microbiologist** (biochemistry minor), prefers teaching (microbiology, virology, molecular biology), and research.
(c) **Ph.D. Anatomist** (human anatomy, biochemistry minors), teaching, research experience and preference.
(d) **M.S. Microbiology**, mycology training; teaching, clinical, public health experience. Please write to Science Service, The Medical Bureau, Inc., 900 North Michigan Avenue, Chicago, Illinois 60611.

POSITIONS WANTED

Pharmacologist, Ph.D., broad experience in primary/secondary evaluation of CNS, anorectic agents; comprehensive pharmacological background; proven success record in drug development. Seeks responsible position in pharmaceutical, chemical industry or government. Box 58, SCIENCE. X

Physiologist-Nutritionist, Ph.D. 1961. Gastrointestinal, radiotracer, metabolism experience. Desires research position—progressive G.I. physiology group. Box 51, SCIENCE. 3/25

Steroid Chemist, Ph.D. 1959. Broad research experience in steroid biochemistry and chemistry. Publications and interests are in the area of metabolism, biosynthesis and mechanism of action. Desires research position preferably in California. Box 54, SCIENCE. X

Tumor Virologist, Ph.D. Experience, publications. Box 40, SCIENCE. X

Vertebrate Zoologist, Ph.D. desires teaching-research position at Lutheran college or university. Box 43, SCIENCE. X

Veterinarian. 1962 University of Pennsylvania graduate. Associated with successful bovine practitioner. Several publications, some research experience. Desires large animal clinical and research position in institution or industry. Box 24, SCIENCE. X

POSITIONS OPEN

Predoctoral and postdoctoral (M.D.) traineeships in Biochemistry. Graduate appointments leading to Ph.D. and post-M.D. appointments for research training available for academic year 1966-67. Excellent facilities in modern, air-conditioned building. Wide variety of research areas—molecular biology, enzymology, biophysical chemistry, intermediary metabolism, natural product chemistry, analytical biochemistry, etc. Generous stipend plus tuition and fees for 12 months. Apply by April 1, 1966 to: Dr. Richard Abrams, Department of Biochemistry and Nutrition, Graduate School of Public Health, University of Pittsburgh, Pittsburgh, Pennsylvania 15213.

POSITIONS OPEN

Biochemists: 2 positions available for basic research in either atherosclerosis or obesity. Salaries up to \$12,510 for Ph.D. applicants. Contact Personnel Officer, VA Hospital, Brooklyn, New York 11209.

POSITIONS OPEN

ONE VIROLOGIST and ONE IMMUNOLOGIST. Ph.D.'s experienced in Cancer Research. Permanent research position in privately endowed well-staffed, well-equipped Research Laboratory. You will participate in a cooperative research program and also money is available to initiate your own independent research program. Salary is above University level. Write to: Research Laboratories, Glenwood, Hills Hospitals, Minneapolis, Minnesota 55422 or phone 612-588-9401.

Experienced Medical Technologist (ASCP) with M.S. degree in biochemistry or microbiology. Salary range \$12,000 to \$15,000. Box 59, SCIENCE.

Physiologist-Endocrinologist: Interested in endocrine system and experienced in animal operative procedures. Annuity, insurance and generous salary. BOX 60, SCIENCE.

POSITIONS OPEN

CHEMIST OR PHYSICIST

OPPORTUNITY available to teach in a small liberal arts college in northern New Hampshire. This would involve setting up an introductory course and working with a limited number of liberal arts oriented students. A broad background and experience are preferred. Ph.D. desirable, but not essential.

Apply: Richard Hindley, Chairman of the Faculty, Franconia College, Franconia, New Hampshire.

DALHOUSIE UNIVERSITY

Applications are invited for two positions with salary and rank according to qualifications. Preference will be given to applicants with specialization in Microbiology and Aquatic Biology including aspects of Fish Biology. Applications with curriculum vitae, list of publications and letters of recommendation should be submitted to the Head, Department of Biology, Dalhousie University, Halifax, N. S., Canada.

Graduate Assistantships in Microbiology

Appointment leading to M.S. and Ph.D., \$2400 plus remission of tuition for academic year. Variety of research projects. Positions available July or September 1966. For further information contact:

Dr. Arthur K. Sz
Department of Microbiology
Georgetown University Medical & Dental School
Washington, D.C. 20007

WANTED — HISTOCHEMIST

Technologist to supervise Histology Department and to develop histochemical procedures for routine and research programs. Good working environment with considerable flexibility. Must have flexible personality with strong interest in chemistry: 8000 surgical cases and 250 autopsies per year. We would consider applicants with potential even if somewhat short on experience. State salary desired. Apply to John I. Antonius, M.D., The Mason Clinic, Seattle, Washington.

MEDICAL COLLEGE OF GEORGIA. Graduate study leading to the Ph.D. in the Basic Health Sciences. NEA Fellowships, NSF Traineeships, NIH Traineeships, Teaching and Research Assistantships. Write: F. J. Behal, Director, School of Graduate Studies, Medical College of Georgia, Augusta, Georgia 30902

Predoctoral Traineeships in Biochemistry are available at the University of Kentucky to qualified applicants who are U.S. citizens. Stipends for first-year Trainees are \$2400 plus tuition, plus a \$500 allowance for each dependent. The department is well equipped and the research interests of the staff are diverse. Inquiries should be addressed to **Director of Graduate Studies, Department of Biochemistry, Medical Center, University of Kentucky, Lexington, Kentucky 40506.**

SUMMER SCIENCE STAFF NEEDED

Physics & Electronics teaching position Available at Adirondack Science Camp, \$900. - \$1000. plus R & B for six-week program. College sponsored summer science program for boys 12-16. Write: Mr. Ernest M. Coons, State University College, Plattsburgh, N. Y.

UNIVERSITY OF SASKATCHEWAN

Department of Anatomy

Applications are invited for the position of assistant professor in anatomy. Salary range \$8,200 - \$10,600 according to experience. Ample opportunities for research in various fields. Good research facilities. Apply to **Chairman of the Department of Anatomy, Saskatoon, Saskatchewan, Canada.**

POSITIONS OPEN

BIO-ORGANIC CHEMISTS

Well-known company located in the Princeton-Rutgers area has immediate openings for chemists (B.S., M.S. or Ph.D.) with experience and interest in the field of macromolecular natural products, their isolation, purification and characterization. Strong background in bio-analytical and biochemical procedures desirable.

Send confidential resume to Personnel Manager

Carter-Wallace, Inc.

Cranbury, New Jersey

An Equal Opportunity Employer

CANADA, THE UNIVERSITY OF WESTERN ONTARIO, CHAIR OF ANATOMY

Applications are invited for the post of Professor and Head of the Department of Anatomy. The Department is responsible for teaching Gross Anatomy, Embryology, Histology and Neuroanatomy to students of Medicine, Dentistry and allied fields. Teaching and research facilities located in new Medical Sciences Building. Address application or inquiry, marked Confidential, to the selection committee chairman, **Professor A. D. McLachlin, Department of Surgery, Faculty of Medicine, University of Western Ontario, London, Ontario, Canada.**

CELLULAR AND MOLECULAR BIOLOGY

Predocutorial stipends including payment of tuition are available in the Graduate School of the University of Florida for study toward the Ph.D. degree in Cellular and Molecular Biology under a university-wide program involving the colleges of Agriculture, Arts and Sciences and Medicine. Minimum requirements: B average last two undergraduate years and GRE average of 550 or better.

For information write to: Co-ordinating Chairman for Cellular and Molecular Biology, c/o Department of Anatomy, College of Medicine, University of Florida, 32601.

MANAGER-SCIENTIFIC PLANNING

Leading national multi-plant organization in the health and science industries seeks a corporate level staff scientist to headquarter in Evanston, Illinois, offices. Will identify basic trends in medicine, find and evaluate new product opportunities for company through scientific liaison with research groups, industry, government agencies, and universities. Will deal with all phases of product development from idea stage through implementation. Age 30-45, Ph.D., with biochemistry or pharmacology background. Prefer prior experience in commercial areas of product development or related product research and planning fields. Excellent compensation, benefits, and incentives. Please write **Mr. R. V. Seaman, Jr., Vice-President-Personnel, American Hospital Supply Corporation, 1740 Ridge Avenue, Evanston, Illinois.**

POSTDOCTORAL OPPORTUNITY IN BIOCHEMISTRY: Fellowships available to recent graduates in biochemistry, biophysics or organic chemistry, who desire specialized experience. Excellent facilities are available for studies in Mechanism of Hormone Action, Plasma Cell, or Lymphoid Tumors, Steroid Chemistry, and Connective Tissue chemistry. Submit curriculum vitae and references to:

Dr. Vincent P. Hollander, Director
Research Institute for Skeletomuscular Diseases,
Hospital for Joint Diseases & Medical Center
1919 Madison Ave.
New York, N.Y. 10035

POSITIONS OPEN

Chief, Bureau of Research in Higher and Professional Education Chief, Bureau of Department Programs Evaluation Chief, Bureau of School Programs Evaluation

New York State Education Department, Albany. Salary range \$13,170 to \$15,825. Appointment above the minimum salary level possible and a salary increase anticipated in 1966. Excellent non-contributory retirement plan, professional development leave programs and health insurance.

Bureau responsibilities:

(1) Research in Higher and Professional Education: the testing of new solutions to identified problems in the registered professions.

(2) Department Programs Evaluation: assessing the extent to which existing Department programs are producing desirable results.

(3) School Programs Evaluation: advising the State's school districts in the use of standardized tests and tests developed by the Department.

Qualifications: Doctoral degree, several years of appropriate experience in education, and demonstrated ability to plan and carry through research. Write to **Bureau of Personnel, State Education Department, Albany, New York, 12224** for detailed announcement.

FELLOWSHIPS

Graduate Fellowships and Assistantships in Molecular-Cellular Biology Program leading to M.S. and Ph.D. degrees. **Chairman, Biology Department, Boston College, Chestnut Hill, Mass. 02167**

POSTDOCTORAL FELLOWSHIP INSTITUTE OF UPPER ATMOSPHERIC PHYSICS University of Saskatchewan Saskatoon, Canada

Applications are invited for a postdoctoral fellowship for work in theoretical upper atmospheric physics with particular emphasis on photochemical and dynamic processes in the 50 to 200 km height region. An extensive program of experimental observations using balloon, rocket and ground-based techniques are being carried out at the Institute.

Fellowship—\$6500.00 per annum. Tenable 1-2 years. Travelling allowance to Saskatoon.

Applications should reach **Director, Institute of Upper Atmospheric Physics, University of Saskatchewan, Saskatoon, Sask., Canada**, as soon as possible and not later than June 30th, 1966.

CE 3-5318

These three new ultracentrifuges will give you larger volume separations at higher speeds than ever before

The MODEL L4 is a 65,000 rpm Preparative Ultracentrifuge

With its 65,000 rpm drive, the Model L4 can handle the highest force separations possible today, in either swinging bucket or fixed angle rotors. The L4 can use all Model L rotors and the new high speed L2-65 rotors to give you forces to 420,000 *g* and capacities from 15 ml to 1600 ml. And if you want separations on a still larger scale...

The MODEL L4 is also a Zonal Ultracentrifuge

You can put 1725 ml in the L4's large-scale Zonal Rotor. This rotor permits introduction of density gradient and sample solution, and recovery of fractions, during rotation, and gives you 40,000 rpm and 90,000 *g* to induce separations. However, if you want fractions in even greater quantities than you can expect from 1725 ml...

The MODEL L4 is also a Continuous Flow Ultracentrifuge

The L4's Continuous Flow Rotor accepts sample solution at a rate of approximately two liters per hour. As sample solution flows in, supernatant flows out and particles settle in the gradient under a force of 90,000 *g* at 40,000 rpm. For more about this newest ultracentrifuge from Spinco Division of Beckman Instruments, write for Data File L4-5.

Beckman

INSTRUMENTS, INC.

SPINCO DIVISION

PALO ALTO, CALIFORNIA • 94304

INTERNATIONAL SUBSIDIARIES: GENEVA; MUNICH; GLENROTHES, SCOTLAND; TOKYO; PARIS; CAPETOWN; LONDON

It takes a pretty special instrument package to give you simple, high-performance liquid scintillation counting.

Only the Mark I Liquid Scintillation Computer has what it takes.

Model 6860 (Ba¹³³ external standard)
Model 6863 (Ra²²⁶ external standard)

Everything about our Mark I™ Liquid Scintillation Computer is there to help you cut down on your work load. To let you handle all sample types and energies, quickly and easily. To give you unmatched counting accuracy and system reliability.

Here are just some of the reasons why the Mark I has what it takes for your kind of work:

1. Exclusive, all-electronic data computer with integrated microcircuits.
2. Three separate, identical counting channels.
3. 150-sample capacity with temperature control.
4. All operating controls located on front panel within easy reach.
5. Automatic external standardization with choice of Ra²²⁶ or Ba¹³³ standard.
6. Three scalars with 0.2 μ sec resolution. Crystal-controlled timer.
7. Preset time, preset count, and preset time/preset count control on all three scalars.
8. No high-voltage adjustments necessary.
9. Reproducible, positive-step discriminators and amplifier attenuators with dynamic ranges to cover any beta spectrum.
10. Individual background subtractors on each counting channel.
11. Low-count reject on each counting channel.
12. Foolproof sample-changing and index numbering.
13. Automatic counting of preselected sample groups.
14. Repeat counting for best statistical accuracy and reproducibility comparison.
15. Built-in data conversion for card punch, tape punch, electric typewriter, and Teletypewriter.
16. Wide selection of data listing sequences.
17. Continuous presentation of number of sample being counted.
18. Calibration and operating logic designed for the individual convenience of multiple users.
19. Set-up for single-, dual-, or triple-labelled samples.
20. Guaranteed performance specifications.

Call your Nuclear-Chicago sales engineer or write to us for the complete details on the Mark I.
