

# I've found it!!

## MY BEST BUY IN LIFE INSURANCE

Have you discovered  
low-cost **TIAA** coverage?

For example,

A **\$50,000** POLICY COSTS ONLY **\$98** at age 30. Here's how:

### \$50,000 20-Year Home Protection Policy

Age at Issue	25	30	35
Annual Premium ( <i>Payable only 16 Years</i> )	\$134.00	\$159.00	\$206.50
Cash Dividend End of First Year*	55.50	61.00	70.50
First Year Net Premium	\$ 78.50	\$ 98.00	\$136.00

\*These dividends are based upon the 1966 dividend scale and are, of course, not guaranteed.

This is a plan of level premium Term insurance which provides its largest amount of protection initially, reducing by schedule each year over a 20-year period to recognize decreasing insurance needs. There are several other insurance periods, and Home Protection policies are available at all ages under 56.

**ARE YOU ELIGIBLE FOR TIAA?** Yes, if you are employed by a college, university, private school, or other nonprofit educational or scientific institution that qualifies for TIAA eligibility.

Send the coupon for the new Life Insurance Guide and a personal illustration of TIAA policies for your age.

## Porter & Bonneville-Introduction to The Fine Structure of Cells and Tissues

By KEITH R. PORTER, Ph.D., Harvard University  
and MARY A. BONNEVILLE, Ph.D., Brown University

The new knowledge of cell physiology, chemistry and structure has profoundly influenced the teaching of all the life sciences and promises to revolutionize the biology of tomorrow. Students must now be informed on cellular phenomena, from molecular activity upward. In this authoritative text they will find information on the Golgi apparatus, mitochondria, DNA and RNA, cell membranes, histochemistry, and a bridge from electron microscopy to light microscopy. 32 full-page (8½" x 11") electron micrographs of unsurpassed clarity provide details of intracellular structure and tissue architecture, secretory epithelia, reproductive tissues, supporting tissues, blood and lymphoid cells, contractile tissue and nervous tissue. Concise and clearly-written legends accompany each plate on facing pages.

32 Electron Micrographs, 8½" x 11". 5 Text Figures. 37 Legends.

Folio Edition, punched for 3-ring Notebook—\$4.50. Clothbound—\$7.50.

a new  
easy to use  
direct reading  
laboratory  
conductivity  
bridge

The YSI Model 31 Conductivity Bridge is brand new and specifically designed for laboratory use. Measure conductivity and resistivity with convenience, speed, and accuracy at 60 cycles or 1 kc. Use it over the entire range of electrolytic conductance from demineralized water to strong acids.

A unique multiplier scale, overlapping the basic scale, permits fast, easy direct reading. A high intensity parallel bar electron ray tube provides easy, exact determination of null. Line cord and electrodes are located out of the way.

Specifically designed for the laboratory, the YSI Model 31 is the most easy to use conductivity bridge available. Three new laboratory designed precision conductivity cells also are available. Ask us for full details.

GODFREY  
STEREOMODELS  
by Bronwill

NOW  
ONLY

\$29<sup>50</sup>

#### GODFREY STEREOMODELS

- Easily snap together... and stay together.
- Elements rotate freely about single bonds... yet stay put even in intermediate twist conformations of cyclohexane.
- Vividly, permanently color-coded... and virtually unbreakable.
- Bond angles and internuclear distances are remarkably accurate (1Å=2.5 cm).
- No tools required for assembly... hand connections only.
- Structural components include olefinic and aromatic double bonds, acetylenic triple bonds, the benzene ring, amide and nitrile groups, tetrahedral and trigonal carbon and nitrogen, digonal oxygen and sulfur, hydrogen and the halogens plus carbonyl oxygen, thionyl sulfur and the cyclopropane ring... over 200 components in all.

Godfrey Stereomodels let you see skeletal structure, let you measure internuclear distances, accurately.

# TRUBORE®

## Ace Precision Bore Glass Tubing

\* Standard inside diameter tolerances  $\pm 0.0004''$

\* Special tolerances available as low as  $\pm 0.00005''$

Ace Trubore is precision bore tubing of the highest quality, uniformity, which can be held to critical tolerances  $\pm 0.0004''$  on standard tubing with special tolerances as low as  $\pm 0.00005''$ . The process to precisely control the bore of glass tubing was pioneered by Ace some 22 years ago. It is used in Ace Trubore Stirrers, McLeod Gauges, and is available for your fabrication in many categories:

- (a) *Precision orifice for Flowmeters, Atomizers, Impingers*
- (b) *Dilatometers, Manometers, McLeod Gauges*
- (c) *Glass Bearings, Tissue Grinders, Syringes*
- (d) *Electronic Parts, Hermetic Seals, Trimmer Capacitors, Inductors*
- (e) *Photometer Cells*

Trubore is available in many standard sizes: round bore tubing is available in 90 standard sizes ranging from 0.008" I.D. to 2.007" I.D.; square tubing from 6 mm I.D. x 125 mm to 25.4 mm I.D. x 300 mm. Special sizes are available. For full information, write Dept. S.

# WITH THIS NEW HAMNER SCANNER Go Directly into Computer Compatible Format

Now data from X-ray or nuclear counting experiments can be processed more accurately and in a fraction of the time previously required. Representing a major step beyond data display and printout, Hamner's NE-11 series of Solid State Scanners permit the direct conversion of such data directly into computer compatible format.

Computer interface is achieved by converting scaler or timer input into perforated tape. Model NE-11A will couple up to four channels of six-digit BCD data into an unmodified Model 33 Teletypewriter set to provide printed output and ASCII code punched tape. Model NE-11B uses the same input, but operates an unmodified Tally 420 Tape Perforator to provide eight level odd parity punched tape.

Both models are four-width modules conforming to the new A.E.C. National Laboratory Standards (TID-20893). By permitting the direct use of computers in the reduction of experimental data, time consuming manual manipulations are eliminated. High reliability is assured since parity is provided as part of the tape information. And the tapes may be used to make additional copies of the data or to transmit it elsewhere over commercial lines.

For more information, write to Dept. H and ask for Bulletin NE-11.

## MINIMUM CONTACT—MAXIMUM SAFETY

with self-sticking  
TIME LABORATORY  
TAPES and LABELS

Self-sticking tapes and labels eliminate a direct source of personal contamination in laboratories. Pre-printed or plain tapes and labels provide a quick means of marking laboratory equipment. Just write necessary data on label (use pencil, pen or grease marker) and place it on any surface — glass, metal or plastic. Labels stick tight through autoclave (up to 250°), deep freeze (to -70°), or water bath. When no longer needed these tapes and labels can be quickly removed leaving no sticky residue. Vinyl Coated — available in white or colors.

See your laboratory or hospital supplier for a complete selection of Time Tapes and Labels.

*uses a new*  
*computer language...*  
*...algebra*

Tap in the problem, digit by digit, sign by sign, with decimal points and parentheses and power of 10 exponents, just as if you were writing it out. The Mathatron prints the problem on paper tape, then prints out the answer. As simple as that.

Four or eight independent storage registers, 24 or 48 step ferrite core memory, 100 column number capacity, 8 to 9 significant digit accuracy, automatic decimal placement, electronic speeds, optional pre-wired programs, all solid state logic and circuitry. It won't solve everything, of course.

If you already have a large data processor, consider this: 80% of the Mathatron owners have big computers, too.

But they can't stand the time lag, or the hourly cost, or the gaff. The Mathatron is twice the size of a typewriter and is accessible, immediately, to the whole department.

Write for further information.
