Among topics discussed at a meeting of the International Science Association of Esperantists were norms for standardization of editorial policy and format for publication, and translation by computer (chief discussant, H. D. Neumann). Members of the Universal Medical Esperanto Association visited the National Cancer Institute and the Cardiac Surgery Hospital; they were also treated to a social reception at Chinzan-So, as guests of H. Shinoda. There were various excursions in and around Kyoto between 8 and 13 August.

The 51st Congress is scheduled for next August in Budapest.

PHYSICAL CLIMATOLOGY by William D. Sellers

Looks at the manifestations of climate as energy transformations, primarily at the boundary between the atmosphere and the earth's surface. "... will make a very fine text for senior and incipient graduate students for a one semester course ... a good modern reference for workers in the various fields of ecology who have an interest in climate." — *Science Magazine*. \$7.50

LECTURES ON GEOLOGY

Including Hydrography, Mineralogy, and Meteorology with an Introduction to Biology by John Walker. Edited with Notes and an Introduction by Harold W. Scott.

If James Hutton, John Playfair, Sir James Hall and Robert Jameson were the fathers of geology — then John Walker was its grandfather. This remarkable man taught all of them but Hutton, at the University of Edinburgh. He discarded the academic concepts of ancient and medieval times and organized the known facts into the study now called geology. The publication of these lectures, unearthed by Harold W. Scott in the library of the University of Edinburgh, is an important discovery in the history of science. \$8.50

New Hamner X-Ray Catalog

Experimenters employing counting techniques in X-Ray diffractometry, fluorescence, absorption and microanalysis will find information on improving the quality of their experimental data in Hamner's new X-Ray Counting Systems Catalog.

The catalog contains brief descriptions and specifications on Hamner's modular instruments and suggests typical complete systems. The inherent sensitivity, reliability and flexibility of Hamner instrumentation provide the researcher with high levels of analytical data in any of a wide variety of circuit configurations and with most commercially available goniometer systems.

Chromatography in a New Light
Brighter Contrast—Better Definition
 With
CHROMATO-VUE® Portable UV Darkroom
 and **TRANSILLUMINATORS**

Paper chromatogram under ordinary ultraviolet illumination

Clearer definition, brighter contrast with Transilluminator Fluorescence

Now, thin layer and paper chromatography are more precise techniques with the improved CHROMATO-VUE® Cabinet and TRANSILLUMINATORS.

- Short wave (2537 Å) and long wave (peak at 3650 Å) sources in the CHROMATO-VUE® Cabinet quickly and accurately locate fluorescing and absorbing spots on chromatograms.
- MINERALIGHT® Short Wave and BLAK-RAY® Long Wave TRANSILLUMINATORS are positioned directly *under* and emit *through* chromatograms. Thus, greatly increased ultraviolet intensity turns dim or marginal fluorescence into clearly defined spots with brilliant contrast.

NEW from PHARMACIA

SEPHADEX[®] LH-20

extends gel filtration to organic solvents

Pharmacia Fine Chemicals now introduces the first lipophilic derivative—Sephadex LH-20—to extend the use of Sephadex to organic solvents. Since it swells in water, polar organic solvents and in mixtures of these solvents, Sephadex LH-20 makes it possible to apply the conventional Sephadex gel filtration technique in fields such as lipid chemistry, polymer chemistry and other areas of organic chemistry and biochemistry where organic solvents must be used.

Sephadex Solvent-Resistant Column

Having internal diameter 2.5 cm and 45 cm length, the new Sephadex Column SR 25/45 has been especially developed for chromatography in organic solvents. It is equipped with two specifically designed Upward-Flow Adaptors for conducting either ascending or descending chromatography as one of its many features.

RANGE OF APPLICATION

| Solvent | Approx. solvent regain ml solvent/g dry gel | Approx. bed volume ml/g dry gel |
|-------------------|---|---------------------------------|
| Dimethylformamide | 2.2 | 4 |
| Water | 2.1 | 4 |
| Methanol | 1.9 | 3.5-4.0 |
| Ethanol | 1.8 | 3.0-3.5 |
| Chloroform* | 1.8 | 3.0-3.5 |
