INDEX TO VOLUME 152

<i>No.</i>	<i>Date of Issue</i>	<i>Pages</i>	<i>No.</i>	<i>Date of Issue</i>	<i>Pages</i>
3718	1 April	1- 116	3725	20 May	1003-1134
3719	8 April	117- 276	3726	27 May	1135-1318
3720	15 April	277- 400	3727	3 June	1319-1418
3721	22 April	401- 580	3728	10 June	1419-1554
3722	29 April	581- 688	3729	17 June	1555-1654
3723	6 May	689- 812	3730	24 June	1655-1802
3724	13 May	813-1002			

Names of authors of books reviewed are printed in SMALL CAPITALS.

A

- AAAS Eighth Washington meeting, 1117
 AAAS election system (*letters*), L. Cranberg, 157; E. L. Yochelson, 1456
 Abelson, P. H.: Changing human nature (*editorials*), 1573; Factors favoring nuclear power, 703; Penny wise, pound foolish, 1333; Waste management and control, 297; Water pollution, 1015
 ABRAHAM, H. C., and E. L. FREUD (Eds.), *The psycho-analytic dialogue: the letters of Sigmund Freud and Karl Abraham, 1907-1926*, *book review of*, 921
 Academic quality (*editorial*), D. Wolfe, 1189
 Accessory burrows of digger wasps, The, H. E. Evans, 465
 Actin: volume change on transformation of G-form to F-form, T. Ikkai *et al.*, 1756
 Actinomycete: isolation and identification of agent responsible for musty odors, J. D. Dougherty *et al.*, 1372
 Actinomycin D and growth response of chick comb to androgens, W. E. Farnsworth, 1283
 Active transport of 5,5-dimethyl-2,4-oxazolidinedione, J. M. Dietschy and N. W. Carter, 799
 1-Adamantanamine hydrochloride: inhibition of rous and esh sarcoma viruses in cell culture, A. M. Wallbank *et al.*, 1760
 Adams, A. *See* Lindahl, T.
 Adaptation and natural selection: a critique of some current evolutionary thought, G. C. WILLIAMS, *book review by* R. C. Lewontin, 338
 Adaptations of amphibia to arid environments, P. J. Bentley, 619
 Adenosine triphosphate: protection against radiation-induced chromosome loss in *Drosophila*, S. Mittler and Raymond U, 1087
 Adenovirus in blood clots from cases of infectious hepatitis, W. V. Hartwell *et al.*, 1390
 ADRENDT, M. H., The mathematics of space exploration, *book review of*, 1495
 Adrenocorticotrophin-releasing hormone in peripheral blood: increase during stress, E. Anderson, 379
 Advances in earth science, P. M. HURLEY (Ed.), *book review by* W. W. Rubey, 1364
 Advances in marine biology, F. RUSSELL (Ed.), *book review of* J. W. Hedgpeth, 1613
 Adventures in living plants, E. B. KURTZ, JR., and C. ALLEN, *book review by* P. D. Hurd, 923
 Ages of experimental animals (*letters*), N. O. Calloway *et al.*, 15
 Aging (*meeting report*), P. L. Krohn, 391
 AHRENS, L. H., Applied geochronology, *book review of*, 955
 ALBANESE, A. A., Newer methods of nutritional biochemistry, *book review of*, 57
 Alexander, M. *See* Schaffer, A. C.
 Algebra and illusion (*letter*), I. D. J. Gross, 1330
 Allelic antigenic factor Inv(a) of the light chains of human immunoglobulins: chemical basis, C. Baglioni *et al.*, 1517
 Allen, L. S. *See* Caldwell, R. L., *et al.*
 ALLEN, O. N. *See* GILMOUR, C. M.
 Allen, P. Z. *See* Morrison, M.
 Allen, R. *See* Sulkin, S. E., *et al.*
 Alpern, H. P. *See* McGaugh, J. L.
 Altus, W. D. *See* Hooke, R., *et al.*
 AMALDI, E., *et al.* (Eds.), *The collected papers of Enrico Fermi*, vol. 2, *book review of*, 950
 Amara, R. C.: Data collection and systems analysis (*letter*), 450
 "Amerind" (*letter*), R. W. Dexter, 1330
 Amniotic contraction and embryonic motility in the chick embryo, R. W. Oppenheim, 528

- Analysis of complex vascular systems in plants: optical shuttle method, M. H. Zimmermann and P. B. Tomlinson, 72
 Anatomy of plants, The: with an idea of a philosophical history of plants and several other lectures read before the Royal Society, N. GREW, *book review by* J. Stannard, 918
 Anatomy of the laboratory mouse, The, M. J. COOK, *book review by* K. P. Hummel, 65
 Ancient Europe, a survey, S. PIGGOTT, *book review by* R. J. Rodden, 633
 Anders, E. *See* Urey, H. C., *et al.*
 Anderson, E.: Adrenocorticotrophin-releasing hormone in peripheral blood: increase during stress, 379
 ANDERSON, H. L. *See* AMALDI, E., *et al.*
 Anderson, R. C.: *book review of* General chemistry, 1734
 Anderson, R. C., and O. L. Loucks: Osmotic pressure influence in germination tests for antibiosis, 771
 Anderson, T. A.: Social science: support now (*letter*), 1011
 Andreassen, J.: Cilia in nematodes?, 231
 ANDREOLI, M. *See* CASSARO, C.
 Andres, K. *See* Geballe, T. H., *et al.*
 Animal care: licensing of experimenters (*letter*), F. B. Orlans, 447
 Antarctic asteroid odontaster validus: constancy of reproductive periodicities, J. S. Pearse, 1763
 Antigenic differences in the surfaces of hyphae and rhizoids in allomycetes, S. A. Fultz and A. S. Sussman, 785
 Antimicrobial agents and chemotherapy (*meeting report*), D. Perlman, 108
 Applied geochronology, L. H. AHRENS, *book review by* H. Faul, 955
 Archaeology of southern Mesoamerica, G. R. WILLEY (Ed.), *book review by* T. P. Culbert, 1230
 Archeology in an emergency, F. Johnson, 1592
 Arnaud, C. D. *See* Hargis, G. K., *et al.*
 Arnold, C. A.: *book review of* The morphology of gymnosperms, 340
 Aronson, J. R., *et al.*: Infrared spectra from fine particulate surfaces, 345
 Aronson, L. R., and M. L. Cooper: Seasonal variation in mating behavior in cats after desensitization of glans penis, 226
 Arp, H.: Quasar red shifts, 1283. *See* B. Hoffman, Quasar red shifts: can they be due to implosion?, 671
 Art and science? yes! (*letters*), D. G. Barry *et al.*, 1011
 Arterial constrictor response in a diving mammal, K. M. Bron *et al.*, 540
 ARTHUR, D. R., Ticks of the genus *Ixodes* in Africa, *book review of*, 750
 ARZIMOVICH, L. A., Elementary plasma physics, *book review of*, 955
 Ash, J. E. *See* McCormac, B. M.
 Aspects of scientific explanation: and other essays in the philosophy of science, C. HEMPEL, *book review by* N. R. Hanson, 192
 Astronautics for science teachers, J. G. MEITNER (Ed.), *book review by* L. Blitzer, 499
 Atkins, H. L. *See* Greenberg, M. L., *et al.*
 Atlas and keys of fruits and seeds occurring in the Quaternary deposits of the U.S.S.R., N. J. KATZ *et al.*, *book review by* B. de Vries, 942
 Atwood, C. E. *See* Knerer, G.
 AUGUSTINE, R. L., Catalytic hydrogenation, *book review of*, 953
 AUSTIN, C. R., Fertilization, *book review of*, 634
 Autobiographical notes, I. M. SECHENOV, *book review by* J. Brožek, 930
 Auxin-induced ethylene formation: its relation to flowering in the pineapple, S. P. Burg and E. A. Burg, 1269
 Availability of a cationic herbicide adsorbed on clay minerals to cucumber

- seedlings, J. B. Weber and D. C. Scott, 1400
 AVNIMELECH, M. A., Bibliography of Levant geology: including Cyprus, Hatay, Israel, Jordania, Lebanon, Sinai, and Syria, *book review of*, 1049
 Ayres, J. (*News and Comment*): Fish flour, 738

B

- BACHARACH, A. L. *See* EDHOLM, O. G.
 Background to Newton's *Principia*, J. HERIVEL, *book review by* R. S. Westfall, 915
 Bacq, Z. M.: *book review of* Progress of biochemical pharmacology: first international symposium of radiosensitizers and radioprotective drugs, 63
 Bacteriophage T5 chromosome fractionation: genetic specificity of a DNA fragment, Y. T. Lanni *et al.*, 208
 Bader, R. S. *See* Tenczar, P.
 BADGLEY, P. C., Structural and tectonic principles, *book review of*, 950
 Baglioni, C., *et al.*: Allelic antigenic factor Inv(a) of the light chains of human immunoglobulins: chemical basis, 1517
 BAILEY, A. M., and R. J. NIEDRACH, Birds of Colorado, vols. 1 and 2, *book review of*, 944
 Bailey, J. M., *et al.*: Mutarotase in higher plants: distribution and properties, 1270
 Baker, G. E.: *book review of* Spore liberation, 939
 Baker, R. S. *See* Reimer, C. B., *et al.*
 Baldessarini, R. J., and I. J. Kopin: Tritiated norepinephrine: release from brain slices by electrical stimulation, 1630
 BAJUSZ, E., Nutritional aspects of cardiovascular diseases, *book review of*, 938
 Bajusz, E., and F. Homburger: Myopathies (*meeting report*), 1112
 Baker, H. G., and G. L. Stebbins: The genetics of colonizing species: proceedings of the first international union biological sciences symposium on general biology, *book review of*, 495
 Ball, J. K., *et al.*: Prolonged immunosuppression and tumor induction by a chemical carcinogen injected at birth, 650
 Balsley, J. R.: *book review of* Electromagnetism and the earth's interior, 951
 Bamboos: a fresh perspective, The, F. A. MC CLURE, *book review by* J. R. Reeder, 1497
 Banse, K.: *book review of* Meeresbiologie: eine einführung in die probleme und ergebnisse, 937
 Bar, H.-P. *See* Perry, T. L., *et al.*
 Barghoorn, E. S., and J. W. Schopf: Microorganisms three billion years old from the Precambrian of South Africa, 758
 Baron, S. *See* Buckler, C. E., *et al.* *See also* Levy, H. B., *et al.*
 Barrs, H. D.: Root pressure and leaf water potential, 1266
 Barry, D. G., *et al.*: Art and science? yes! (*letters*), 1011
 Bartz: A. E.: Eye and head movement in peripheral vision: nature of compensatory eye movements, 1644
 Barut, A. O.: *book reviews of* Lie groups for physicists, and Symmetry groups in nuclear and particle physics, 1048
 BASSETT, L. G., *et al.*, Principles of chemistry, *book review of*, 1231
 Bass, A. D.: NIH traineeships (*letter*), 1458
 BATES, R. L., and W. C. SWEET, Geology—an introduction, *book review of*, 1495
 Bayer, A. E. *See* Hooke, R., *et al.*
 BEADLE, G., and M. BEADLE, The language of life, *book review of*, 1733
 Beadle, G. W.: *book review of* A history of genetics, 922
 Beadle, M. *See* Beadle, G.

INDEX TO VOLUME 152

- Beal, E. O.: *book review* of A monograph of Lemnaceae, 935
 Beardmore, J. A.: Electrophoretic variants in enzymes, 1106
 Beasley, T. M., and H. E. Palmer: Lead-210 and polonium-210 in biological samples from Alaska, 1062
 Beaty, C. B. *See* Weaver, H. E., et al.
 Beckenbach, E. F.: *book review* of Studies in real and complex analysis, vol. 3, 952
 Bedell, G., and Govindjee: Quantum yield of oxygen evolution and the Emerson enhancement effect in deuterated *Chlorella*, 1383
 Behrens, E. W.: Recent emerged beach in eastern Mexico, 642
 Bekkerkunst, A.: Nicotinamide-adenine dinucleotide in tubercle bacilli exposed to isoniazid, 525
 BELL, E. J. *See* GRIST, N. R., et al.
 Bell, P. R. *See* Caldwell, R. L., et al.
 BELL, T. M., An introduction to general virology, *book review* of, 939
 Bellware, F. T. *See* Smith, A. E.
 Belson, M. *See* Moore, R., et al.
 Benjamin, C. G.: Computers and copyrights, 181
 Bennett, L.: Insect aerodynamics: vertical sustaining force in near-hovering flight, 1263
 Bentley, P. J.: Adaptations of amphibia to arid environments, 619
 Bentley, P. J. and K. Schmidt-Nielsen: Cutaneous water loss in reptiles, 1523
 BENTON, A. H., and W. E. WERNER, JR., Field biology and ecology, *book review* of, 498
 Benuazizi, A. *See* Irwin, S.
 BERELSON, B. (Ed.), Family planning and population programs, *book review* of, 1611
 BERKELEY, D. S. *See* BERKELEY, E.
 BERKELEY, E., and D. S. BERKELEY, The Reverend John Clayton: a person with a scientific mind—his scientific writings and other related papers, *book review* of, 918
 Bernlohr, R. W.: Ornithine transcarbamylase enzymes: occurrence in *Bacillus licheniformis*, 87
 Berns, D. S., et al.: Urease activity in blue-green algae, 1077
 Bersohn, R.: *book review* of Molecular biophysics, 937
 Berson, S. A., and R. S. Yalow: Iodinsulin used to determine specific activity of iodine-131, 205
 BESANCON, R. M. (Ed.), The encyclopedia of physics, *book review* of, 951
 Bessman, S. P. *See* Hammel, C. L.
 Beta-glucuronidase activity in serum increased by coronary-artery atherosclerosis, B. F. Miller et al., 775
 Bibliography of Levant geology: including Cyprus, Hatay, Israel, Jordania, Lebanon, Sinai, and Syria, M. A. AVNIMELECH, *book review* by I. G. Sohn, 1049
 Billings, M. P.: *book review* of *Traité de tectonique*, 1363
 Binder, A. B.: Mariner IV: analysis of preliminary photographs, 1053
 Biochemical energetics and kinetics, A. R. PATTON, *book review* by J. M. Reiner, 63
 Biochemical engineering, A. E. HUMPHREY and N. F. MILLIS, *book review* by R. Finn, 1497
 Biological nature of man, The, G. G. Simpson, 472
 Biological role of the nucleic acids, The, D. COHEN, *book review* by J. Goldstein, 496
 Biology of viruses, The, K. M. SMITH, *book review* by H. S. Ginsberg, 940
 BioSciences Information Service of Biological Abstracts, P. V. Parkins, 889
 Biosynthesis and composition of histones in Novikoff hepatoma nuclei and nucleoli, L. S. Hnilica et al., 521
 Birch, S. M. *See* Gerber, P., et al.
 Birds of Colorado, vols. 1 and 2, A. M. BAILEY and R. J. NIEDRACH, *book review* by H. Friedmann, 944
 Birth order and achievement (letters), R. Hooke et al., 1177
 Bivalve mollusks: fluid dynamics of burrowing, E. R. Trueman, 523
 Black, A. H. *See* de Toledo, L.
 Black, R. L.: *book review* of Clinical roentgenology, 1736
 Blitzer, L.: *book review* of Astronautics for science teachers, 499
 Blood-group substances, W. M. Watkins, 172
 Blood pressure responses of wild giraffes studied by radio telemetry, R. L. Van Citters et al., 384
 Bock, R. M.: *book review* of Nucleic acids: structure, biosynthesis, and function, 935
 BOLEY, F. I., Plasmas—laboratory and cosmic, *book review* of, 956
 Bolinger, R. E., and P. J. Burnham: Medical experimentation on humans (letters), 448
 Book publishing—and bookkeeping, D. N. Fischel, 871
 BORISOV, A. A., Climates of the U.S.S.R., *book review* of, 498
 Bork, A. M.: Physics just before Einstein, 597
 Borsos, T. *See* Weintraub, R. M., et al.
 Boston studies in the philosophy of science, vol. 2, R. S. Cohen and M. W. Wartofsky (Eds.), *book review* by M. Hesse, 918
 Bowness, J. M.: Epinephrine: cascade reactions and glycogenolytic effect, 1370
 Brace, W. F. *See* Press, F.
 Brachiopoda, vols. 1 and 2, A. WILLIAMS, *book review* by J. T. Dutro, Jr., 494
 Bradley, W. E., and F. S. Wright: Visceral reflex activity: development in postnatal rabbit, 216
 Bradner, H. *See* Isaacs, J. D., et al.
 Brain research (*meeting report*), A. Lajtha et al., 550
 Branched-chain fatty acids in sediments, R. F. Leo and P. L. Parker, 649
 Breakthrough: the saga of Jonas Salk, R. Carter, *book review* by T. O. Lipman, 911
 Brewer, F. A.: Samuel Johnson on dermo-optical perception (letter), 592
 Brindley, G. W., and G. L. Millhollen: Chemisorption of water at high temperatures on kaolinite: effect on dehydroxylation, 1385
 Brode, B. R.: *book review* of, The Fulbright program: a history, 914
 BRODIE, B. B., and J. R. GILLETTE (Eds.), Drugs and enzymes, *book reviews* of, 1232 and 1733
 Broecker, W. S., et al.: Strontium-90 fallout: comparison of rates over ocean and land, 639
 Bross, I. D. J.: Algebra and illusion (letter), 1330
 Brožek, J.: *book review* of Autobiographical notes, Essays on the history of physiology in Russia, and Reflexes of the brain, 930

Instructions for Contributors

The Editors of *Science*

General Editorial Policies

All papers submitted are considered for publication. The author's membership or lack of membership in the AAAS is not a factor in selection. Papers are accepted with the understanding that they have not been published, submitted, or accepted for publication elsewhere. Authors will usually be notified of acceptance, rejection, or need for revision in 4 to 5 weeks (Reports) or 6 to 10 weeks (Articles).

Types of papers. Six types of signed papers are published: Articles, Reports, Letters, Technical Comments, Meeting Reports, and Book Reviews. Familiarize yourself with the general form of the type of paper you wish to submit by looking over a recent issue of the journal, and then follow the instruction for that type of paper.

Reviews. Almost all Articles, Reports, and Technical Comments, whether solicited or not, are sent to two or more outside referees for evaluation of their significance and soundness. Forms showing some of the criteria reviewers are expected to consider are available on request.

Editing. Papers are edited to improve the effectiveness of communication between the author and his readers. The most important goal is to eliminate ambiguities. In addition, improvement of sentence structure often permits readers to absorb salient ideas quickly. When editing is extensive, with consequent danger of altered meanings, papers are returned to the author for correction and approval before type is set. Authors are free to make additional changes at this stage.

Proofs. One set of galley proofs or an equivalent is provided for each paper. Keep alterations to a minimum, and mark them only on the galley, not on the manuscript. Extensive alterations may delay publication by 2 to 4 weeks.

Reprints. Reprints are provided at cost. An order blank accompanies most proofs. Special arrangements can be made to obtain reprints of letters and book reviews.

Writing Papers

Organize your material carefully, putting the news of your finding or a statement of the problem first, supporting details and arguments second. Make sure that the significance of your work will be apparent to readers outside your field, even if you feel you are explaining too much to your colleagues. Present each step in terms of the purpose it serves in supporting your finding or solving the problem. Avoid chronological steps, for the purpose of the steps may not be clear to the reader until he finishes reading the paper.

Provide enough details of method and equipment so that another worker can repeat your work, but omit minute and comprehensive details which are generally known or which can be covered by citation of another paper. Use metric units of measure. If measurements were made in English units, give metric equivalents.

Avoid specialized laboratory jargon and abbreviations, but use technical terms as necessary, defining those likely to be known only in your field. Readers will skip a paper they do not understand. They should not be expected to consult a technical dictionary.

Choose the active voice more often than you choose the passive, for the passive voice usually requires more words and often obscures the agent of action. Use first person, not third; do not use first person plural when singular is appropriate. Use a good general style manual, not a specialty style manual. The University of Chicago style manual, the style manual of the American Institute of Physics, and the *Style Manual for Biological Journals*, among others, are appropriate.

Manuscripts

Prepare your manuscript in the form used by *Science*. Use a good bond paper for the first copy. Submit two

carbons. Do not use "erasable" or thin paper for the first copy. Double-space title, abstract, text, signature, address, references (including the lines of a single reference), figure legends, and tables (including titles, columns, headings, body, and footnotes). Do not use single-spacing anywhere. Put the name of the first author and the page number in the upper righthand corner of every page.

Paging. Use a separate page for the title: number it page 1. Begin each major section—text, references and notes, and figure legends—on a new sheet. Put each table on a separate sheet. Place figure legends and tables after the references.

Titles. Begin the title with a word useful in indexing and information retrieval (not "Effect" or "New").

References and Notes. Number all references to the literature, footnotes, and acknowledgments in a single sequence in the order in which they are cited in the text. Gather all acknowledgments into a single citation, and keep them short ("I thank," not "I wish to thank"). Cite all references and notes but do not cite them in titles or abstracts. Cite several under one number when feasible. Use *Chemical Abstracts List of Periodicals* for abbreviations of journal names. If the journal is not listed there, provide the full name. Use the following forms:

- | | |
|-----------------|--|
| <i>Journal:</i> | H. Smith, <i>Am. J. Physiol.</i> 98 , 279 (1931). |
| <i>Book:</i> | F. Dachille and R. Roy, <i>Modern Very High Pressure Techniques</i> (Butterworth, London, 1961), pp. 163-180. |
| <i>Chapter:</i> | F. Dachille and R. Roy, in <i>Reactivity of Solids</i> , J. H. De Boer, Ed. (Elsevier, Amsterdam, 1960), p. 502. |

Illustrations. Submit three copies of each diagram, graph, map, or photograph. Cite all illustrations in the text and provide a brief legend, to be set in type, for each. Do not combine line drawings and photographs in one illustration. Do not incorporate the legend in the figure itself. Use India ink and heavy white paper or blue-lined coordinate paper for line drawings and graphs. Use heavier lines for curves than you use for the axes. Place labels parallel to the axes, using capital and lower-case letters; put units of measurement in parentheses after the label—for example, Time (sec). Plan your figures for the smallest possible printed size consistent with clarity.

Photographs should have a glossy finish, with sharp contrast between black and white areas. Indicate magni-

fication with a scale line on the photograph.

Tables. Type each table on a separate sheet, number it with an arabic numeral, give it a title, and cite it in the text. Double space throughout. Give each column a heading. Indicate units of measure in parentheses in the heading for each column. Do not change the unit of measure within a column. Do not use vertical rules. Do not use horizontal rules other than those in the heading and at the bottom. A column containing data readily calculated from data given in other columns can usually be omitted; if such a column provides essential data, the columns containing the other data can usually be omitted.

Plan your table for small size. A one-column table may be up to 42 characters wide. Count characters by counting the widest entry in each table column (whether in the body or the heading) and allow three characters for spaces between table columns. A two-column table may be 90 characters wide.

Equations and formulas. Use quadruple spacing around all equations and formulas that are to be set off from the text. Most should be set off. Start them at the left margin. Use the solidus for simple fractions, adding the necessary parentheses. But if braces and brackets are required, use built-up fractions. Identify hand-written symbols in the margin, and give the meaning of all symbols and variables in the text immediately after the equation.

Articles

Articles, both solicited and unsolicited, may range in length from 2000 to 5000 words (up to 20 manuscript pages). Write them clearly in reasonably nontechnical language. Provide a title of one or two lines of up to 26 characters per line and a subtitle consisting of a complete sentence in two lines with a character count between 95 and 105 for the sentence (spaces between words count as one character each). Do not break words at the ends of lines. Write a brief author note, giving your position and address. Do not include acknowledgments. Place title, subtitle, and author note on page 1. Begin the text on page 2.

Insert subheads at appropriate places in the text, averaging about one subhead for each three manuscript pages.

INSTRUCTIONS FOR CONTRIBUTORS

Keep them short—up to 35 characters and spaces. Do not use more than one degree or level of subheads.

Provide a summary at the end.

Do not submit more than one illustration (table or figure) for each 4 manuscript pages unless you have planned carefully for grouping. With such planning, many illustrations can be accommodated in one article. Consult the editorial office for help in planning.

Reports

Short reports of current research results may vary in length from 600 to 2000 words (up to 8 manuscript pages) of text. Limit illustrative material (both tables and figures) to one item for each 3 manuscript pages. Three items is the maximum. A research report should have news value for the scientific community or be of unusual interest to the specialist or of broad interest because of its disciplinary nature. It should contain solid research results or reliable theoretical calculations. Speculation should be limited and is permissible only when accompanied by solid work.

Title. Begin the title with an important word (preferably a noun) that is likely to be useful to indexers. The title may be a conventional one (composed primarily of nouns and adjectives), a sentence (containing a verb), or a structure with a colon (Nictitating Membrane: Classical Conditioning and Extinction in the Albino Rabbit). Limit it to three lines of complete words of no more than 32 characters per line (spaces between words count as one character each). Do not use abbreviations. Type the title in the middle of page 1.

Abstract. Provide an abstract of 45 to 55 words on page 2. The abstract should amplify the title but should not repeat it or phrases in it. Qualifying words for terms used in the title may be used. Tell the results of the work, but not in terms such as "_____,," "was found," "is described," or "is presented."

Text. Begin the text on page 3. Put the news first. Do not refer to unpublished work or discuss your plans for further work. If your paper is a short report of work covered in a longer paper to be published in a specialty journal, you may refer to this paper if it has been accepted. Name the journal. If the manuscript has not

been accepted, refer to it as "in preparation." Omit references to private communications. Do not use subheads.

Signature. List the authors on the last page of the text and give a simple mailing address.

Received dates. Each report will be dated the day an acceptable version is received in the editorial office.

Letters

The Letters section provides a forum for discussion of matters of general interest to scientists. Letters are judged only on clarity of expression and interest. Keep them short and to the point; the preferred length is 250 words. The editors frequently shorten letters.

Technical Comments

Letters concerning technical papers in *Science* are published as Technical Comments at the end of the Reports section. They may add information or point out deficiencies. Reviews are obtained before acceptance.

Meeting Reports

Meeting reports should summarize two to four of the most important scientific results and give an interpretation of them in terms that can be understood by a wider audience than that represented by those who attended the symposium. Focus your report on events that will have interest, news value, and significance to an audience of varied background. A definitive report is not possible, and a catalog of who spoke on what subject is dull.

Book Reviews

Book reviews for *Science* are solicited. Describe, appraise, and evaluate the book. Write for a general scientific audience. Consider the book's scope, purpose, contents, and potential usefulness, and state your opinion of the book clearly and concisely.

Cover Photographs

Particularly good photographs suitable for use on the cover are desired if they can be published in connection with any type of paper.
