

Univ. Press, New York, 1966. 222 pp. \$6. Eight papers: "Technology and innovation" by Jerome B. Wiesner; "Industry and the paradox of ubiquitous individuation" by Edwin H. Land; "The management of change: A personal view" by Robert L. Hershey; "The function of research in a corporation or industry" by E. R. Piore; "Can we feed the world?" by William H. Sebrell, Jr.; "Some speculations on the social impact of technology" by Donald N. Michael; "The need for technological change" by Henry H. Villard; and "Political implications of technology and social change" by Joseph S. Clark.

Tooth Enamel: Its Composition, Properties, and Fundamental Structure. Proceedings of an international symposium (London), April 1964. Maurice V. Stack and Ronald W. Fearnhead, Eds. Wright, Bristol, England; Williams and Wilkins, Baltimore, 1965. 231 pp. Illus. \$12. Twenty-one papers on the following topics: The Inorganic Components (7 papers); The Organic Components (Chemistry) (5 papers); The Organic Components (Structure) (3 papers); and Enamel Structure (6 papers). A discussion on each topic is included.

Transport Function of Plasma Proteins. A symposium (Paris), 1965. P. Desgrez and P. M. de Traverse, Eds. Elsevier, New York, 1966. 192 pp. Illus. \$13. Thirteen papers.

Use of Plutonium for Power Production. Report of a panel (Vienna), December 1964. Internatl. Atomic Energy Agency, Vienna, 1965 (order from Natl. Agency for Internatl. Publications, New York). 168 pp. Illus. Paper, \$3.50. Twelve papers and six summaries of discussions; most of the papers are in English, others in French.

The Use of Radioautography in Investigating Protein Synthesis. A symposium. C. P. Leblond and Katherine Brehme Warren, Eds. Academic Press, New York, 1965. 358 pp. Illus. \$18. Symposia of the International Society for Cell Biology, vol. 4. Eighteen papers on the following topics: Techniques and Methods (4 papers); Protein Synthesis in Nucleus (3 papers); Protein Synthesis in Cells of Various Types (6 papers); and Secretory Processes (5 papers).

Utilization of Thorium in Power Reactors. Report of a panel (Vienna), June 1965. Internatl. Atomic Energy Agency, Vienna, 1966 (order from Natl. Agency for Internatl. Publications, New York). 384 pp. Illus. Paper, \$8. Twenty-three papers. Technical Reports Series, No. 52.

Vane Shear and Cone Penetration Resistance Testing of In-Situ Soils. A symposium (Seattle, Wash.), October-November 1965. American Soc. for Testing and Materials, Philadelphia, 1966. 53 pp. Illus. Paper, \$2.25; members, \$1.60. Five papers: "An inspection vane" by A. Andresen and S. Sollie; "An evaluation of the field vane test in sensitive clay, by W. J. Eden; "A comparison of soil shear strengthens as determined with field and laboratory vane shear apparatus" by E. B. Hall and E. A. Miller; "Dynamic cone for shallow *in-situ* penetration testing" by G. F. Sowers and C. S. Hedges; and "A simple shear test" by E. A. Sibley and George Yamane.

Tonic for sluggish circulation ...The Temptrol Line

Your lab circulators running hot and cold? Level out with Temptrols. These constant temperature combination baths and circulating systems are made in a wide variety of models that allow you to:

- select the level of precision temperature control you need.
- select the capacity you need.
- select the temperature range you need.

Modestly priced models equipped with a hydraulic thermostat achieve a uniformity of $\pm 0.5^\circ\text{C}$ or better; those with a thermoregulator give you a uniformity of $\pm 0.07^\circ\text{C}$ or better. And you can choose the temperature range that best meets your specific needs—from -10°C to 100°C . Pumping capacities range from 42.5 to 300 gal/hr at zero head.

Temptrol baths may be used simultaneously with circulation or alone. You are assured of precise temperature control both within their built-in-baths and in separate instruments or baths through which the liquid is circulated.

The Temptrol line also includes the Lo-Temptrol, a large capacity unit that cools down to -30°C , and two versatile, budget-minded portable units, the Stir-Pump and the Porta-Temp.

In order to make the right choice, you'll want to have complete performance data on individual Temptrol units. Ask your Precision Scientific Distributor or write us, requesting Bulletin 629A.

LOW COST INFUSION PUMP ...REPRODUCIBLE TO $\pm 0.1\%$!

\$145.00
complete

Sage Series 234 Constant Speed Syringe Pumps accept all types of syringes, including convenient disposables. Several models are available, each offering a large number of discrete flow rates—obtained by varying syringe sizes (up to 10cc) and “quick-change” gears. Flow rates range from 0.112 $\mu\text{l/day}$ to 16.8 ml/min—depending on specific model chosen.

Large constant speed pumps (up to 100cc capacity) and continuously variable speed models are also available. Variable speed pumps feature a linear flow control dial and a five million to one flow rate range. Optional accessories for both types include a double syringe holder for 2 channel pumping. Infusion-withdrawal models also available.

Whatever your application, there's a Sage Syringe Pump to provide uniform, accurate, and reproducible infusion at the right rate. Ask your lab-ware dealer for a demonstration, or send today for complete data.

TESTED CHEMICALS for Disc Electrophoresis

Canal Industrial Corporation, sole licensee to the Mount Sinai Hospital Research Foundation for the manufacture and sale of equipment and supplies for Disc Electrophoresis, offers a complete selection of chemicals for use in the Disc technique. Available either in time-saving premixed kits or as basic ingredients, these chemicals are tested in electrophoretic runs before shipment to insure satisfactory results and eliminate wasted effort or loss of valuable samples. They are equally suitable for both analytical and preparative-scale Disc separations.

Shouldn't you be getting your Disc Electrophoresis chemicals from Canalco? Write for prices today.

CIVIL DEFENSE

A symposium presented at the 1965 Berkeley meeting of AAAS. Arranged by Henry Eyring. 144 pp., paper, July 1966. \$4.00; AAAS members' cash orders: \$3.50.

Participants: Owen Chamberlain, Barry Commoner, Wolfgang K. H. Panofsky, Fred A. Payne, Anatol Rapoport, John Howard Rust, Victor W. Seidel, Edward Teller, and Eugene P. Wigner.

The place of civil defense in the total picture of war and peace is one of the most important and controversial problems confronting the American public today. A major question at issue is whether or not an extensive shelter building program will diminish or increase the possibility of a catastrophic nuclear war.

Scientists who have studied problems related to modern warfare and passive civil defense systems report their findings on these subjects.

EXPANSION

Our client, a nationally prominent corporation, has asked us to search for the following individuals to staff a growing ethical, pharmaceutical and veterinary products division.

(2) *PhD-Pharmacologist*—To \$17,000: 0-8 years experience in conducting screening programs related to ethical products—Supervisory position.

(1) *PhD/MS-Pharmaceutical Chemist*—To \$16,000: 5-8 years preferred to head group of 4 scientists in research & development of ethical drugs. Dept. will act as a support group for other locations.

(2) *DVM or PhD Virologist*. To lead research and development toward new products for poultry and livestock applications.

Client co pays all employment expenses including our search fee and relocation to attractive Mid-Western or Eastern communities. Reply in confidence to W. G. Nuessle. (215) LO 8-2535.

(e) **Asst/Assoc Prof** develop tissue culture course, teach med & grad students; \$12,000 up; large univ. MidW. (f) **Biochemist** clinical and research functions; \$15,000–\$20,000; medical institute; E. Write Woodward Med. Pers. Bureau, 185 N. Wabash, Chicago 60601.

Professional Placement Services for 70 Years

RESEARCH ASSISTANT

Active Research Hematology Laboratory in this leading hospital requires person with leadership qualities. Analytical versatility highly important with experience in Enzymology and Biochemistry. Position available for immediate placement. Excellent working conditions and benefits. Please send resume with approximate salary requirements to Mrs. Francis Stanley, or phone for appointment, (212) TR 9-3000, ext. 2123.

Memorial Sloan-Kettering Cancer Center
444 East 68th St., New York, N.Y.
An Equal Opportunity Employer

POSITIONS OPEN

BIOCHEMIST

The Mead Johnson Research Center has an opportunity for a versatile Ph.D. with 0–5 years' experience to conduct research into the nature of various metabolic diseases including rheumatoid arthritis, atherosclerosis, and aging.

We offer a stimulating research atmosphere in a dynamic nutritional and pharmaceutical company, an outstanding fringe benefit program, relocation allowances, and excellent salary opportunity in a progressive Midwestern city of 150,000 with excellent education and recreation opportunities.

Please send resume including salary requirement. Confidentiality assured.

Manager, Executive Employment
Mead Johnson & Company
Evansville, Indiana 47721

An Equal Opportunity Employer

Medical Microbiologist—Unit Leader

**Rx For
Your
Future**

Ph.D. Bacteriology with experience in chemotherapy and supervision of laboratory personnel, to direct research leading to product development and to conduct basic research in area of antimicrobial agents.

This position open in our modern laboratory located in pleasant central N.Y. State community. Company offers up-to-date compensation and benefit plans.

Forward resume to F. J. Benenati, Prof'l Employment Rep.

THE NORWICH PHARMICAL COMPANY

P.O. BOX 191, NORWICH, NEW YORK 13815

An equal opportunity employer

BIOCHEMIST—Research in Arteriosclerosis (some enzymology). University of Pennsylvania, Philadelphia. Adequate salary; comprehensive fringe benefits. S-T, P.O. Box 2059, Philadelphia, Pa. 19103. Females May Apply. An Equal Opportunity Employer.

MICROBIOLOGIST

Private foundation needs Ph.D. as assistant to director of a modern well-equipped medical research laboratory in the Philippines that functions as a part of a broad clinical epidemiologic, pathologic, and microbiologic program in leprosy research. Appointments would be for 2 years with approximately 18 mo. overseas. Basic starting salary \$10,000 plus travel expenses and bonus for overseas duty. Send resume to:

C. V. Reich, Ph.D.
Philippine Branch
Leonard Wood Memorial Laboratory
Johns Hopkins School of Hygiene
615 N. Wolfe Street
Baltimore, Maryland 21205

Physical Scientists

FROZEN SEA RESEARCH

Up To \$11,800

Marine Sciences Branch
Department of Mines and
Technical Surveys
Victoria, B.C.

Two positions are immediately available for persons who will conduct both field and laboratory investigations on the formation of sea ice. Current work includes studies in heat flow, convective overturn and the crystal structure of ice.

Postgraduates in a related physical science, such as solid state physics, physical chemistry or oceanography, preferably at the doctorate level with a real interest in this new field of research are urged to apply.

For details and applications write to the

**CIVIL SERVICE COMMISSION
OF CANADA, OTTAWA 4,**

referring to file 66-110-07

ELECTRON MICROSCOPIST to direct a laboratory within the microbiology-biochemistry facilities of a mid-eastern medical school. Siemens Elmiskop 1-A scope. Both cooperative and independent research responsibilities. Box 171, SCIENCE.

University of Ottawa Department of Chemistry

Applications are invited for an associate professorship in the field of molecular biochemistry. It is intended to appoint a person who would develop an active programme of research in this field. Starting salary at least \$11,000 with a contribution towards moving expenses.

Applications, with a curriculum vitae, a list of publications and the names of two referees, should be sent as soon as possible to Professor R. E. Conway, Chairman, Department of Chemistry, University of Ottawa, Ottawa 2, Ontario, Canada.

WANTED—Experienced hospital microbiologist (Ph.D. or M.S.) preferably with some experience in virology for 266 bed general hospital expanding to 316 beds. Medical school association. Four year residency program in pathology and school of medical technology. New large well equipped air conditioned laboratory. Four weeks paid vacation, 8 paid holidays. Blue Cross-Blue Shield paid after six months. Pension plan and other fringe benefits. Basic 40 hour, 5 day week. Attendance at meetings, etc. encouraged and financed. Attractive city, with junior college, in center of year round vacation area close to Tanglewood and other music festivals. Salary open. Apply: Dr. W. Beautyman, Pathologist, Pittsfield General Hospital, Pittsfield, Mass. 01201.

Expanding educational and research corporation offers professional personnel career positions in its information, training, education, and medical research programs. Activities are national and international in scope.

**If you
make your own
thin layer plates...**

**you've just
been replaced
by a box!**

Now there's a ready-to-use thin layer plate that's better than "hand made."

New Mallinckrodt ChromAR™ plates are better, because they're more uniform. Otherwise, they're just like the plates you prepare yourself... glass plates coated with a full 250 micron layer of Mallinckrodt SilicAR® sorbent.

You'll get sharply defined chromatograms from the complete range of sample sizes. You can use any standard visualization, including uv and acid sprays.

The cost? Less than what it costs you to make your own, particularly if you consider what your time is worth as a scientist. ChromAR plates are in your choice of two sizes (2" x 8", 8" square) and four sorbents (acid or neutral, with or without phosphors). Order a supply from your Mallinckrodt distributor. For free sample plates and product data, write department TLCP, Mallinckrodt, St. Louis, Mo. 63160.

AO's Dual Viewing Microstar® for more effective communication

Two people can see the same image simultaneously without sacrificing image quality, adjustment time, or superb operating convenience.

Each viewer enjoys the same sharp image over the entire field. The Microstar's unique infinity corrected optical system eliminates blurred and fuzzy edges.

For cross-reference, an illuminated, transparent pointer is superimposed on the field. It can be positioned instantaneously to pinpoint specific slide areas or minute details of the specimen.

The Autofocus stop saves everybody's time

®Registered Trademark American Optical Company

... eliminates wasted motion. It simplifies coarse adjustment so that perfect focus is merely a matter of touching up the fine adjustment. And, since the nosepiece is gravity-loaded, it's practically impossible to break slides or to damage the objective.

Applications are unlimited—for a second opinion, immediate verification, continuous observation, or routine lab training. Whenever accurate communication is essential, consider AO's Dual Viewing Microstar.

For more information, call your AO Sales Representative or write.
