# Beckman Sharpens Your Chromatograms

The Beckman high performance Ten-Inch Laboratory Recorder gives you a response *twice* as fast as other recorders now used with gas chromatographs. Its fast pen response—0.5 second—and high degree of sensitivity and accuracy make it best suited for recording the sharp slopes and peaks of any gas chromatogram.

This recorder was specifically designed for the laboratory. Included among its many features are a small dead band of less than 0.1% full scale and a panel control permitting instant selection of seven chart drive speeds. Performance specifications and versatility enable the Beckman Ten-Inch Recorder to meet virtually any recording requirement without modification.

## ANOTHER QUICK QUIZ FOR SCIENTISTS.

**1** The works of at least \_\_\_\_\_ different authors were cited in scientific journals of 1965.

- a. 20,000
- b. 100,000
- c. 400,000

**2** Which book was cited most often in scientific journals of 1965?

- a. *The Physical Chemistry of Electrolytic Solutions*, by H. S. Harned.
- b. *The Nature of the Chemical Bond*, by L. Pauling.
- c. *Statistical Methods*, by G. W. Snedecor.

**3** The word **METHOD** or **METHODS** appears in the title of one out of every \_\_\_\_\_ articles published in the current scientific journals.

- a. 43
- b. 116
- c. 520

ANSWERS: 1-c, 2-c, 3-a.

## Invertebrate Zoology

By PAUL A. MEGLITSCH, Drake University

The basic processes of all the invertebrates, from the Protozoans through Insects and Myriapods, are covered in this introductory text, organized for use in either a one-semester or full-year course. Considerable attention is given to comparative physiology, though all discussions are comprehensible to the student of general zoology. An abundant selection of meaningful illustrations enhances the book, and a glossary, extensive references and index are included.

## Plasma Physics and High Power Lasers

## Can solar conditions be simulated in the laboratory?

## NRL invites you to help find the answer.

This is just one of the problems currently being studied at the Naval Research Laboratory. There are hundreds of others equally intriguing.

NRL, the Navy's corporate laboratory, is engaged in research and development embracing practically all branches of physical and engineering science and covering the entire range from basic investigations of fundamental problems to applied and developmental research.

The Laboratory has current vacancies and a continuing need for physicists, chemists, metallurgists, mathematicians, oceanographers, engineers (electronic and mechanical), and technical writers and editors for challenging assignments.

Persons appointed receive the full benefits of career Civil Service including regular salary increases and liberal retirement. The Metropolitan Area offers excellent living conditions and recreational facilities to suit a variety of needs. Six local universities provide opportunities for graduate study in almost any field.

The Laboratory encourages its employees to further their professional education. Send resume or Standard Form 57 to:
