

***If you're going to
dedicate a period of
your life to it—
make sure you get
the most from it.***

ENVIRONMENTAL DIVISION

We manufacture a variety of controlled environment laboratories—from bench chambers to walk-in rooms. Our experience in working with leading universities and government agencies, plus the options available in control selection, enables us to assist you in getting the *right* unit for your research program. Write us today for more information. Dept. 3 Sherer-Gillett Co., Marshall 3, Mich. 49068

PERSONNEL PLACEMENT

POSITIONS WANTED

(a) **Biochemistry Ph.D.**: Biology minor; brain tumor research using isotopes; prefers research or teaching appointment. (b) **Bacteriology M.S.**: extensive clinical and teaching experience; desires hospital or research position. Write Woodward Medical Personnel Bureau, 185 North Wabash, Chicago 60601.

Pharmacologist, Ph.D. Extensive laboratory and administrative pharmacologic background. Seeks responsible position in research and development, industry or government. Box 276, SCIENCE.

POSITIONS OPEN

Pfizer **MICROBIOLOGIST** (Virologist)

We seek a Microbiologist (Virologist), Ph.D. familiar with techniques of enzymology and molecular biology to conduct research into viral disease processes.

We offer liberal employee benefits and excellent working conditions in attractive Southeastern Connecticut. Write in confidence including education, experience and present salary to: Mr. J. R. McDonald.

CHAS. PFIZER & CO., INC.

Groton, Connecticut

An Equal Opportunity Employer

POSITIONS OPEN

Applications are invited for two positions in Department of Zoology, Teaching and Research, Ph.D. required. Fields of specialization desired: **EXPERIMENTAL EMBRYOLOGY AND ELECTRON MICROSCOPY**. Salary and rank commensurate with experience. Send resume to: **Chairman, Department of Zoology, University of Arkansas, Fayetteville, Arkansas 72701**

LABORATORY CHIEF MICROBIOLOGIST

400 Red Bronx Teaching Hospital offers an excellent opportunity for a Microbiologist experienced in clinical procedures to direct and supervise a staff of 7 Technicians in Microbiology, Serology and Parasitology.

Ph.D. preferred. Masters considered. Full range of benefits including liberal tuition refund. Salary commensurate with education and experience.

Send resume to: Box S 1438, 125 W. 41 St., NYC 10036. An Equal Opportunity Employer

GRADUATE STUDY IN THE ANATOMICAL DISCIPLINES leading to the Ph.D. degree. Preference is given to biology majors, but others may be admitted. Graduate training is offered in Radiation Biology, Aging, Neuroanatomy, Hematology, Teratology, Vital Microscopy, Cell Biology, Endocrinology and Experimental Embryology. **FELLOWSHIPS**, which are tax free, pay \$2,400 to \$2,600 plus tuition. Write **Dr. Roger C. Crafts, Chairman, Department of Anatomy, University of Cincinnati College of Medicine, Cincinnati, Ohio 45219**.

Immunologist Biochemist-Immunochemist — For research with antigens and antibodies. To conduct studies on purification and characterization and to develop immunological methods for studying problems of reproduction in animals and humans. Salary open depending on qualifications. **Center for Research in Reproductive Biology, 202 Women's Hospital, University of Michigan Medical Center, Ann Arbor, Michigan.**

POSITIONS OPEN

Molecular Biologist, Ph.D., Psychotomimetic compounds (synthesis, pharmacology, metabolism), biochemical studies concerning mental disease and brain chemistry are areas of experience. Seek position enabling continuation of research in these fields. Publications, NIMH Grant. **Box 277, SCIENCE**

GRADUATE TRAINING IN ANATOMICAL SCIENCES for qualified biology majors leading to the Ph.D. degree. Graduate study in Cytology, Radiation Biology, Hematology, Experimental Neurology, Endocrinology, Teratology, Developmental Biology. Technical Training available in Electron Microscopy, Radioactive Tracers, Zone Electrophoresis, Molecular Enzymology, Manometric Techniques, Histochemistry, Brain Stimulation, Brain Lesions, Behavioral Testing, Classical and Modern Neurohistological Techniques. **ASSISTANTSHIPS** paying \$2,400 to \$2,800 plus tuition and dependency allowance. Write **Dr. Donald C. Goodman, Chairman, Department of Anatomical Sciences, University of Florida College of Medicine, Gainesville, Florida, 32601**.

GRADUATE ASSISTANTSHIPS IN BIOLOGY — Outstanding students from a wide variety of scientific backgrounds are accepted into the Ph.D. program. Training programs are available in microbiology, molecular biology, plant physiology, physical chemical biology, developmental biology, genetics, aquatic biology and vertebrate zoology, among others. Stipends range from \$3,200 to \$4,000 per calendar year with waiver of tuition. For information write **Dr. C. A. Privitera, Biology Dept., State Univ. of N.Y., Buffalo, N.Y. 14214**.

Predoctoral Traineeships in Biochemistry are available at the University of Kentucky to qualified applicants who are U.S. citizens. Stipends for first-year Trainees are \$2,400 plus tuition, plus a \$500 allowance for each dependent. The department is well equipped and the research interests of the staff are diverse. Inquiries should be addressed to **Dr. George W. Schwert, Chairman, Department of Biochemistry, Medical Center, University of Kentucky, Lexington, Kentucky 40506**.

RESEARCH PSYCHOLOGIST-PHARMACOLOGIST

Research position exists with one of the world's leading drug manufacturers. We desire a Ph.D. in Psychology or Pharmacology to participate in research on the behavioural effects of drugs.

The individual should have no less than one year of experience in behavioural pharmacology or psychological drug research. Dissertation research will be given credit for direct experience if it is applicable to behavioural pharmacology.

You are invited to investigate this opportunity at Abbott Laboratories—whose philosophy and facilities are directed toward scientific professionals with a capacity for growth and originality of thought.

Submit complete resume to:

An Equal Opportunity Employer

AUSTRALIAN NATIONAL UNIVERSITY INSTITUTE OF ADVANCED STUDIES DEPARTMENT OF ASTRONOMY

Applications are invited for the position of **RESEARCH FELLOW** at Mount Stromlo Observatory, the Department of Astronomy of the Australian National University. Applicants will be expected to have at least several years of research experience in some branch of astronomy. The successful applicant will be expected to devote his time to the prosecution of independent research.

The salary of a Research Fellow is determined in the range \$A4,800-6,300 per annum. Appointment is usually for three years with a possible extension to five years.

Superannuation is on the F.S.S.U. pattern with supplementary benefits. Reasonable travel expenses are paid and assistance with housing is provided.

Further particulars may be obtained from the Association of Commonwealth Universities (Branch Office), Marlborough House, Pall Mall, London, S.W.1.

Applications close in Australia and London on **1 March 1967.**

PREDOCTORAL AND POSTDOCTORAL TRAINEESHIPS IN NEUROPHYSIOLOGY

are available in the Department of Physiology, New York Medical College. Applications are invited from candidates who wish to enroll in the Ph.D. program leading to a degree in Physiology and from candidates who have completed or will shortly complete the requirements for either the Ph.D. or M.D. degree.

Topics: sensorimotor organization; cerebral control mechanisms; neural control of water and electrolyte metabolism; neural excitation.

Stipends: PREDOCTORAL, \$2400 (tax exempt) yearly plus allowances for experience and dependents. Tuition is paid.

POSTDOCTORAL, \$5000 (partially tax exempt) plus allowances for experience and dependents.

SPECIAL FELLOWSHIPS are also available.

Direct inquiries to: Dr. V. B. Brooks, Professor and Chairman, Department of Physiology, New York Medical College, 1 East 106 St., New York, N.Y. 10029.

POSITIONS OPEN

GRADUATE RESEARCH ASSISTANTSHIPS in materials science at the University of Virginia—See 2 Dec. issue, page 1265 or write to: **Chairman, Department of Materials Science, Thornton Hall, University of Virginia, Charlottesville, Va. 22903.**

FELLOWSHIPS

POSTDOCTORAL FELLOWSHIP (\$6,000.00, tax-free stipend plus up to \$500.00 travel allowance) for research into enzyme synthesis in tissue and cell culture, with emphasis on nucleases and phosphodiesterases. Available immediately. **W. E. Razzell, Head, Department of Microbiology, University of Alberta, Edmonton, Alberta, Canada.**

PRE AND POSTDOCTORAL FELLOWSHIPS IN GENETICS

A number of fellowships are available at Kansas State University for candidates seeking further training in Genetics. K.S.U. has an active interdepartmental program for the study of molecular and cellular genetics. Awards are open only to U.S. citizens and will be made on a competitive basis. Applicants for predoctoral training must have a B average during junior and senior undergraduate years. Postdoctorals must have suitable letters of reference. For further information and application forms (closing date February 15, 1967) please write **K. W. Fisher, Dept. of Physics, Kansas State University, Manhattan, Kansas 66502.**

BOOKS AND MAGAZINES

AUTHORS WANTED BY NEW YORK PUBLISHER

Your book can be published, promoted, distributed by a reliable company on a subsidized basis. Fiction, non-fiction, poetry, scholarly, scientific and even controversial manuscripts welcomed. For Free Booklet write Vantage Press, Dept. SC, 120 W. 31 St., New York 10001.

Model 303 double-beam system eliminates the effects of drift in lamp, detector, and electronics. Here, Ca is run from a cold start. Burner is lighted at A, 1 ppm Ca inserted at B, withdrawn at C. Quiet, stable baseline commonly produces 5X improvement in detection limit and precision.

Model 290 readout in concentration requires no tedious calculations. Here, direct readings on an accessory linear recorder are obtained for 2, 4, 6, 8, and 10 ppm Calcium.

performance-proved instruments for ATOMIC ABSORPTION ANALYSIS

WHY YOU SHOULD USE PERKIN-ELMER ATOMIC ABSORPTION

Atomic absorption for the determination of metallic elements is today's fastest-growing analytical technique. Perkin-Elmer, a leader from the beginning, has the kind of competence that produced its Analytical Methods Book, which gives detailed guidance for 64 elements and over 300 analyses. Perkin-Elmer also publishes the Atomic Absorption Newsletter, the only technical journal devoted to the new technique.

Clearly, such deep analytical experience can result in first-class atomic absorption equipment. Indeed, Perkin-Elmer's two instruments are designed expressly for the special needs of atomic absorption: they are not compromises, accessories, or adaptations of equipment originally developed for other needs.

The Model 303 double-beam system offers speed, precision and sensitivity: With built-in 10X scale expansion,

it is possible to detect very small deviations from the stable baseline shown above, left. The ability to measure tiny signals produces the best possible detection limits.

With the DCR-1 accessory, the Model 303 reads out directly in concentration in any desired units on a four-digit illuminated display. A determination can be completed in four seconds. The DCR-1 will also automatically take and present the average of 4, 8, or 16 readings of the same sample.

The Model 290 Reads Directly in Concentration: The most time-consuming portion of conventional atomic absorption analysis is the conversion of linear transmittance readings to their logarithms, followed by curve plotting. With the 290, all this is eliminated. The 5-inch readout scale is linear in concentration.

The Model 290 is a big instrument in a small container. A 50-inch optical path has been folded into a neat 25-inch package; detection limits are therefore equal to or better than those of much larger single-beam instruments.

Both instruments can determine over 60 elements with Perkin-Elmer-built single and multi-element hollow-cathode lamps and the versatile premix burner. The nitrous oxide burner head enables analysis for Al, Ti, V, Si, the rare earths and other refractory elements. The new three-slot Boling head, for air-acetylene, does not clog with solutions containing 40% sugar, 20% lead, or undiluted serum. Yet another head provides a short optical path to reduce sensitivity and avoid dilutions.

Free training and literature: Subscriptions to the Atomic Absorption Newsletter, a bi-monthly technical journal, are available free on request. A summary of applications reprints can be obtained by writing for AA322. Instrument users receive free training courses in Chicago, Houston, Los Angeles, San Francisco, or Norwalk, Connecticut.

For details, including information on specific applications, write to the Instrument Division, Perkin-Elmer Corporation, 723 Main Avenue, Norwalk, Connecticut.

PERKIN-ELMER

Why is the granddaddy of microtomes still best for sectioning tissue?

AO's "820" Rotary Microtome is the *standard* instrument today because it accurately sections tissue from 1 micron to 50 microns thin, day after day. Sure, it now has the feed indicator in the front, a lever to lock the counter-balanced drive wheel, automatic feed release, and other refinements making it easy to use, easy to maintain, safe and attractive. That's nice, but the "820" is the best microtome you can

buy because it has a precision mechanism that smoothly feeds the specimen to a keen, rigidly mounted blade. That's what sectioning is all about. That's why you'll see rows of "820s" in large laboratories around the world. Ask the pathologist who has one. The "820" costs \$895—still the best buy. Call your AO Sales Representative today for a no-obligation demonstration, or write for more information.
