## BASIC MICROSCOPIC TECHNICS

By Ruth McClung Jones

This new modern handbook for beginning and intermediate students in the biological sciences is based on Michael Guyer's famous *Animal Micrology*. It retains the diversity of method for which the Guyer book was famous, but follows a different arrangement in most of the methods presented. More than two-thirds of the technics included in this new work were not in existence when Guyer's fifth edition was published in 1953. Dr. Jones has tested these new technics to make certain they are suitable for use by relatively inexperienced students. The result is an up-to-date basic text that is also an excellent hand reference for biological researchers. *Basic Microscopic Technics* is ideal for courses in histological technics, clinical pathology, and medical technology.

Some of the new methods described are: simpler, time-saving technics for preparing bone—vital staining technics, especially for intercellular substances and connective tissue—cytological technics suitable for karyotype analysis that eliminate sectioning—methods of preparing tissue for identification of sex chromatin bodies—methods for mounting specimens in plastic—histological methods—new technics for demonstrating small blood vessels and lymphatics in sections and in thin whole mounts—and recently developed aqueous mountants.

352 pages. \$6.50

## INVERTEBRATE NERVOUS SYSTEMS

Their Significance for Mammalian Neurophysiology  
Edited by C. A. G. Wiersma

"How did the simplest animal reflexes that could be called nervous arise and how, out of these primitive activities, did that enormously complex body of responses that we look on as evidence of mentality in higher creatures like ourselves originate?" This question forms the basis of this volume and the research of its 34 contributors. These are the published proceedings of the Conference on Invertebrate Nervous Systems held at the California Institute of Technology (1966) under the sponsorship of CIT and the National Institute of Health.

## THE WORLD HEALTH ORGANIZATION

requires a

### MEDICAL OFFICER OR SCIENTIST IN HUMAN GENETICS

Applications are invited for the post of Chief of the HUMAN GENETICS UNIT, to plan and guide the Organization's programme in human genetics and to develop international co-ordination of research in this field.

The incumbent will be called upon to provide guidance and technical advice to Member States of WHO in the field of human genetics, particularly with reference to training and research. He will be required to prepare scientific meetings, training courses, etc., and to maintain liaison with organizations having related interests.

A doctorate in medicine and/or science is required, with extensive research experience in human genetics. A thorough knowledge of the present status and trends of research in human genetics, and of the importance of this subject to further progress in the understanding of health and disease is essential.

The salary, net of tax, is of US \$13,110 rising by annual increments to US \$16,035, to which should be added a post adjustment allowance of US \$376 for a single person and US \$564 for a married person. Other allowances include a dependents' allowance and an education grant for children. Other benefits: repatriation grant, home and annual leave, sickness and accident insurance, pension fund. Initial contract for two years.

Applications and curriculum vitae should be sent to Chief, Personnel (CAND-HG), World Health Organization, Avenue Appia, Geneva, within one month of the publication of this announcement. The Organization regrets that it will be able to send replies only to candidates whose applications are under serious consideration.

## New AAAS Symposium Volume ENVIRONMENTAL VARIABLES IN ORAL DISEASE

Editors, Seymour J. Kreshover and F. J. McClure, 328 pp., illus., bibliography index, 1966. Price: \$8.75. AAAS members' cash orders: \$7.75.

Recent research on the role of environmental factors in oral disease is reported in this collection of papers from a symposium held at the AAAS meeting in Montreal, December 1964.

Twenty-four distinguished scientists present their findings in 17 chapters under four general headings:

Geographical and clinical consideration.  
Nutrition and dental caries.

Experimental considerations in oral soft tissue lesions.

Prenatally induced oral anomalies.

## AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

1515 Massachusetts Ave., N.W.  
Washington, D.C. 20005

## Personnel Placement

### POSITIONS WANTED

(a) **Biochemistry** Ph.D. 1967, microbiology minor; desires clinical or industrial position. (b) **Animal Nutrition, Physiology** Ph.D.; taught university medical school anatomy, embryology; nutritional research; prefers academic or research appointment. Write Woodward Medical Personnel Bureau, 185 North Wabash, Chicago 60601. X

### POSITIONS OPEN

#### BIOCHEMICAL ENGINEERING

Mathematician—programmer required as spearhead on computer methods with small team developing novel automated systems of biochemical analysis for medical and biological research. Experience at assembler level desirable but not essential if math. logic, or O.R. Salary approx. \$10,000. Applications to **Dr. I. E. Bush, Worcester Foundation for Experimental Biology, 222 Maple Avenue, Shrewsbury, Mass. 01545.**

#### CLINICAL CHEMIST AND MICROBIOLOGIST

**CHEMIST, Ph.D.**, with no less than 2 years experience in an approved clinical laboratory. Will supervise biochemical activities of clinical lab and design and conduct various research projects. **MICROBIOLOGIST, Ph.D.**, in Microbiology (Bacteriology) with no less than 2 years postdoctoral experience in clinical microbiology. Will supervise diagnostic bacteriology studies in clinical lab and be responsible for bacteriologic investigations on interdisciplinary research contracts.

Young vigorous life science service organization with impressive growth record and exciting career potential. Suburban location adjacent to Washington, D.C., provides pleasant and stimulating opportunities for cultural, intellectual, and leisure enjoyment. Opportunity for attending scientific meetings and publications. Salaries flexible to meet good qualifications. Excellent company benefits. **BIONETICS RESEARCH LABORATORIES, INC., P.O. Box 26, Falls Church, Virginia 22046.**

An Equal Opportunity Employer M/F

### POSITIONS OPEN

**CHEMIST:** M.S. or experienced B.S. Experienced in clinical biochemical procedures and modern analytical methodologies. Opportunities for academic advancement. Please write to: **Hipolite V. Nino, Ph.D., Clinical Biochemistry Laboratory, North Carolina Memorial Hospital, University of North Carolina, Chapel Hill, North Carolina 17514.**

#### PREDOCTORAL AND POSTDOCTORAL TRAINEESHIPS IN NEUROPHYSIOLOGY

are available in the Department of Physiology, New York Medical College. Applications are invited from candidates who wish to enroll in the Ph.D. program leading to a degree in Physiology and from candidates who have completed or will shortly complete the requirements for either the Ph.D. or M.D. degree.

**Topics:** sensorimotor organization; cerebral control mechanisms; neural control of water and electrolyte metabolism; neural excitation.

**Stipends:** PREDOCTORAL, \$2400 (tax exempt) yearly plus allowances for experience and dependents. Tuition is paid.

POSTDOCTORAL, \$5000 (partially tax exempt) plus allowances for experience and dependents.

SPECIAL FELLOWSHIPS are also available.

**Direct inquiries to: Dr. V. B. Brooks, Professor and Chairman, Department of Physiology, New York Medical College, 1 East 106 St., New York, N.Y. 10029.**

#### PREDOCTORAL TRAINEESHIPS IN CARDIOVASCULAR AND RENAL PHYSIOLOGY

are available in the Department of Physiology, New York Medical College. Applications are invited from candidates who wish to enroll in the Ph.D. program leading to a degree in Physiology.

**Topics:** cardiovascular physiology, experimental hypertension, renal electrolyte excretion.

**Stipend:** \$2400 (tax exempt) plus allowance for experience and dependents. Tuition is paid.

**Direct inquiries to: Dr. V. B. Brooks, Professor and Chairman, Department of Physiology, New York Medical College, 1 East 106 St., New York, N.Y. 10029.**

### POSITIONS OPEN

**ENZYME CHEMIST (RESEARCH)**—Ph.D. or M.D. with experience. To work in the field of tissue enzymes, as related to lipidoses. Full-time position at well-known hospital-affiliated Research Institute in New York City. **SALARY**—\$12,000 per annum plus fringe benefits and increments. Send detailed curriculum vitae and references to: **BOX 320, SCIENCE.**

**Epidemiologist**—to plan and direct studies of birth defects conducted by the Epidemiology Branch at the Dental Health Center of the U.S. Public Health Service in San Francisco. M.D. degree and advanced training and experience in epidemiology required. Specialized training in pediatrics and/or genetics preferred but not mandatory. Salary commensurate with qualifications. Federal Civil Service appointment; relevant benefits and standards apply. Non-discrimination in employment. Submit Form SF-57 (obtainable from any Post Office or Federal Agency) to: **Miss Sylvia Hay, Dental Health Center, 14th Avenue and Lake Street, San Francisco, California 94118.**

#### POSITION AVAILABLE:

**Statistician and Biostatistician** with Ph.D. to organize and head statistics program. Academic appointment. Salary \$12,000 to \$15,000 to start, increases to \$23,000. Midsouth.

**Box 326, SCIENCE**

## POSITIONS OPEN

**ASSISTANT PROFESSORSHIP** in Immunochimistry in the Department of Microbiology, Temple University School of Medicine, Philadelphia, Pa. 19140. Requires immunochemist interested in the problems of the relationship of structure to function of immunologically active natural products. Duties will involve both teaching and research. Applicants should write directly to the above address.

### BIOCHEMIST

We have a challenging opening for a Ph.D. Biochemist with a strong organic chemistry background. The assignment involves synthesis, derivation, isolation and identification of pesticide metabolites in animal and plant tissues. Send resume and salary requirement in confidence to: **Dr. J. J. Menn, Head, Biochemistry Section, STAUFFER CHEMICAL CO., P.O. Box 760, Mountain View, California 94040.**  
(An equal opportunity employer)

LAB...

### CHIEF CHEMIST CLINICAL CHEMISTRY SUPERVISOR

Ph.D. preferred. M.S. or equiv. considered. Organize & direct Chemistry Div. of 400-bed teaching hospital. Opportunity for career growth. Liberal Education Benefit. Send resume to: **Box S 236, 125 W 41 St., NYC 36. An Equal Opportunity Employer**

### EXPERIMENTAL ZOOLOGIST, PH.D.

Associate professor with research interests in Physiological Ecology or Behavioral Physiology. Active current Research program & participation in graduate training required. Write:

**Chairman, Department of Biology,  
Creighton University,  
Omaha, Nebraska 68131.**

**FACULTY POSITION:** Position in Biology starting September, 1967. Ph.D. preferred. Interest in General Science, Microbiology desirable. Salary and rank depending upon qualifications. Write: **Director, University of Hawaii, Hilo, Hawaii.**

**PHYSIOLOGIST** with M.S. in physiology and 1-5 years' experience, or equivalent, in animal research, to conduct fundamentals and applied research in gas physiology in support of diving, space and a broad program in environmental biology. Please submit your resume to **Mr. D. B. Turner, Manager of Technical Employment, Department 5737, Union Carbide Corporation, Linde Division, P.O. Box 44, 61 E. Park Drive, Tonawanda, New York. An equal opportunity employer M/F.**

### RESEARCH

Position available for bio-chemist trained in endocrinology and clinical chemistry with established record of publications. Good salary, liberal fringe benefits. Send resume to **Personnel Mgr., Bio-Science Laboratories, 7600 Tyrone Ave., Van Nuys, California 91405.**

**SCIENCE EDITOR/WRITER.** To edit, help revise, and occasionally rewrite journal article manuscripts, monographs, etc., and to write semi-popular science articles. Applicants should have some background in physical science, and excellent language skills. We are a non-profit basic research organization, supported by the National Science Foundation, devoted to advancement of some of the most challenging areas in the atmospheric sciences. Write **Personnel Department, National Center for Atmospheric Research, Boulder, Colo. 80302. An Equal Opportunity Employer**

3 MARCH 1967

## NATURAL PRODUCT CHEMIST

Arthur D. Little, Inc. has an opportunity for a Ph.D. Chemist with some experience in entomology. Familiarity with instrumental techniques, such as NMR and mass spectrometry, is also desirable. Agricultural chemical background would be helpful.

Principal areas of research will be the isolation and characterization of minute quantities of naturally occurring materials from insects. Objective is identification and synthesis of insect attractants and hormones.

Must be able to carry out research projects in a supporting problem-oriented environment.

If you are interested in and qualified for the position, please reply to **Dr. John L. Neumeyer, 15 Acorn Park, Cambridge, Massachusetts 02140.**

**Arthur D. Little, Inc.**

RESEARCH • ENGINEERING • MANAGEMENT CONSULTING

An Equal Opportunity Employer

### BIOCHEMIST

Large clinical Radioisotope Laboratory requires Biochemist with a B.S. or M.S. degree in Chemistry or Biochemistry and a minimum of 2 years supervisory experience in a general clinical laboratory. Position entails method development and supervision of routine radiochemical procedures. Previous experience with chemical and/or isotopic thyroid function studies desirable but not essential. Salary commensurate with ability and qualifications. Please send complete background to **Box 330, SCIENCE**

**Statistician**—For planning and analysis of epidemiologic studies of birth defects and dental diseases conducted by the Epidemiology Branch at the Dental Health Center of the U.S. Public Health Service in San Francisco. Experience in public health is highly desirable. Salary from \$7,696 to \$10,927 (based on qualifications of individual) with periodic increases. Federal Civil Service appointment; relevant benefits and standards apply. Non-discrimination in employment. Submit Form SF-27 (obtainable from any Post Office or Federal Agency) to: **Miss Sylvia Hay, Dental Health Center, 14th Avenue and Lake Street, San Francisco, California 94118.**

**TRAINEESHIPS IN ANATOMY:** Stipends \$2400-\$2600 plus tuition and allowances for dependents under NIH Training Grant, other sources. Course of study leading to Ph.D. Areas of special activity: endocrinology; animal behavior; cardiac, pancreatic, pulmonary, renal structure and function; venomology; genetics; cytology; electron microscopy; histochemistry; hematology. A rewarding field for students of broad biological interests; demands for trained anatomists are acute. For further information write **Dr. J. E. Lonley, Department of Anatomy, University of Louisville School of Medicine, Louisville, Kentucky 40202.**

## BACTERIOLOGIST

Union Carbide's expanding programs in the life science area have created a career position for a research bacteriologist in our Biological Research Laboratory at Tonawanda, New York. Candidates must have a Ph.D., a record of research accomplishments and course work or experience in industrial microbiology.

The successful applicant will assume responsibility for the bacteriological aspects of a broadly based, fundamental research program on the effects of modified gaseous environments on living systems. In addition, he will be expected to develop independent, creative research programs concerned with microbiological problems in such areas as food storage, water treatment, closed environmental systems, bacteriological assay procedures or mining operations.

Please reply by mail, including resume of training, experience and current earnings to **Mr. D. B. Turner, Manager Technical Employment, Dept. 5736.**

**UNION  
CARBIDE**

**UNION CARBIDE CORPORATION  
LINDE DIVISION**

P.O. Box 44 Tonawanda, New York  
An equal opportunity employer M&F

# AGRICULTURAL DEVELOPMENTAL RESEARCH

## Animal Health-Veterinary Medicine

The Department of Developmental Research of Pfizer's Agricultural Division has interesting new openings for capable researchers. These positions offer extremely broad exposure to animal agriculture, animal health and veterinary medicine, including commercial applications. Responsibilities of this group include the design and implementation of supportive research (for all animal species) for Pfizer Agricultural Products, as well as the development of Use Programs to support various technical and marketing programs. The application of data obtained also enables us to provide complete technical service on Pfizer products. Because of this group's scope there is great opportunity for personal development. Presently, the following openings exist:

## VETERINARIANS

DVM, 1 to 5 years' commercial, institutional or research experience. Graduate training in one of the life sciences is highly desirable but not mandatory. Duties will include applied research and technical service with ruminants or poultry and swine.

## NUTRITIONIST

Ph.D. required and minor in biology, microbiology, physiology or biochemistry highly desirable, however, the person with a Ph.D. in one of the above mentioned disciplines plus some background in agriculture will be given every consideration. Duties involve applied research and technical service as discussed above.

**Individuals interested in and qualified for these new positions should send a resume or letter listing education and experience to:**

MR. H. F. WHITE

**Pfizer**

Chas. Pfizer & Co., Inc.  
235 East 42nd Street, New York, N. Y. 10017

An Equal Opportunity Employer

## POSITIONS OPEN

### INVITATION TO PROFESSIONAL CAREERS

(a) **Director Med Education** 300-bed hosp and clinic; large teaching program; Ph.D. \$16,000; M.D. to \$24,000; E. (b) **Biochemist** supv dept hosp expd to 350 beds; \$15,000-\$18,000; fee pd; E. (c) **Asst Prof Physiology**, \$12,000; med college; MidW. (d) **Organic Chemist Group Leader** know govt contract protocol, supv R&D dept radiochemical mfr; \$18,000; fee pd; E. (e) **Prof Biology Dept**, develop cellular physiology courses, teach; to \$16,500; lib arts col; W. (f) **Toxicology Section Leader** supv dept, clinical research liaison; \$19,000; drug mfr; MidW. R.S.V.P. **Woodward Med. Pers. Bureau**, 185 N. Wabash, Chicago 60601. X

### RADIOLOGICAL HEALTH TRAINEESHIPS

Graduate program leading to M.S. and Ph.D. Financial support includes full tuition, fees, tax-free stipend (up to \$4800 per year, depending on background), and dependency allowance. For further information, write to **Dr. H. Cember, Technological Institute, Northwestern University, Evanston, Illinois 60201.**

## FELLOWSHIPS

### PREDOCTORAL AND POSTDOCTORAL FELLOWSHIPS IN CELL BIOLOGY

Training program with strong emphasis on chemical and physical approaches is available in the molecular biology of animal and bacterial viruses, synthesis and degradation of nucleic acids, intersections of macromolecules, design and synthesis of new therapeutic agents, control and regulation in the central nervous system and basic mechanisms of central nervous system agents. Stipend \$2400 plus allowance for tuition. Postdoctoral stipend determined by training and experience.

Write **Chairman, Dept. Cell Biology and Pharmacology, Univ. of Md., School of Medicine, Baltimore, Md. 21201**

A postdoctoral fellowship in reproductive physiology is available for the year 1967-1968. For information write to: **Dr. Ralph Brinster, Head, King Ranch Laboratory of Reproductive Physiology, School of Veterinary Medicine, University of Pennsylvania, Phila., Pa.**

### COMMONWEALTH OF AUSTRALIA QUEEN ELIZABETH II FELLOWSHIPS IN THE PHYSICAL & BIOLOGICAL SCIENCES

Applications are invited for Queen Elizabeth II Fellowships, up to five of which may be awarded in June, 1967. These postdoctoral awards, established by the Australian Government to commemorate the Royal Visit to Australia in 1963, are tenable in an Australian university or approved research institution. The Fellowships are for full-time research by young scientists of exceptional promise and proved capacity for original work, normally for two years. Tenure of a Fellowship will commence on a date which normally should be within nine months of the date of the award.

#### Qualifications

Applicants must be either Australian or United Kingdom citizens. They should have a Ph.D., or equivalent qualifications, in one of the physical or biological sciences (which are deemed to include mathematics and the scientific aspects of statistics, engineering, metallurgy, agriculture and medicine).

Awards will, in general, be restricted to applicants who are not more than 30 years of age on the date when applications close.

#### Stipend

\$6,000 (Australian) per annum—increased to \$6,500 per annum at age 28 years.

#### Allowances

Allowances are payable in respect of a Fellow's wife (\$500 p.a.), each dependent child (\$200), superannuation payments (up to 10 per cent of stipend), necessary travel expenses, necessary expenses of the research work, and appropriate personal insurance.

#### Applications

Applications should be made on the prescribed form which is obtainable, together with a full statement of the conditions of award, from the Secretary, Queen Elizabeth Fellowships Committee, Department of Education and Science, P.O. Box 826, Canberra City, A.C.T., Australia, The Official Secretary, Australia House, Strand, London, W.C.2, or the Consul General, Australian Consulate General 636 5th Avenue, New York 20, N.Y., 10020, U.S.A. Applications should be lodged at the Canberra address by 31st March, 1967.

## FELLOWSHIPS

### UNIVERSITY OF ESSEX DEPARTMENT OF MATHEMATICS AUGUSTINE COURTAULD FELLOWSHIP IN OCEANOGRAPHY

Applications are invited for the above Fellowship (salary range £1,500-£3,000 p.a.) in the Department of Mathematics for research on any topic in dynamical oceanography or meteorology. The award is tenable for one year from 1st October, 1967, and may be renewed. Applicants should possess at least a Ph.D. or relevant research experience. Applications (quoting reference MS/6) to the **Registrar, University of Essex, Wivenhoe Park, Colchester, Essex**, from whom further details may be obtained, not later than 31st March, 1967.

Postdoctoral U.S.P.H.S. Fellowships in reproduction biochemistry are available July 1, 1967. The training and research is in steroid and protein biochemistry. The program is for two years and includes travel funds to meetings as well as stipends to \$7500 per year. Write for details to:

**Paige K. Besch, Ph.D.**  
Department of Obstetrics and Gynecology  
Ohio State University Medical School  
Columbus, Ohio 43210

## Small computers are Innovation machines

The power under the direct control of the scientific investigator with small computers is enormous. Not just the power to calculate. Not just the power to analyze. But the power to innovate.

Small computers — and by that we mean laboratory size or smaller general purpose machines — are most frequently used on-line, in real time, intimately hooked up to the experiment. Inputs to the computer are direct from the experiment. Outputs are instantaneous detail, or instantaneous sampling, or instantaneous averaged results, all provided while the experiment proceeds.

Two things can now happen. First, the investigator can change the method of data taking, or the sequence of data taking, based on the results he sees emerging. He can sample more frequently than he thought necessary, or can look in detail, at an unexpected result.

Second, he can influence the experiment, either by himself or automatically by the computer, based on the results he sees emerging.

If he waited to complete the experiment and analyze the results at the computation center, the opportunity to innovate would be gone.

Small, real-time, on-line, general purpose computers are intensely personal, highly approachable, responsive scientific innovation machines. It will be the rare laboratory that will not have one in the next few years.

DIGITAL is the largest supplier of small computers to the scientific disciplines. PDP-8/S, PDP-8, LINC-8, PDP-9, PDP-9 Multi-analyzer, and five versions of the PDP-10. Write for the just-published 540-page Small Computer Handbook and Primer. Free.

## PEAK DETECTOR-PRINTOUT SYSTEM

for Spectrophotometric Serial Sample Analysis

- **Unique peak confirmation provision—**  
gives single, true peak for each sample
- **Concentration printout is immediate and**  
automatic following peak confirmation
- **Coupler accessories for Friden Tape Punch**  
or IBM Card Punch units

The Thomas PEAK DETECTOR-PRINTOUT SYSTEM for automatic recording of spectrophotometric data consists of a Model 3 CONCENTRATION READOUT which indicates and delivers printout signal for four-digit absorbance or concentration values, and a DIGITAL CONVERTER which takes the signal and prints it as a four-digit figure on paper tape with four-digit sample number in an adjacent column.

The unique feature of the system is the peak confirmation provision built-in to prevent recording of false peak values due to noise. The system gives only the single true peak value for each sample.

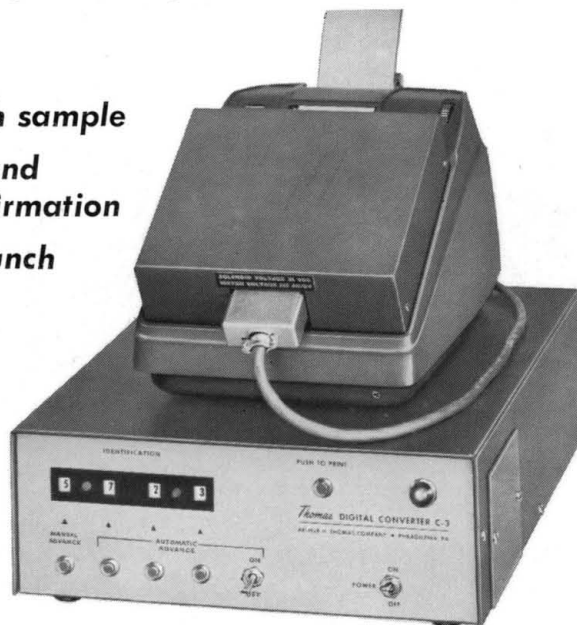

9096-J30.

**CONCENTRATION READOUT-PEAK DETECTOR, Thomas Model 3.** Readout shows absorbance on one 4-digit register, and, on a second register, simultaneously presents concentration. Second register reading is continuously presented as 4-channel output for printout, on command, by Digital Converter.

With peak detector switched in, the secondary register conforms to rising absorbance mode, but is prevented from reversing when absorbance decreases. Peak reading is retained while the detector confirms that the absorbance is continuing to decrease. Instrument then automatically relays the retained peak reading as printout signal.

**9096-J30. Concentration Readout-Peak Detector, Thomas Model 3.** For 115 volts, 50 or 60 cycles, a.c. Without digital converter . . . . . **1,650.00**

9096-J51.

**DIGITAL CONVERTER (Printout), Thomas.** Prints absorbance, transmittance, or concentration values on paper tape with sample identification numbers in adjacent column. Accessories permit coupling to IBM 526 Card Punch and to Friden SP-2 Tape Punch.

Operates on output from 9096-J30 Readout, printing the 4-digit concentration value.

**Sample Identification.** Register on Converter can be set to any number between 0000 and 9999. The first digit can be used to code test, operator, plant, etc. Last three digits provide 000 to 999 numbering capability. Sample number advances each time the printer is actuated.

**Timer.** Built-in; 2-minute range. Has receptacle for plug-in of Concentration Readout.

**EDP Punch Couplers (optional).** Solid state, coded output circuit boards, for IBM 526 or Friden SP-2 units.

**9096-J51. Digital Converter (Printout), as described.** Without readout or EDP coupler . . . . . **1,350.00**

**9096-K21. Coupler, for IBM 526 Card Punch . . . . . 255.00**

**9096-K30. Coupler, for Friden SP-2 Tape Punch . 220.00**

All Perkin-Elmer Model 139 and Coleman Model 101 Spectrophotometers sold by us are modified by us for connection to digital readouts. B. & L. "Spectronic 20" will be so modified by us, on request, at time of purchase.

Detailed descriptive Bulletin No. 9096-J51 sent upon request

**ARTHUR H. THOMAS COMPANY**
