

ing, "Surface modifications in a corona discharge"; B. Rånby, "Some new paper fiber and synthetic polymer combinations."

Biology and Chemistry of Pyrrole Compounds

Donald P. Tschudy and Lawrence Bogorad are chairman and vice chairman, respectively.

19 August. Porphyrin and metalloporphyrin chemistry: David Mauzerall, Winslow Caughey, and Joseph J. Katz. Metalloporphyrin biosynthesis and its control: David Shemin, June Lascelles, Gerald Marks, Bruce Burnham, and S. Aranoff.

20 August. Metalloporphyrin biosynthesis and its control (continued): S. Granick, Harvey Marver, Robert F. Labbe, Herbert Schwartz, and Goro Kikuchi. Metalloporphyrin biosynthesis and its control (continued): Lawrence Bogorad, Richard Levere, A. Kappas, E. Y. Levin, and R. J. Porra.

21 August. Hemoproteins and control of hemoglobin synthesis: Emanuel Margoliash, Samuel P. Bessman, Arthur Grayzel, and Marco Rabinovitz. Clinical aspects of porphyrin metabolism: Allan C. Redeker, Lennox Eales, and Marilyn Cowger.

22 August. Clinical aspects of porphyrin metabolism (continued): Donald P. Tschudy, George Ludwig, and Leonard Harber. Bile pigment chemistry and metabolism: C. J. Watson, Roger Lester, Barbara Billing, and Lionel Israels.

23 August. Bile pigment chemistry and metabolism (continued): Rudi Schmid, Paul Berk, Irwin Arias, and Samuel Schwartz.

March

18-21. American Physical Soc., Berkeley, Calif. (W. Whaling, California Institute of Technology, Pasadena 91109)

18-21. American Radium Soc., annual mtg., Miami Beach, Fla. (J. L. Pool, Executive Secretary, Memorial Hospital, 444 E. 68 St., New York, N.Y.)

18-22. National Assoc. of Corrosion Engineers, 24th annual conf. and show, Cleveland, Ohio. (T. J. Hull, 980 M & M Building, Houston, Tex. 77002)

19-20. Equipment Manuals Symp., Washington, D.C. (National Security In-

8 MARCH 1968

...in See Sharp! Two minds working together for better teaching, faster learning. It's a double-viewing head with built-in measuring pointers. Student and teacher or two students see the same specimen simultaneously. Both see with advanced Wide Field Zoom, too. Both see the image always in focus as you zoom through a continuously variable range of powers from $100\times$ to $500\times$. You see at the right magnification. It's an exciting, dramatic show for students and teachers. You get it *only* with the Bausch & Lomb Academic 255 High School/College Microscope. Write for complete information in our new Catalog No. 31-2172. Bausch & Lomb, 77403 Bausch Street, Rochester, New York 14602.

Diaflo®

ULTRAFILTRATION

Now in use in hundreds of research and clinical laboratories, the reliable, highly efficient DIAFLO system is built around a new class of synthetic polymer membranes exhibiting extremely high water flow rates and controllable solute retention characteristics with molecular cut-offs at 500, 1,000, 10,000 and 50,000 M.W. The DIAFLO Membranes are non-denaturing, non-plugging and re-useable. Taking full advantage of these unique properties, Amicon has also developed a series of compact Ultrafiltration Cells and accessories which produce systems handling volumes from 1 ml. to 12 liters.

Distilled water has never looked so good!

Take an electrically heated still that produces 2 gallons per hour of 800,000-ohms pure distilled water (2½ times purer than that used in most laboratories!) . . .

Add a storage tank that stores 10 gallons and protects it from contamination . . . keeps it ready for instant use.

Wrap them up with convenient, foolproof controls and indicators in a sleek, modern cabinet that fits almost anywhere . . .

You'll have the new Barnstead Two-Ten Laboratory Distilled Water Center!

It's one of Barnstead's latest developments to help you put distilled water on tap safely, economically and easily.

Contact your laboratory supply dealer for details or write to Barnstead.

The new range of EMI photomultipliers with "SUPER" S-11 photocathodes will enhance your project performance. High quantum efficiency, (23/24%) high gain at relatively low overall voltage, and low dark current at the rated overall sensitivity are typical of these types. They maintain the EMI standard of excellent gain stability and linearity. The narrow spread in characteristics makes these types ideal for systems or for multiple installations. The table below gives the typical values for the significant parameters.

Dia.	Type No.	Amps/ Lumen	Volts/ Overall	Anode Dark Current Nanoamps
2"	9656R	50	1150	2
3"	9708R	50	1250	5
3.5"	9531R	200	1300	25
4"	9732R	50	1250	10
5"	9709R	50	1350	15

Note that the anode dark current is given for the overall voltage at the specified overall sensitivity. The maximum overall sensitivity is 10 times the values given above. Each Tube is individually calibrated and data is supplied with the tube.

Send for our new 64 page catalog giving data and technical information on the complete range of EMI photomultipliers.

petroleum derivatives - chlorinated solvents -
peroxide solutions - ethylantracene - salt
solutions - polymers - fruit butters - mapl
syrup - acetice acid hydrogenated fats
oil contaminants - hydraulic fluids
essential oils - fruit preserves
berry preserves - egg solids -
aliphatics - biologicals
solvents - alcohols -
flours - jellies
pentane coffee
solids honey
- oils jams
waxes cocoa
nylon fruit
juices maple
syrup - plastic
soybeans flaxseed
plasticizers naphthalene
bromonaphthalene ethylantracene -
tomato products - fluorinated hydrocarbons - ext
dense flint glass - organic chemicals - silicone
- polyester resins - borosilicate crown glass -

20-second quality control

Holding to rigid quality control standards is fast and easy with a Bausch & Lomb Abbe 3-L Refractometer. You just *load, light* and *look* . . . get your answer in 20 seconds. Horizontal, up-front prisms load in *10 seconds*—wipe off easily. Light-up takes *2 seconds* . . . with built-in, push-button scale illuminator. *8 seconds* to read . . . any product within the range of ND 1.30-ND 1.71, or percent total solids from 0-85%. Accuracy is to 1 unit in the fourth decimal place. Operation is fast, easy and so comfortable there's no fatigue . . . even after all day production use. This most widely used refractometer is priced right at just \$850*.

For the utmost accuracy over a wide index range, your ultimate choice should be the B&L Precision Refractometer. Three models with different ranges cover a total range of ND 1.20-ND 1.70. Under proper working conditions, it's possible to get index readings to 3 units in the fifth decimal place. And the price is just \$1840*.

Send for our Catalog 33-202, Bausch & Lomb, 75903 Bausch Street, Rochester, New York 14602.

SURE CURE FOR THE

DT's

PROCEDURE:

1. Take One Model T-9 Thermostatic Bath & Circulator
2. Mix with one ¼ hp PBC-4 Bath Cooler
3. Add a Model C-4 welded aluminum cart

Now you can serve up fluid from -20°C to $+250^{\circ}\text{C}$. $\text{dT} \pm 0.02^{\circ}\text{C}$ with water based fluid; $\pm 0.05^{\circ}\text{C}$ with organic fluids. Small size and mobility mean one system can serve varied requirements.

Work Area: $6\frac{1}{2}$ " dia. x 8" deep
 Pump Volume: 130 gal/hr (0 head)
 Pump Head: 10 ft. max.
 BTU/hr 20°C : 1500+ (net)
 Floor Space: $14\frac{1}{2}$ " x $21\frac{1}{2}$ "

If you can write the problem... you already know how to use the Mathatron

It's as simple as that . . . No sequencing, no tucking away of intermediate results in storage registers to be recalled later, no strange hieroglyphics or mixed-up mathematical symbols . . . Just the linear equation written with the keyboard exactly as you would with a pencil.

And with this unique ease of operation, Mathatron also gives you a programmable memory, the ability to learn and automatically work a complex formula, a true full floating decimal point, a power-of-ten exponent which extends the number range to 100 digits and a serial tape with a printed record of the problem as you write it with the keys, and the solution.

Mathatron is a truly unique and wonderful electronic mathematic machine and much, much more than just a calculator. Get the details today.
